Foreword	V
Acknowledgements	VII
Contents.....	IX
List of Tables.....	XIII
List of Figures	XV
Abbreviations.....	XVII
1 Introduction	1
2 What is Decentralised Generation?	3
3 Outline of Research Methodology.....	5
3.1 The 4-Dimensional Analytical Approach in DECENT	5
3.2 DG Project Stages.....	7
3.2.1 Detailed Characterisation of the Implementation of a DG project	7
3.3 Conceptual Framework.....	15
4 Status Quo and Developments of DG Technology	19
4.1 Renewable Energy Sources	19
4.1.1 Photovoltaics	19
4.1.2 Wind Turbines	22
4.1.3 Hydro power	32
4.1.4 Biomass	35
4.2 Combined Heat and Power (CHP).....	43
4.2.1 Steam Turbines	44
4.2.2 Reciprocating Engines	45
4.2.3 Gas Turbines	46
4.2.4 Combined Cycle Gas Turbines	47
4.2.5 New Small-Scale CHP Technologies	48
4.2.6 Fuel Cell Technology	49

4.3	Future Decentralised Energy Systems 2020	58
4.3.1	Introduction	58
4.3.2	General Remarks	59
4.3.3	General Framework Topics Important for Decentralised Energy Generation in the EU up to 2020	61
4.3.4	Ranking of Topics	62
4.3.5	Environment and Cost of Energy	66
4.3.6	Period of Occurrence	69
4.3.7	Other Comments of Survey Respondents	79
5	Liberalisation and Decentralised Generation in the EU Member States.....	81
5.1	Status of Electricity Market Liberalisation in the EU Member States...	81
5.1.1	The Directive on Liberalisation of the Electricity Market	81
5.1.2	Overview on Member States	84
5.2	Use of Renewables	85
5.2.1	Motivations for RES-support	86
5.2.2	Type of Support	87
5.3	Use of CHP.....	90
5.3.1	CHP Policies	91
5.3.2	CHP Support Schemes in the EU Member States	92
6	Scenarios: Europe's DG Power Generation in the Year 2020.....	97
6.1	Scenario I – Green Power and Nuclear Ecology	100
6.2	Scenario II – Huge Fossils.....	102
6.3	Scenario III – Widespread Economic Niches	103
6.4	Scenario IV – Hip Ecology.....	105
7	Case Study Analysis	107
7.1	Choice of Case Studies	107
7.2	Short Presentation of Case Studies	109
8	Barriers and Success Factors for DG	115
8.1	Characterisation of Actors	115
8.2	Identified Barriers and Success Factors.....	116
8.2.1	Policy/ Institutional Dimension	116
8.2.2	Market/ Financial Dimension	121
8.2.3	Technological Dimension	123
8.2.4	Social and Environmental Dimension	124
9	Policy Implications	127
9.1	Introduction	127
9.2	Authorisations and Permitting.....	130
9.2.1	Construction Permits and Spatial Planning	130
9.2.2	Local Resistance	134

9.2.3	Permitting Problems for Biomass Plants based on wood or waste	136
9.3	Grid Connection	137
9.4	Market Access and Contracting.....	148
9.4.1	Balancing and Settlement Systems	148
9.4.2	Transaction Costs	152
9.4.3	Gas Liberalisation	153
9.5	Financing.....	153
9.5.1	Financing Issues, Barriers and Solutions	154
9.5.2	Support Mechanisms	157
9.6	Operation.....	159
9.6.1	Grid Use Fees	160
9.6.2	Ratio of Gas and Electricity Prices for CHP	165
9.6.3	Biomass Fuel Supply	167
9.7	Barriers and Success Factors not Specific to a Particular Stage	168
9.7.1	Other Benefits of Decentralised Generation	168
9.7.2	Uncertainty on Policy Development	169
9.7.3	Market Power of Utilities	172
9.7.4	Specific Difficulties of Small Independent Power Producers (IPPs)	173
9.7.5	Lack of the Skills Required to Plan and Install a CHP Plant	173
9.8	Policy Implications of the Outlook to 2020.....	175
9.8.1	Scenario I – Green Power and Nuclear Ecology	176
9.8.2	Scenario II – Huge Fossils	176
9.8.3	Scenario III – Widespread Economic Niches	177
9.8.4	Scenario IV – Hip Ecology	177
10	DG and Security of Supply	179
10.1	Introduction	179
10.2	The Dependence of the Energy Supply on Imported Fuels	179
10.3	The Availability of the Required Energy Production Capacity	182
10.4	Evaluation of Decentralised Plants in Relation to Security of Supply.	182
10.4.1	Criteria for Evaluating decentralised plants	182
10.4.2	Substitution of Imported Fuels	183
10.4.3	Reliability	184
10.4.4	Flexibility	184
10.4.5	Economic Attractiveness	185
10.4.6	Financial Risk	186
10.4.7	Vulnerability	188
10.5	Conclusions and Recommendations	188
11	DG and EU Energy Technology R&D Policy.....	191
11.1	Introduction	191
11.2	EU Research and Development Policy.....	192
11.3	Assessment of Non-Nuclear Energy Proposals	193
11.4	Results From the DECENT Futures study.....	195

XII Contents

11.5	The Future of European Energy Research.....	197
11.6	Conclusion.....	198
12	Conclusions and recommendations.....	199
12.1	DG interconnection and system integration	199
12.2	DG authorisations and permitting.....	201
12.3	Financing DG	202
12.4	The impact of DG on the security of supply.....	203
12.5	EU energy technology R&D	204
12.6	Recommendations for further research.....	204
13	References	207
14	Index.....	213
Annex A: Survey questionnaire of the DECENT Futures Study		215
Annex B: Characterisation of Case Studies		219
Annex C: EU energy legislation applicable to DG.....		247

Decentralised Power Generation in the Liberalised EU
Energy Markets

Results from the DECENT Research Project

Jörß, W.; Holst Joergensen, B.; Loeffler, P.; Morthorst,
P.E.; Uytterlinde, M.; van Sambeek, E.; Wehnert, T.

2003, XVII, 259 p., Hardcover
