

Contents

Part I Invited Presentations

Dispersive Properties of High Order Finite Elements

Mark Ainsworth 3

Computing Solutions for Helmholtz Equation: Domain Versus Boundary Decomposition

Mikhaël Balabane 11

A Eulerian Geometric Optics Method for High Frequency Electromagnetic Fields Computations in Presence of Fold Caustics

Jean-David Benamou, Olivier Lafitte, Rémi Sentis, Ian Sollic 19

Exact and High-Order Non-Reflecting Computational Boundaries

Dan Givoli 26

Mathematical Modeling and Numerical Methods for Induction Logging Applications

Alexander Besspalov, Yuri A. Kuznetsov, Lev Tabarovsky 32

The Inverse Kinematic Problem in Anisotropic Media

Gunther Uhlmann 39

Part II Acoustic Waves

Aeroacoustics of Moving Compact Bodies Application to the Bullroarer

Michel Roger, Stéphane Aubert 49

Numerical Simulation of a Guitar

Eliane Bécache, Antoine Chaigne, Grégoire Derveaux, Patrick Joly.... 54

**Challenges and Requirements in the Modelling
of Musical Instruments**

Antoine Chaigne 60

**A Webster-Lokshin Model for Waves with Viscothermal
Losses and Impedance Boundary Conditions:
Strong Solutions**

Houssein Haddar, Thomas Hélie, Denis Matignon 66

**Numerical Simulation of Acoustic Waveguides
for Webster-Lokshin Model Using Diffusive Representations**

Thomas Hélie, Denis Matignon 72

Regularization of the Time-Harmonic Galbrun’s Equations

Anne-Sophie Bonnet-Ben Dhia, Guillaume Legendre, Eric Lunéville .. 78

**Acoustic Transmission Through a Splitter Silencer:
A Technique that Avoids “Root Finding”**

Jane B. Lawrie 84

Acoustic Waves Tunnelling into Whispering Gallery Waves

Ivan V. Andronov 90

High-Order Numerical Simulation of Rocket Launch Noise

Bernhard Müller, Johan Westerlund 95

Part III Artificial Boundary Conditions

**Lacunae-Based Artificial Boundary Conditions
for the Numerical Simulation of Unsteady Waves
Governed by Vector Models**

Semyon V. Tsynkov 103

**Active Absorbing Boundary
for an Extended Boussinesq-Like Model**

Philippe Sergent, Patrick Gomi, Khouane Meftah 109

Stabilized Perfectly Matched Layer for Advective Acoustics

Julien Diaz, Patrick Joly 115

Long-Time Behavior of the Unsplit PML

Eliane Bécache, Peter G. Petropoulos, Stephen D. Gedney 120

**A New Construction of Perfectly Matched Layers
for Hyperbolic Systems with Applications
to the Linearized Euler Equations**

Thomas Hagstrom 125

Discretely Nonreflecting Boundary Conditions for Higher Order Centered Schemes for Wave Equations	
<i>Daniel Appelö, Gunilla Kreiss</i>	130

Diffusive Realization of the Impedance Operator on Circular Boundary for 2D Wave Equation	
<i>David Levaudoux, Gérard Montseny</i>	136

Perfectly Matched Layers for the Convected Helmholtz Equation	
<i>Eliane Bécache, Anne-Sophie Bonnet-Ben Dhia, Guillaume Legendre</i> .	142

Laplace Domain Methods for the Construction of Transparent Boundary Conditions for Time-Harmonic Problems	
<i>Thorsten Hohage</i>	148

Part IV Asymptotic Analysis

Vibrating Systems with Concentrated Masses: On the High Frequencies and the Local Problem	
<i>Eugenia Pérez</i>	157

Bulk and Surface Waves in Porous Media: Asymptotic Analysis	
<i>Inna Edelman</i>	163

Asymptotical Models for Wave Propagation in Media Including Slots	
<i>Patrick Joly, Marc Lenoir, Sébastien Tordeux</i>	169

Part V Control

Boundary Control of the Maxwell Dynamical System: Lack of Controllability by Topological Reasons	
<i>M. Belishev, A. Glasman</i>	177

Global Exact Controllability of Semi-linear Time Reversible Systems in Infinite Dimensional Space	
<i>Xu Zhang</i>	183

Some Control Problems for the Maxwell Equations Related to Furtivity and Masking Problems in Electromagnetic Obstacle Scattering	
<i>Lorella Fatone, Maria Cristina Recchioni, Francesco Zirilli</i>	189

The Effect of Group Velocity in the Numerical Analysis of Control Problems for the Wave Equation <i>Fabrizio Macià</i>	195
Simultaneous Interior Controllability of Elastic Strings <i>René Dáger</i>	201
A Study of Numerical Methods for Boundary Control of the Wave Equation in 1D <i>Jan Marthedal Rasmussen</i>	207
A 2-Grid Algorithm for the 1-d Wave Equation <i>Mihaela Negreanu, Enrique Zuazua</i>	213
<hr/>	
Part VI Direct Scattering	
<hr/>	
Diffraction by Locally Perturbed Acoustic Grating <i>Anne-Sophie Bonnet-Ben Dhia, Karim Ramdani</i>	221
A New Class of Integral Equations for Scattering Problems <i>David Levadoux, Bas Michielsen</i>	227
Scattering by Inhomogeneities <i>P. A. Martin</i>	233
Wave Reflection by a Sheet of Sea Ice <i>C. M. Linton, Hyuck Chung</i>	239
Modification of Boundary Condition for the Problem of Source Radiation in a Half-Space with a Curvilinear Impedance Surface <i>Lev P. Kogan, V. V. Tamoikin, T. M. Zaboronkova</i>	245
A Domain Imbedding Method with Distributed Lagrange Multipliers for Acoustic Scattering Problems <i>Erkki Heikkola, Tuomo Rossi, Jari Toivanen</i>	252
A Galerkin Boundary Element Method for a High Frequency Scattering Problem <i>Simon Chandler-Wilde, Stephen Langdon, Lars Ritter</i>	257
Dirichlet-to-Neumann Boundary Condition for Multiple Scattering Problems <i>Marcus J. Grote, Christoph Kirsch</i>	263

Generalized Brakhage-Werner Integral Formulations for the Iterative Solution of Acoustics Scattering Problems <i>Xavier Antoine, Marion Darbas</i>	268
Volume Singular Integral Equations Method for Solving of Diffraction Problem of Electromagnetic Waves in Rectangular Resonator <i>Youri Smirnov, Alexei Tsupak</i>	274
A Coupling of Spectral and Finite Elements for an Acoustic Scattering Problem <i>Salim Meddahi, Antonio Márquez, Virginia Selgas</i>	280
Transient Scattering from Metallic Enclosures Using 3D Time Domain Methods <i>J.L. Silveira, S. Benhassine, L. Pichon, A. Raizer</i>	286
Plane Wave Basis in Integral Equation for 3D Scattering <i>Emmanuel Perrey-Debain, Jon Trevelyan, Peter Bettess</i>	292
Determination of Green's Tensor for a Conducting Magneto-Viscoelastic Medium <i>Gayatri Chattopadhyay, R. K. Bhattacharyya</i>	298
Numerical Analysis of Transverse Localization of Radiation in Freely Propagating Electromagnetic Bessel Beams <i>Peep Adamson</i>	304

Part VII Domain Decomposition Methods

Space-Time Mesh Refinement for the Elastodynamic Equations <i>Eliane Bécache, Patrick Joly, Jerónimo Rodríguez</i>	313
Dealing with Cross-Points in a Non-Overlapping Domain Decomposition Solution of the Helmholtz Equation <i>Y. Boubendir, A. Bendali</i>	319
On Handling the Boundary Conditions at the Infinity for Some Exterior Problems by the Alternating Schwarz Method <i>F. Ben Belgacem, N. Gmati, M. Fournié, F. Jelassi</i>	325

Part VIII Elastic Waves

**Mathematical Modeling of Elastic-Plastic Waves
in Granular Media**
Vladimir Sadovskii, Oxana Sadovskaya 333

**Wave Excitation, Propagation and Diffraction
in Elastic Layered Structures with Obstacles**
Evgeny Glushkov, Natalya Glushkova, Alexander Ekhlakov 339

**On the Oscillation of a Punch Moving on Free Surface
of an Elastic Half-Space**
S. Gavrilov, G.C. Herman 345

**On the Antiplane Dynamical Problem of Elasticity Theory
in a Domain with Crack**
Serguei Matioukevitch 351

**Diffusive Regime for the High-Frequency Dynamics
of Randomly Heterogeneous Plates**
Eric Savin 357

**Mixed Spectral Elements for the Linear Elasticity System
in Unbounded Domains**
Gary Cohen, Sandrine Fauqueux 363

**Element-Based Node Selection Method
for Reduction of Eigenvalue Problem**
Maenghyo Cho, Hyungi Kim 369

Part IX Electromagnetism

**A Family of First-Order Conditions
for the Long-Time Stability of the Maxwell System**
H       Barucq 377

**Mass-Lumped Edge Elements
for the Lossy Maxwell's Equations**
Gary Cohen, Xavier Ferrieres, Peter Monk, S         Pernet 383

**A Discontinuous Galerkin Method for 3D Maxwell's Equation
on Non-conforming Grids**
Nicolas Canouet, Loula F      , Serge Piperno 389

Two Implementations of N        's Mixed Finite Elements in $\mathbb{R}^3$
Kevin Rogovin, Janne Martikainen 395

Space-Time Regularity of the Solution to Maxwell's Equations in Non-Convex Domains <i>Emmanuelle Garcia, Simon Labrunie</i>	400
Maxwell's Equations in Nonlinear Biperiodic Structures <i>Gang Bao, Aurelia Minut, Zhengfang Zhou</i>	406
Homogenization of the Maxwell Equations Using Floquet–Bloch Decomposition <i>Christian Engström, Gerhard Kristensson, Daniel Sjöberg, David J. L. Wall, Niklas Wellander</i>	412
Electromagnetic Wave Propagation Through Small Diameter Tube Bundles <i>I. David Abrahams, Gregory A. Kriegsmann</i>	417
Link Between the Parabolic Equation Method and Finding the Gradient Index of Refraction <i>Francisco Varela</i>	423
<hr/> Part X Fictitious Domain Methods <hr/>	
A Fictitious Domain Method for a Unilateral Contact Problem <i>Eliane Bécache, Patrick Joly, Gilles Scarella</i>	431
A Fictitious Domain Method with Operator Splitting for Wave Problems in Mixed Form <i>Vrushali Bokil, Roland Glowinski</i>	437
<hr/> Part XI Guided Waves <hr/>	
Mathematical Analysis of the Guided Modes of Integrated Optical Guides <i>Evgueni Kartchevski, George Hanson</i>	445
Rapidly-Convergent Local-Mode Representations for Wave Propagation and Scattering in Curved-Boundary Waveguides <i>Gerassimos A. Athanassoulis, Konstadinos A. Belibassakis</i>	451
Riccati Equation for the Impedance of Waveguides <i>Isabelle Champagne, Jacques Henry</i>	457
Eigenvalues of the Steklov Problem in an Infinite Cylinder <i>Oleg V. Motygin, Nikolay G. Kuznetsov</i>	463

**On a Method of Search for Trapped Modes
in Domains with Cylindrical Ends**

Viktor O. Kalvine, Pekka Neittaanmäki, Boris A. Plamenevskii 469

**The Forced Motion of Structures
that Support Trapped or Near-Trapped Water Waves**

P. McIver, M. McIver 475

Part XII Hydrodynamics and Gravity Waves

**On the Motion of a Floating Body
Supported by an Air Cushion**

Nikolay Kuznetsov 483

Long Wave Approximations for Water Waves

Jerry Bona, Thierry Colin, David Lannes 489

**Oblique-Angled Periodicity Lattice
in Capillary-Gravity Waves Problems**

Irina Konopleva, Boris Loginov 495

Localized Waves in a Thin Film with Growing Islands

Dmitry Indeitsev, Yulia Mochalova 500

**Numerical Schemes for 2D Shallow Water Equations
with Variable Depth and Friction Effects**

*Tomás Chacón Rebollo, Antonio Domínguez Delgado, Enrique D.
Fernández Nieto* 506

**Generalized Eigenfunction Expansions;
an Application to Linear Water Waves**

Christophe Hazard, François Loret 512

**Shallow Water Wave Modelling
Using a High-Order Discontinuous Galerkin Method**

Claes Eskilsson, Spencer J. Sherwin, Lars Bergdahl 518

**A Nonlinear Spectral Model for Gravity Waves Generation
and Propagation in a Bounded Domain**

Félicien Bonnefoy, David Le Touzé, Pierre Ferrant 523

**Simulation of Internal Waves in the Strait of Gibraltar
Using a Two-layer Shallow-water Model**

*M. J. Castro, J. A. García-Rodríguez, J. M. González-Vida,
J. Macías, C. Parés, M. E. Vázquez-Cendón* 529

Second Order Methods for the Simulation of Pressure Waves and Cavitation of Water	
<i>Anselm Berg, Uwe Iben, Andreas Meister</i>	535
Raviart-Thomas Approximations for Variational Hydroacoustics Problems	
<i>Artem Shynkarenko, Vitaly Horlatch</i>	541
<hr/>	
Part XIII Inverse Problems	
<hr/>	
1-D Inverse Problem of Thermoelasticity	
<i>Valery G. Yakhno</i>	549
Electromagnetic Propagation in Troposphere: Inverse Problem Using Optimization Approaches	
<i>Mohamed Yassine Ayari, Arnaud Coatanhay, Ali Khenchaf</i>	555
Inverse Problem for a Nonlinear Helmholtz Equation	
<i>Emmanuel Jalade</i>	561
On Masking Operations for the Point-Source Method Solving Inverse Boundary Value Problems	
<i>Klaus Erhard, Roland Potthast</i>	567
Some Inverse Problems for the Equation $-(pu')' = \lambda ru$	
<i>Anton Monsef</i>	573
Dynamic Identification of the Deformed Body Parameters	
<i>Alexander Kravchuk, Pekka Neittaanmäki</i>	577
Underground Cavity Detection Based on Elastodynamic Boundary Element and Topological Derivative Approaches	
<i>Marc Bonnet, Bojan B. Guzina, Sylvain Nintcheu Fata</i>	582
Reconstruction of the Original Tsunami Waveform on the Insular Arc Bottom Topography by the Coastal Observations Inversion	
<i>Tatjana Voronina, Veacheslav Gusjakov, Vladimir Tcheverda</i>	588
A Numerical Method for Solving a Class of Inverse Eigenvalue Problems. Application to Optical Fibre Design	
<i>Chokri Bekkey, Rabia Djellouli, Mouna Youssef</i>	593
Destabilization of Inertial Waves in a Rotating Cylinder	
<i>Y.Duguet, J.F. Scott, L. Le Penven</i>	599

Part XIV Inverse Scattering

**Parameter Retrieval in Electron Microscopy
by Solving an Inverse Scattering Problem**
Kurt Scheerschmidt 607

Interior Transmission Problem for Anisotropic Media
Fioralba Cakoni, Housseem Haddar 613

**A Modified Frozen Newton Method to Identify a Cavity
by Means of Boundary Measurements**
Tuong Ha-Duong, Mohamed Jaoua, Faiza Menif 619

**On the Solution of Inverse Obstacle Acoustic
Scattering Problems with a Limited Aperture**
Rabia Djellouli, Radek Tezaur, Charbel Farhat 625

**Resolution Estimation for Imaging and Time Reversal
in Scattering Media**
Liliana Borcea, George Papanicolaou, Chrysoula Tsogka 631

Inverse Scattering by Rough Surfaces in the Time Domain
Claire Lines, Simon Chandler-Wilde 637

**Global and Selective Focusing Using Acoustic
Time Reversal Mirrors in the Frequency Domain**
Christophe Hazard, Karim Ramdani 643

**On the Validation of the Linear Sampling Method
in Electromagnetic Inverse Scattering Problems**
Francis Collino, M'Barek Fares, Housseem Haddar 649

Part XV Multipole Methods and Fast Solvers

**Complex Industrial Computations in Electromagnetism
Using the Fast Multipole Method**
Guillaume Sylvand 657

**Using the Multipole Techniques
for the Far to Near Field Transformation**
Nathalie Bartoli, Francis Collino, Fabrice Dodu 663

**Coupling of a Fast Multipole Method and a Microlocal
Discretization for Integral Equations of Electromagnetism**
Alain Bachelot, Eric Darrigrand, Katherine Mer-Nkonga 669

Fast Direct Solver for a Time-harmonic Electromagnetic Problem with an Application

Janne Martikainen, Tuomo Rossi, Kevin Rogovin, Jari Toivanen 675

Part XVI Nonlinear Waves

A Finite Element Method for the Solution of a Time-Dependent Nonlinear Wave Propagation Equation

C. J. E. M. Fortes, J. L. M. Fernandes, M. A. Vaz dos Santos 683

Elimination of First Order Errors in Time Dependent Shock Calculations

Malin Siklosi, Gunilla Kreiss 688

On the Numerical Simulation of the Constrained Wave Motion: a Penalty Approach

Roland Glowinski, Alexander Lapin, Serguei Lapin 694

Nonlinear Supratransmission: Energy Transmission by Nonlinear Mode Generation

F. Geniet, J. Leon 700

A Half Plane Problem Related to the Stability of Viscous Shock Waves

Gunilla Kreiss, Heinz-Otto Kreiss 706

The Propagation of Nonlinear Water Waves in a Bounded Domain

Beatrice Pelloni 711

Homoclinic Structures for Nonlinear Integrable Wave Equations: New Approach

E. V. Doktorov, V. M. Rothos 717

Nonlinear Coupled Thermomechanical Waves: Modelling Shear Type Phase Transformation in Shape Memory Alloys

Linxiang Wang, Roderick Melnik 723

Evans Function for the AKNS Problem with Algebraic Solitons

Dmitry E. Pelinovsky, Vassilis M. Rothos 729

Nonlinear Focusing and Rogue Waves in Deep Water

C. M. Schober 735

Part XVII Numerical Methods

Mixed Spectral Elements for the Helmholtz Equation*Gary Cohen, Marc Duruflé* 743**Three Dimensional Plane Wave Basis Finite Elements
for Short Wave Modelling***Omar Laghrouche, Peter Bettess, Jon Trevelyan* 749**Methods for Computing Synthetic Seismograms
and Estimating Their Computational Error***Robert J. Geller, Nozomu Takeuchi, Hiromitsu Mizutani, Nobuyasu
Hirabayashi* 754**Numerical Simulation of Thermoelastic Wave
and Phase-Transition Front Propagation***Arkadi Berezovski, Jüri Engelbrecht, Gerard A. Maugin* 759**Finite Volume Methods for Wave Phase Conjugation
in Active Media***Alain Merlen, Peter Voinovitch, Vladimir Preobrazhensky, Philippe
Pernod* 765**Convergence of a Collocation Scheme
for a Retarded Potential Integral Equation***Dugald B Duncan, Penny J Davies* 770**Numerical Stability of Schemes for Time Domain Scattering
from a Thin Strip***Penny J Davies* 776**The Use of Nonlinear Solitary Waves
for Computing Short Wave Equation Pulses***John Steinhoff, Meng Fan, Lesong Wang, Min Xiao* 782**On a Class of Preconditioners
for Solving the Discrete Helmholtz Equation***Y.A. Erlangga, C. Vuik, C.W. Oosterlee* 788**Wavelet Analysis in Solving the Cauchy Problem
for the Wave Equation in Three-Dimensional Space***Maria V. Perel, Mikhail S. Sidorenko* 794**Backward Error Analysis for a Multi-Symplectic Integrator***A.L. Islas, C.M. Schober* 799

Time-Periodic Solutions of Wave Equation via Controllability and Fictitious Domain Methods	
<i>Roland Glowinski, Jacques Periaux, Jari Toivanen</i>	805

Part XVIII Resonances

Asymptotics of Bound States, Bands and Resonances for Waveguides and Layers Coupled Through Small Windows	
<i>Igor Yu. Popov</i>	813
Spectral Theory of Resonances in Electromagnetic Gratings	
<i>H. Paul Urbach</i>	818
Absence of Positive Eigenvalues for the Linearized Elasticity System. The Half-space Case	
<i>Mourad Sini</i>	824
Optimal Design of Waveguide-Grating Resonances	
<i>Gang Bao, Kai Huang</i>	830
Resonances of an Elastic Plate in a Confined Flow	
<i>A.S. Bonnet-Ben Dhia, J.-F. Mercier</i>	836

Part XIX Schrödinger Equations

The Scattering Amplitude for the Schrödinger Operator in a Layer	
<i>Michel Cristofol, Patricia Gaitan</i>	845
Adaptive Absorbing Boundary Conditions for Schrödinger-type Equations	
<i>I. Alonso-Mallo, N. Reguera</i>	851
Shallow Potential Wells for the Discrete Schrödinger Equation	
<i>Joel A. Rodriguez-Ceballos, Peter N. Zhevandrov</i>	857
Paraxial Approximation in a Tilted Frame for Laser Wave Propagation	
<i>Remi Sentis, Marie Doumic, François Golse</i>	862
Wavepacket Dynamics in Superfluid Helium	
<i>Lauri Lehtovaara, Jussi Eloranta</i>	868

Part XX Seismic Waves

**Mathematical Analysis of Diffusion Models
in Poro-Elastic Media**
Hélène Barucq, Monique Madaune-Tort, Patrick Saint-Macary 873

**Seismic Wave Modeling
with the Generalized Screen Propagator**
Frank Prat, Helene Barucq, Bertrand Duquet 879

An Upgrade in Linearized Modeling of Wave Propagation
Florence Delprat-Jannaud, Laure Pellé, Patrick Lailly 885

Spectral Laguerre Method for Viscoelastic Seismic Modeling
Boris Mikhailenko, Alexander Mikhailov, Galina Reshetova 891

**Numerical Modeling of P-wave AVOA
in Media Containing Vertical Fractures**
Tatiana Chichinina, Vladimir Sabinin, Gerardo Ronquillo Jarillo 897

Part XXI Viscoelasticity

**Uniqueness of the Solution to the Reflection-Transmission
Problem in a Viscoelastic Layer**
Angelo Morro 905

**A Time Domain Method for Modeling Wave Propagation
Phenomena in Viscoacoustic Media**
Jean-Philippe Groby, Chrysoula Tsogka 911

**Mathematical and Numerical Modeling of Wave Propagation
in Linear Viscoelastic Media**
Eliane Bécache, Abdelaâziz Ezziani, Patrick Joly 916

**Numerical Model of Seismic Wave Propagation
in Viscoelastic Media**
Vladimir Sabinin, Tatiana Chichinina, Gerardo Ronquillo Jarillo 922

Author Index 929

Mathematical and Numerical Aspects of Wave

Propagation WAVES 2003

Proceedings of The Sixth International Conference on

Mathematical and Numerical Aspects of Wave

Propagation Held at Jyväskylä, Finland, 30 June – 4 July

2003

Cohen, G.; Heikkola, E.; Joly, P.; Neittaanmäki, P. (Eds.)

2003, XX, 932 p. In 2 volumes, not available separately.,

Hardcover

ISBN: 978-3-540-40127-8
