## Magnetic Resonance Imaging:

A Historical Introduction .....	1
1. MRI and Its Hardware .....	9
1.1 Introduction .....	9
1.1.1 Spin and Magnetization .....	9
1.1.2 Precession: Rotating System of Reference.....	10
1.1.3 Rotation: Excitation by RF Pulses.....	11
1.1.4 Excitation of a Selected Slice: Gradient Field .....	13
1.1.5 Free Induction Decay (FID) .....	15
1.2 Spin Echo .....	16
1.2.1 Determination of Position in the Read-Out Direction .	18
1.2.2 Determination of Position in the Phase-Encode Direction .....	19
1.2.3 Measuring Sequence .....	19
1.2.4 Object Slice: Voxels and Image Pixels .....	20
1.3 System Architecture .....	21
1.3.1 Magnets .....	25
1.3.1.1. Superconducting Magnets .....	27
1.3.1.2. Other Magnet Types.....	29
1.3.2 Deviations from the Homogeneous Magnetic Field ...	32
1.3.3 The Gradient Chain .....	35
1.3.3.1. Gradient Power Supply and Rise Time .....	38
1.3.3.2. Eddy Currents .....	39
1.3.4 The RF Chain .....	41
1.3.4.1. RF Coils .....	42
1.3.4.2. The Receiver.....	48
1.3.5 Physiological Signals.....	51
1.3.6 The Back End .....	53

<b>2. Conventional Imaging Methods</b>	55
2.1 Introduction	55
2.2 The Bloch Equation	55
2.2.1 Precession	58
2.3 Excitation	58
2.3.1 Non-selective Pulse	59
2.3.2 Slice-Selective RF Pulses	59
2.3.3 Other RF Pulses	62
2.3.4 Power Dissipation in an RF Pulse	63
2.4 The Spin-Echo Imaging Sequence	64
2.4.1 The $\vec{k}$ Plane	68
2.4.1.1. Discrete Sampling	69
2.4.1.2. Sampling Point-Spread Function	72
2.4.1.3. Thinking in Terms of $\vec{k}$ Space	72
2.4.2 Contrast in Spin-Echo Sequences	77
2.4.3 Scan Parameters and System Design	77
2.4.3.1. Practical Example	79
2.4.4 Multiple-Slice Acquisition	80
2.4.5 Imaging with Three-Dimensional Encoding	81
2.5 The Field-Echo Imaging Sequence	82
2.6 Artifacts	84
2.6.1 Ghosting	87
2.7 Magnetization Preparation	88
2.7.1 A $T_1$ Preparation Pulse: Inversion Recovery	89
2.7.2 Other Types of Magnetization Preparation	91
<b>3. Imaging Methods with Advanced <math>\vec{k}</math>-Space Trajectories</b>	135
3.1 Introduction	135
3.2 Turbo Spin Echo	137
3.2.1 Profile Order	139
3.2.2 Sources of Artifacts in TSE Images	141
3.3 Echo Planar Imaging	144
3.3.1 Practical Example	146
3.3.2 Artifacts Due to $T_2^*$ Decay and Field Inhomogeneities	147
3.3.2.1. Artifacts Due to $T_2^*$ Decay	148
3.3.2.2. Artifacts Due to Resonance Offset	150
3.3.2.3. Artifacts Due to Gradient Field Properties and Errors	151
3.4 Combination of TSE and EPI: GRASE	154
3.5 Square Spiral Imaging	156
3.6 Joyriding in $\vec{k}$ Space	156
3.6.1 Spiral Imaging	158
3.6.1.1. A Practical Example	160
3.6.1.2. Reconstruction	161
3.6.1.3. Artifacts in Spiral Imaging	163

3.6.2	“Rosette” Trajectory	165
3.6.3	Radial Imaging	165
3.6.4	Some Remarks on the Reconstruction of Exotic Scans	166
3.7	Two-Dimensional Excitation Pulses	167
<b>4.</b>	<b>Steady-State Gradient-Echo Imaging</b>	<b>193</b>
4.1	Introduction	193
4.2	On FIDs and ECHOs	195
4.2.1	Spin Echo	197
4.2.2	“Eight-Ball” Echo	198
4.2.3	Stimulated Echo	199
4.2.4	RF Phase	201
4.2.5	Response to RF Pulses with $\alpha < 90^\circ$	202
4.2.6	Echoes as a Result of Many Excitations	203
4.2.7	ECHO Components and RF Phase Cycling	204
4.2.8	Suppressing the Spatial Variation of the Signal	207
4.2.9	Conclusions of the Qualitative Description	208
4.2.9.1.	N-FFE and $T_2$ -FFE	209
4.2.9.2.	$T_1$ -FFE	209
4.2.9.3.	R-FFE	209
4.3	Mathematical Model	210
4.3.1	Rotation and Precession Matrix	211
4.3.2	Relaxation Matrix	212
4.4	Steady State	212
4.5	Steady-State Gradient-Echo Methods (FE and FFE)	219
4.5.1	Sequences with Very Long TR	219
4.5.2	Sequences with $T_1 > \text{TR} > T_2$	220
4.5.3	Sequences with Small TR ( $\text{TR} \cong T_2$ )	220
4.5.3.1.	Large Net-Gradient Surface	220
4.5.3.2.	Rephased FFE	224
4.5.3.3.	FID Measurement with Spoiling of $M_T^-$ : $T_1$ -FFE (FLASH)	227
4.5.4	FFE with Short TR in Steady State	228
4.5.4.1.	N-FFE, $T_2$ -FFE, and R-FFE with $\text{TR} \ll T_2$	229
4.5.4.2.	$T_1$ -FFE with $\text{TR} \ll T_2$	231
4.5.5	Slice Profile	232
4.6	Survey of FFE methods	233
<b>5.</b>	<b>Transient-State Gradient-Echo Imaging</b>	<b>247</b>
5.1	Introduction	247
5.2	Signal Level During Transient State	249
5.2.1	Approach to Steady State by Assuming RF Spoiling	250
5.2.2	Approach to Steady State Without Spoiling	252
5.3	Magnetization Preparation	255
5.3.1	Pre-pulse to Avoid the Transient State in $T_1$ -FFE	256
5.3.2	Balanced-TFE Sequences	257

5.4	Profile Order	258
5.5	Survey of Transient Gradient Echo Methods	259
<b>6.</b>	<b>Contrast and Signal-to-Noise Ratio</b>	<b>271</b>
6.1	Introduction	271
6.2	Contrast in MR Images	271
6.3	The Physical Mechanism of Relaxation in Tissue	273
6.3.1	The BPP Theory of Relaxation in Homogeneous Matter	274
6.3.2	Relaxation Effects in Tissue	276
6.3.2.1	Fast Exchange	276
6.3.2.2	Compartments and Slow Exchange	276
6.3.3	Magnetization Transfer	277
6.3.4	Contrast Agents	281
6.4	Signal-to-Noise Ratio (SNR)	283
6.4.1	Fundamental Expression for the SNR	284
6.4.2	Patient Loading of the Receiving Circuit	285
6.4.3	Low-Field and High-Field Systems	287
6.5	Practical Expression for the SNR	288
6.5.1	Introduction of the Scanning Parameters	289
6.5.2	Influence of the Receiver on the SNR	290
6.5.3	Influence of Relaxation on the SNR	291
6.6	Application to Practical Situations	292
6.7	SNR for Non-uniform Sampling of the $\vec{k}$ Plane	296
6.7.1	One-Sided Partial Scans	296
6.7.2	Non-uniform Sampling with Non-linear Trajectories	299
6.7.3	Reduced Matrix Acquisition	299
6.7.4	Other Partial-Scan Methods	300
<b>7.</b>	<b>Motion and Flow</b>	<b>321</b>
7.1	Introduction	321
7.2	Moving Structures, Artifacts, and Imaging Methods	322
7.2.1	Cardiac Motion	322
7.2.2	Respiratory Motion	324
7.2.2.1	Ordering of Phase Encoding	324
7.2.2.2	Breath Hold	325
7.2.2.3	Respiratory Gating	325
7.2.2.4	Correction of Respiratory Movement Using Navigator Echoes	325
7.2.3	Tagging	327
7.3	Phase Shift Due to Flow in Gradient Fields	328
7.3.1	Velocity Measurement Using a Bipolar Gradient	330
7.3.2	Velocity-Insensitive Gradient Waveform	332
7.3.3	Flow with Acceleration	332
7.3.4	Influence of Field Inhomogeneities and Eddy Currents	334

7.4	Flow Artifacts .....	335
7.4.1	Ghosting Due to Pulsating Flow.....	335
7.4.2	Flow Voids .....	335
7.4.3	Shift in Phase-Encoding Direction Due to Flow .....	336
7.4.4	Velocity-Insensitive Imaging Sequences:	
	Flow Compensation .....	337
	7.4.4.1. Selection Direction .....	337
	7.4.4.2. Read-Out Direction.....	337
	7.4.4.3. Phase-Encoding Direction: Correction for Misregistration.....	338
7.5	Flow Imaging .....	339
7.5.1	Phase-Contrast Methods .....	340
	7.5.1.1. Phase-Contrast Angiography .....	341
	7.5.1.2. Quantitative Flow Based on Phase Contrast ..	341
7.5.2	Modulus Contrast Methods.....	344
	7.5.2.1. Inflow Angiography .....	344
	7.5.2.2. Contrast-Enhanced MR Angiography .....	346
	7.5.2.3. MR Angiography Based on Magnetization Preparation.....	349
	7.5.2.4. Black-Blood Angiography .....	354
	7.5.2.5. Artifacts in Modulus Contrast Angiography ...	355
	7.5.2.6. Modulus-Contrast Quantitative Flow Measurements .....	357
7.6	Perfusion .....	358
7.6.1	MR Perfusion Imaging with Dynamic Bolus Studies ..	358
7.6.2	Arterial Spin Labelling .....	361
7.7	Diffusion .....	364
7.7.1	Measurement with Diffusion Sensitization in One Direction .....	366
7.7.2	Diffusion Imaging of the Brain .....	368
7.7.3	Q-space Imaging .....	371
<b>8.</b>	<b>Partitioning of the Magnetization into Configurations ....</b>	<b>423</b>
8.1	Introduction .....	423
8.1.1	Configurations and Phase Diagrams .....	423
8.2	Theory of Configurations .....	429
8.2.1	Magnetization Expressed in Discrete Fourier Series ...	430
8.2.2	Rotation .....	431
8.2.3	Effect of Rotation and Precession on the Configurations .....	434
	8.2.3.1. Precession Matrix Including (Free) Diffusion ..	436
8.2.4	Use of the Theory of Configurations to Describe the Examples in Sect. 8.1 .....	437
	8.2.4.1. Multiple Spin-Echo Example .....	438
	8.2.4.2. Eight-Ball Echo and Stimulated Echo Examples .....	440

## XVIII Contents

8.3	Multi-excitation Pulse Sequences .....	441
8.3.1	SE-BURST Imaging .....	443
8.3.1.1.	Excitation Profile for BURST with Single-Phase Excitation.....	446
8.3.1.2.	Optimized BURST Excitation Using Phase Modulation .....	448
8.3.1.3.	Combination of BURST with TSE.....	451
8.3.1.4.	Gradient Recalled BURST Sequences .....	452
8.3.1.5.	QUEST and PREVIEW.....	454
8.4	Theory of Configurations and Well-Known Fast-Imaging Sequences .....	455
8.4.1	Application to TSE.....	455
8.4.2	Application to FFE.....	458
8.5	Rotation and Precession Matrices and RF Pulse Design .....	462
8.5.1	Shinnar–Le Roux (SLR) Transformation .....	463
8.5.1.1.	The Inverse Shinnar–Le Roux Transformation (ISLR Transformation) .....	465
<b>Appendix</b> .....		473
<b>References</b> .....		477
<b>Index of Abbreviated Terms</b> .....		493
<b>Index</b> .....		495

Magnetic Resonance Imaging

Theory and Practice

Vlaardingerbroek, M.T.; Boer, J.A.

2003, XXI, 500 p., Hardcover
