

LIST OF CONTENTS

1 Introduction	1
1.1. Web Applications in Businesses	2
1.2. Enterprise Portals	5
1.3. Digital Enterprises	6
1.4. Manufacturing Portals	7
1.4.1. Web Applications of Manufacturing Portal	8
1.4.2. Manufacturing Portal Server	11
1.4.3. Manufacturing Portal Users.....	11
1.4.4. Application Providers and Portal Operator.....	12
1.5. Benefits of Digital Enterprises	13
 2 Recent Developments of Web Applications in Product Design and Manufacture	 15
2.1. Web Applications in Product Design and Manufacture	16
2.1.1. Individual Web-Based Decision Support Systems	17
2.1.2. Inter-Operable Web Applications	19
2.1.3. Web Applications for Group/Team Work	21
2.1.4. Enterprise “Portalets” of Web Applications	21
2.2. Typical Scenarios of Collaborative Product Commerce.....	23
2.2.1. Market Research and Concept Testing	25
2.2.2. Collaborative Early Product Definition	25
2.2.3. Collaborative Design Review and Engineering Change Management	27
2.2.4. Supplier Chain Integration	28
2.2.5. Intelligent Product Manuals – Technical Supports and Customer Services	30
2.2.6. Collaborative Product Development Project Management	31
2.3. Summary	32

3 Challenging Issues	35
3.1. Challenges Related to Operation of Web Applications.....	36
3.1.1. When and Where Web Applications are Applied Most Effectively and Efficiently?	36
3.1.2. How to Choose Appropriate Web Applications?	37
3.1.3. Appropriate Business Models	37
3.1.4. Decision Traceability	38
3.1.5. Individual versus Common Working Memories	39
3.1.6. Collaborative Workflow Management	39
3.1.7. Synchronous versus Asynchronous	40
3.2. Challenges Related to Development of Web Applications	41
3.2.1. Difficulties in Web Application Development	41
3.2.2. How to Share and Distribute Computation between the Server and the Client?	41
3.2.3. Interactivity and Security	42
3.2.4. How to Convert Existing Legacy Systems into Web-based Systems on the Internet?	42
3.2.5. Information Overflow	43
3.3. Challenges Related to Deployment of Web Applications	43
3.3.1. Difficulties in Deploying Web Applications	43
3.3.2. Approaches to Building Enterprise Portals.....	44
3.3.3. Enterprise Portal Servers and Enterprise “Portalets”	44
3.3.4. Types of Enterprise Portalets	45
3.4. Special Requirements of CPC Web Applications.....	46
3.5. Summary	46
 4 Development and Deployment of Web Applications	 49
4.1. Development Architecture	50
4.2. Implementation Constructs.....	52
4.2.1. HTML, VRML, and XML	53
4.2.2. ActiveX Technology	53
4.2.3. Java Technology.....	54
4.2.4. Summary of Implementation	55
4.3. Deployment of Web Applications.....	56
4.3.1. Deployment of Application Clients	57
4.3.2. Deployment of Application Servers Dependent on Web Servers	58
4.3.3. Deployment of Application Servers Independent of Web Servers	59
4.3.4. Summary of Deployment	60
4.4. Connection of Remote Databases to Web Applications.....	61
4.4.1. ODBC and JDBC	62
4.4.2. Database Connections to Web Applications.....	64
4.4.3. Summary of Database Connection.....	64
4.5. Summary	65

5 Synchronization of Web Applications.....	67
5.1. Components of Synchronised Web Applications	68
5.2. Research Issues in Synchronised Web Applications	70
5.2.1. Communication	70
5.2.2. Role Assignment.....	71
5.2.3. Awareness of Presence.....	71
5.2.4. History Management	72
5.2.5. Participation	72
5.2.6. Conflict Resolution.....	73
5.3. Strategies for Conflict Resolution	73
5.3.1. Synchronisation Using Shared Workspace	74
5.3.2. Decision Fusion Explorer	75
5.3.3. Locking Mechanism	78
5.3.4. Vote Explorer	79
5.4. Synchronisation Implementation.....	80
5.4.1. Client Refreshing from Server-to-Client One-way Communication.....	80
5.4.2. Client/Server Two-way Communication	82
5.5. Summary	84
 6 Business Models of Digital Manufacturing Portals.....	 87
6.1. Business Players	89
6.2. Nature of Digital Enterprises.....	89
6.3. Functionality of Web Applications/Contents.....	94
6.4. Value Creation	94
6.5. Revenue Generation.....	95
6.6. Access Control.....	96
6.7. Towards a Comprehensive Framework.....	96
6.8. Summary	98
 7 Search Engine of Web Applications in Product Introduction	 101
7.1. The Need for Special-Purpose Search Engine	102
7.1.1. Dramatic Emergence of Web Applications	102
7.1.2. General-Purpose Search Engines are Inadequate	103
7.2. System Development: Objectives and Approaches	104
7.2.1. Working Scenario	104
7.2.2. Objectives of the Special-Purpose Search Engine	105
7.2.3. Approaches to Building Search Engines.....	105
7.3. Overview of <i>wapip</i> System.....	106
7.3.1. System Components and Architecture	106
7.3.2. System Data model.....	107
7.3.3. System Implementation and Deployment	108
7.4. System Operation.....	109

7.4.1.	User Registration and Login Controls	109
7.4.2.	Registration of Web Applications.....	110
7.4.3.	Solicitation of Web Applications.....	111
7.4.4.	Searching for Web Applications.....	113
7.5.	Summary.....	115
8 Web-Based Design for Manufacture and Assembly		117
8.1.	Web-Based DFA Architecture	118
8.2.	Web-Based Design for Assembly	120
8.2.1.	Product Design	120
8.2.2.	Web-Based Functional Analysis.....	120
8.2.3.	Web-Based Handling Analysis.....	125
8.2.4.	Web-Based Fitting Analysis	125
8.2.5.	Collecting Results	125
8.3.	Implications for Future Developments	127
8.3.1.	Web-Based Architecture for Collaborative DFMA.....	127
8.3.2.	Web-Based Generic Framework for Developing DFX Techniques	128
8.3.3.	Web-Based Framework for Integrated Utilisation of Multiple DFX Tools.....	130
8.3.4.	Web-Based DFX-Oriented Collaborative Product Development	131
8.4.	Summary.....	133
9 Failure Mode and Effect Analysis (FMEA) over the WWW		135
9.1.	Design Tools as Virtual Consultants on WWW	136
9.2.	System Architecture of Web-Based FMEA.....	137
9.3.	FMEA System Development.....	139
9.3.1.	Design of FMEA Worksheets	140
9.3.2.	System Implementation and Deployment.....	141
9.4.	System Operation and Evaluation.....	143
9.4.1.	System Operation	143
9.4.2.	System Evaluation.....	144
9.5.	Implementing and Deploying through Thin Clients.....	145
9.6.	Summary.....	146
10 Web-Based Engineering Change Management.....		147
10.1.	Literature Review	148
10.2.	Architecture of the Web-Based ECM System	151
10.2.1.	Supports for the ECM Lifecycle	152
10.2.2.	Components of the Web-Based ECM System.....	154
10.3.	System Deployment and Implementation	156
10.3.1.	ECM Database Model.....	156
10.3.2.	System Deployment	157
10.3.3.	System Implementation.....	157
10.4.	Web-Based ECM Facilities	158

10.4.1. Web-Based Log of Engineering Changes	158
10.4.2. Web-Based Request of Engineering Changes	160
10.4.3. Web-Based Evaluation of Engineering Changes	161
10.4.4. Web-Based Notice of Engineering Changes	162
10.4.5. Typical Procedure of Using the ECM Facilities	163
10.5. Summary	167

11 Web-Based Support for Early Supplier Involvement in New Product Development 169

11.1. Early Supplier Involvement (ESI) in NPD	170
11.1.1. Early Supplier Involvement	170
11.1.2. New Challenges	171
11.2. The <i>WeBid</i> Framework	174
11.2.1. WeBid Overview	174
11.2.2. WeBid Components	175
11.2.3. Brokering Customer-Supplier Partnership	176
11.3. The Supply Explorer	177
11.4. The Bid Explorer	178
11.4.1. The Bid Model	178
11.4.2. Inviting and Submitting Bids	181
11.5. The Partnership Explorer	182
11.5.1. Individual Partnership Indices	182
11.5.2. Uses of Confidence Indices	183
11.6. The Share Explorer	184
11.7. Implementation Perspectives	185
11.7.1. Design Considerations	186
11.7.2. Distribution Considerations	186
11.7.3. Implementation Considerations	187
11.7.4. Database Deployment and Connection	187
11.8. Summary	188

12 Web-Based Collaborative Product Definition 189

12.1. Framework for Early Product Definition	190
12.1.1. Methodology for Early Product Definition	190
12.1.2. <i>ProDefine</i> System Architecture	191
12.2. Concept Explorer	194
12.2.1. Editing/Browsing Concepts	195
12.2.2. Concept Representation and Implementation	195
12.2.3. Collection of Concepts	196
12.3. Requirement Explorer	198
12.3.1. Requirement Representation	199
12.3.2. Compiling Design Requirements	200
12.4. Concept Generation Explorer	201
12.4.1. Morphological Generation Chart	201

12.4.2.	Generating Conceivable Concepts	203
12.4.3.	Formulating Solutions	204
12.5.	Concept Evaluaton Explorer	205
12.5.1.	Establishing Evaluation Criteria	206
12.5.2.	Comparing Alternative Solutions with Morphological Evaluation Chart...	207
12.5.3.	Evaluating Individual Design Features Based on QFD.....	209
12.6.	Summary	211
12.6.1.	Key Contributions	211
12.6.2.	Potential Applications	211
12.6.3.	Limitations and Future Research	212
13	Web-Based Collaborative Product Design Review	215
13.1.	Literature Review	216
13.2.	Framework for Collaborative Product Design Review	219
13.2.1.	Design Considerations	220
13.2.2.	CyberReview Framework	221
13.2.3.	CyberReview Components	222
13.3.	Case Study	223
13.3.1.	Organize Design Review with <i>Review Coordinator</i>	223
13.3.2.	Upload/Download Documents with <i>Design Explorer</i>	224
13.3.3.	Submit Reviews with <i>Comments Explorer</i>	225
13.3.4.	Submit Reviews with <i>Review Forms</i>	228
13.3.5.	Participate in Review with <i>Meeting Explorer</i>	229
13.3.6.	Share 3D Product Features with <i>VRML Whiteboard</i>	231
13.4.	Implementation and Deployment Considerations.....	233
13.4.1.	EAI for Realizing Synchronized VRML Whiteboard	233
13.4.2.	Applet-Servlet Communication	234
13.5.	Summary	235
14	Online Courseware Engine for Teaching by Examples and Learning by Doing	237
14.1.	WWW.TELD.NET: Online Courseware Engine.....	238
14.1.1.	TELD as a Teaching and Learning Method	239
14.1.2.	Courseware Web Host.....	240
14.1.3.	Courseware Search Engine	241
14.1.4.	Virtual Classroom and Study Room	242
14.2.	Development of <i>TELD</i> Courseware Engine	242
14.2.1.	Architecture of TELD Courseware Engine	243
14.2.2.	TELD Data Model.....	244
14.2.3.	Many Faces of Cases and Curricula.....	245
14.3.	Operation of <i>TELD</i> Courseware Engine	245
14.3.1.	Use <i>TELD</i> to Prepare and Host Course Materials	246
14.3.2.	Use <i>TELD</i> as Virtual Classroom to Deliver Curriculum Materials Electronically	247
14.3.3.	Use <i>TELD</i> as Virtual Study Room to Conduct Revisions / Assessments ...	248

14.4. Summary	249
List of References	253
List of Websites.....	265
