

# Contents

<b>Preface</b> .....	v
<b>1. Introduction to Semi-Feasible Computation</b> .....	1
1.1 P-Selectivity .....	1
1.1.1 Background and Definitions .....	1
1.1.2 Basic Properties .....	3
1.2 Nondeterministic Selectivity .....	9
1.2.1 Background and Definitions .....	9
1.2.2 Basic Properties .....	10
1.3 Bibliographic Notes .....	15
<b>2. Advice</b> .....	17
2.1 Advice Strings and Circuits .....	17
2.2 Advice for P-Selective Sets .....	20
2.2.1 Upper Bounds on the Amount of Advice for P-Selective Sets .....	21
2.2.2 Are There P-Selective Sets Other Than Standard Left Cuts? .....	28
2.2.3 Lower Bounds .....	31
2.3 Advice for Nondeterministically Selective Sets .....	32
2.4 Are There Unique Solutions for NP? .....	35
2.4.1 Small Circuits and the Polynomial Hierarchy .....	35
2.4.2 NP Lacks Unique Solutions Unless the Polynomial Hierarchy Collapses .....	38
2.5 Bibliographic Notes .....	39
<b>3. Lowness</b> .....	41
3.1 Lowness Basics .....	41
3.1.1 Basic Lowness Theory .....	41
3.1.2 Extended Lowness and Refined Lowness .....	43
3.2 Lowness of P-Selective Sets .....	46
3.2.1 Upper Bounds .....	47
3.2.2 Lower Bounds .....	48
3.3 Lowness of Nondeterministically Selective Sets .....	49

3.3.1	Upper Bounds	49
3.3.2	Lower Bounds	58
3.4	Bibliographic Notes	58
<b>4.</b>	<b>Hardness for Complexity Classes</b>	<b>61</b>
4.1	Can P-Selective Sets Be Hard for Complexity Classes?	61
4.2	Can P-Selective Sets Be Truth-Table-Hard for UP, $\Delta_2^p$ , PSPACE, or EXP?	62
4.3	Can P-Selective Sets Be Truth-Table-Hard or Turing-Hard for NP?	67
4.4	Can Nondeterministically Selective Sets Be NP-Hard or coNP-Hard?	73
4.5	Bibliographic Notes	75
<b>5.</b>	<b>Closures</b>	<b>79</b>
5.1	Connectives and Reductions	80
5.2	Boolean Closures	81
5.3	Reductions Under Which P-sel Is Closed Downward	85
5.4	Self-Reducible Sets and Selectivity	88
5.5	Reduction and Equivalence Classes	94
5.5.1	Equalities	94
5.5.2	Inequalities	95
5.6	Bibliographic Notes	102
<b>6.</b>	<b>Generalizations and Related Notions</b>	<b>105</b>
6.1	Generalizations of Selectivity	105
6.1.1	Weak Selectivity	105
6.1.2	Multiselectivity: The $S(k)$ Hierarchy	106
6.1.3	Membership Comparable Sets	107
6.1.4	Probabilistic Selector Functions	109
6.2	P-Semi-Rankability: A Provable Refinement of P-Selectivity	110
6.3	Associative P-Selectivity: A Potential Refinement of P-Selectivity	111
6.4	Bibliographic Notes	112
<b>A.</b>	<b>Definitions of Reductions and Complexity Classes, and Notation List</b>	<b>115</b>
A.1	Reductions	115
A.2	Complexity Classes	116
A.3	Some Other Notation	123
	<b>References</b>	<b>125</b>
	<b>Index</b>	<b>133</b>

Theory of Semi-Feasible Algorithms

Hemaspaandra, L.; Torenvliet, L.

2003, X, 150 p., Hardcover

ISBN: 978-3-540-42200-6
