

## Table of Contents

### I Proteins and Macromolecules - Biophysical Aspects

Pressure- and Temperature-induced Phenomena in Proteins <i>K. Heremans</i>	3
High Pressure NMR Spectroscopy Characterizes Higher Energy Conformers of Proteins <i>K. Akasaka</i>	9
High Pressure Raman Spectroscopic and RISM Theoretical Studies of Conformational Equilibria of <i>N</i> -Acetyl-L-Glycine- <i>N'</i> -Methylamide <i>T. Takekiyo, T. Imai, M. Kato and Y. Taniguchi</i>	15
High Pressure as Tool to Study Structural Properties of Thiolate Heme Proteins <i>C. Jung, B. Canny and J.C. Chervin</i>	19
Essential Differences between the Core and Peripheral Antenna Excitons in Photosynthetic Purple Bacteria Revealed by High-Pressure Spectroscopy <i>A. Freiberg, A. Ellervee, A. Löhmus, R. Löhmus, K. Timpmann and G. Trinkunas</i>	25
Pressure-induced Unfolding of Myoglobin: Neutron Diffraction and Dynamic Scattering Experiments <i>W. Doster, R. Gebhardt and A.K. Soper</i>	29
Pressure-induced Critical Association of Myoglobin <i>R. Gebhardt, W. Doster, J. Friedrich, W. Petry and A. Schulte</i>	33
Fluorescence Spectroscopy of <i>N</i> -acetyl-L-tryptophan-amide and Proteins under High Pressure: Effects of Pressure, Temperature, and Organic Additives <i>M. Kato, T. Maki and R. Hayashi</i>	37
Conformational Fluctuations of Hen Lysozyme Investigated by High Pressure NMR Spectroscopy <i>Y. O. Kamatari, T. N. Niraula, H. Yamada, C. M. Dobson, L. J. Smith, S. Yokoyama, and K. Akasaka</i>	43

## II Protein Unfolding and Reaction

Pressure-driven Cold Denaturation of Proteins and Structure Formation of Water-soluble Polymers <i>S. Kunugi and N. Tanaka</i>	49
Exploring the Energy Landscape of Protein Unfolding under High Pressure <i>R. Lange, J. Torrent, S. Marchal, M. Vilanova, P. Fusi and C. Balny</i>	55
Double-mutant Thermodynamic Cycles under High Hydrostatic Pressure <i>P. Masson</i>	61
Pressure Unfolded States of Ribonuclease A under Native and Reducing Conditions have Identical Conformations <i>F. Meersman and K. Heremans</i>	69
Hydrostatic Pressure Effects on the Stability of Ataxin-3 <i>S. Marchal, E. Shehi, P. Fusi, P. Tortora and R. Lange</i>	73
Insulin and Polylysine as Model Polypeptides for FTIR Studies of the Pressure-effect on Protein Aggregation <i>W. Dzwolak, M. Kato, S. Porowski and Y. Taniguchi</i>	79
Kinetic Behaviour of <i>Sulfolobus Solfataricus</i> Carboxypeptidase towards Several Substrates Highlights the Effects of Pressure and Temperature on Non-covalent Interactions <i>P. Tortora, B. Gambirasio, N. Bec, E. Occhipinti and R. Lange</i>	83
The Structural Basis for Functionality and Stability of Hydrophobic Core in RNase A as Probed by the Application of High Pressure <i>E. Chatani, T. Kadonosono and R. Hayashi</i>	87
Folding and Unfolding Behavior of Carboxypeptidase Y Inhibitor (I <sup>C</sup> ) Induced by Temperature and Pressure <i>J. Mima, Y. Sato, M. Kato and R. Hayashi</i>	95
High Pressure NMR Spectroscopy and its Application to the Cold Shock Protein TmCsp Derived from the Hyperthermophilic Bacterium <i>Thermotoga maritima</i> <i>W. Kremer, M.R. Arnold, E. Brunner, B. Schuler, R. Jaenicke and H.R. Kalbitzer</i>	101
Influence of High Pressure on the Secondary Structure of Poly-L-Lysine <i>H. Plangger, M. Scheibenzuber, G. Blümelhuber and R. Meyer-Pittroff</i>	113

Temperature- and Pressure-induced Unfolding of $\alpha$ -Chymotrypsin <i>Z. Sun and R. Winter</i>	117
--	-----

Pressure Effects on Ligand Binding Kinetics and the Heme Environment in Myoglobin <i>A. Schulte and O. Galkin</i>	121
---	-----

### III Proteins and High Pressure Enzymology

Revisiting some Observations Related to the High Pressure Action on Enzyme Reactions <i>M.J. Kornblatt, J.A. Kornblatt and C. Balny</i>	127
---	-----

Pressure as a Tool in the Comparative Studies of Fluorescent Proteins <i>S.A. Smirnov, A.E. Pozhitkov, N.L. Klyachko, P.A. Levashov, V.V. Verkhusha, A.V. Levashov, J.-W. Borst, A. van Hoek and A.J.W.G. Visser</i>	133
---	-----

### IV Protein Misfolding and Aggregation

Interprotein Interactions Perturbed by Pressure. High Pressure Studies on Aggregations of Medical Impact <i>L. Smeller, F. Meersman, J. Fidy and K. Heremans</i>	141
--	-----

Temperature/Pressure Study of Insulin Fibrillogenesis <i>C. Dirix, I. Esters, F. Meersman and K. Heremans</i>	147
--	-----

A High-pressure Approach to Examine Novel Prion Conformational Changes <i>J. Torrent, M.T. Alvarez-Martinez, F. Heitz, J.-P. Liautard, C. Balny and R. Lange</i>	151
--	-----

High Pressure Enhances the Chaperone Activity of the Oligomeric Protein Alpha-Crystallin <i>C. Böde, F. Tölgyesi, L. Smeller, K. Heremans and J. Fidy</i>	155
---	-----

## V Protein Crystallography

New Trends in Macromolecular Crystallography at High Hydrostatic Pressure <i>R. Fourme, I. Ascone, R. Kahn, E. Girard, M. Mezouar, T. Lin and J.E. Johnson</i>	161
Effects of Pressure on the Growth Kinetics of Orthorhombic Lysozyme Crystals <i>Y. Suzuki, H. Suto, T. Sawada and K. Tamura</i>	171
Effect of Pressure on the Crystallization of Proteins <i>A. Kadri, C. Charron, M.C. Robert, B. Capelle, G. Jenner, R. Giegé and B. Lorber</i>	175

## VI Nucleic Acids

Towards an Understanding of the Mechanism of the Aminoacylation Reaction at High Pressure <i>M. Giel-Pietraszuk, P. Salański, J. Jurczak and J. Barciszewski</i>	181
---	-----

## VII Membranes and Lipid Mesophases

Pressure Effects on Columnar Lyotropics: X-ray Diffraction Investigation on d(GMP) and GMP <i>P. Ausili, M. Pisani, C. Ferrero, S. Finet and P. Mariani</i>	189
Effects of <i>Cis</i> and <i>Trans</i> Unsaturation on the Barotropic and Thermotropic Phase Behavior of Phospholipid Bilayers <i>S. Kaneshina, H. Matsuki, M. Kusube and H. Ichimori</i>	195
Barotropic and Thermotropic Phase Behavior of Bilayer Membranes Composed of Phospholipids Containing <i>Cis</i> Double Bond in the <i>sn</i> -2 Acyl Chain <i>H. Matsuki, M. Kusube, T. Hata and S. Kaneshina</i>	199
Effects of Gas Pressure on the Phase Transition Temperature of Liposomal Bilayer Membranes <i>K. Tamura, T. Matsumoto and Y. Suzuki</i>	203

High-Pressure Stopped-Flow Studies to Characterize Transient Conformational Transitions of a Membrane Enzyme: Na, K-ATPase <i>E. Grell, C. Saudan, P. Bugnon, E. Lewitzki and A.E. Merbach</i>	207
Inhibition of Na <sup>+</sup> , K <sup>+</sup> -ATPase by Hydrostatic Pressure <i>S. Janosch, E. Kinne-Saffran, R.K.H. Kinne and R. Winter</i>	215
Hydrostatic Pressure as a Tool to Study F-type ATPsynthases <i>M.O. Souza, T.B. Creczynski-Pasa, H.M. Scofano, P. Gräber and J.A. Mignaco</i>	221
Volume Changes During the Proton Transfer Reactions of Bacteriorhodopsin <i>B. U. Klink, R. Winter, M. Engelhard and I. Chizhov</i>	227
Barotropic Behaviour of Monoolein Cubic Mesophases Embedding Cytochrome c <i>J. Lendermann and R. Winter</i>	231
The Role of Matrix Structure in Pressure Regulation of Enzymes Encapsulated in Ternary Surfactant-Water Organic Solvent Systems <i>N. Klyachko, R. Köhling, J. Woenckhaus, A.K. Kazarov, S. A. Smirnov, A.V. Levashov and R. Winter</i>	235
Activation of Na <sup>+</sup> and L-type Ca <sup>2+</sup> Currents in Muscle is More Susceptible to Prolonged High Pressure Treatments than Voltage-dependent Inactivation <i>O. Friedrich, K.R. Kress, H. Ludwig and R.H.A. Fink</i>	241

## VIII Microbiology

High Pressure Response of Lactic Acid Bacteria <i>R.F. Vogel, M.A. Ehrmann, M.G. Gänzle, C. Kato, M. Korakli, C.H. Scheyhing, A. Molina-Gutierrez, H.M. Ulmer, R. Winter</i>	249
Baroprotective Effect of Sucrose and NaCl on <i>Lactococcus lactis</i> <i>A. Molina-Gutierrez, M.G. Gänzle and R.F. Vogel</i>	255
Effects of High Pressure on Bacteria and Fungi <i>H. Ludwig</i>	259
The Influence of the Rate of Pressurizing on the Inactivation of <i>Bacillus Subtilis</i> Var. <i>Niger</i> Spores <i>A. Urzica, C. Hölters and H. Ludwig</i>	267

## XII Table of Contents

The Role of Tryptophan Permease Tat2 in Cell Growth of Yeast under High-Pressure Condition <i>F. Abe</i>	271
Low Pressure Shock Response of Yeast <i>H. Iwahashi, E. Ishidou, M. Odani, T. Homma and S. Oka</i>	275
Effects of High Pressure and Heat on Muscle Fiber and Connective Tissue of Bovine Skeletal Muscle <i>Rusman, T. Nishium and A. Suzuki</i>	279
High Hydrostatic Pressure (HHP) Inactivation of Five Pharmacopoeia Strains Including Spores of <i>Bacillus Subtilis</i> <i>Y. Rigaldie, A. Largeteau, G. Lemagnen, L. Grislain and G. Demazeau</i>	283
Preliminary Molecular Analysis of an High-Pressure-Modified Type of <i>Bacillus Thuringiensis</i> Ssp. <i>Israelensis</i> , DNA- and Protein-studies. <i>I. Sorokine-Durm, K. Werner, M. Schauer and H. Ludwig</i>	287

## IX Biomedical Applications

High Pressure Applications in Medicine <i>R. Meyer-Pittroff</i>	295
High Pressure Treatment of Human Bonetissue - First Investigations about Mechanics and Biology <i>G. Blümelhuber, P. Diehl, S. Fischer, B. Frey, M. Hadaller, S. van Laak, W. Mittelmeier, M. Schmitt, C. Weiss and R. Meyer-Pittroff</i>	307
Apoptosis and Necrosis of Mammalian Cells after High Pressure Treatment - Prospects for a Tumor Vaccine <i>G. Blümelhuber, S. Fischer, U.S. Gaipf, M. Herrmann, J.R. Kalden, R.E. Voll and R. Meyer-Pittroff</i>	311
Decontamination and Sterilization of Sensitive Drugs using High Hydrostatic Pressure (HHP) <i>Y. Rigaldie, A. Largeteau, G. Lemagnen, L. Grislain and G. Demazeau</i>	315
Mechanism of Inactivation of HIV-1 by the Freeze Pressure Generation Method (FPGM) <i>T. Otake, T. Kawahata, H. Mori, Y. Kojima, I. Oishi and K. Hayakawa</i>	321

## **X Food Science - Chemical and Technological Aspects**

High Pressure - Low Temperature Processing of Foods: A Review <i>J.C. Cheftel, M. Thiebaud and E. Dumay</i>	327
Influence of High Hydrostatic Pressure on the Formation of Non-enzymatic Browning Products Formed in Maillard-type Reactions <i>I. Heberle, P. Schieberle and T. Hofmann</i>	341
Influence of High Hydrostatic Pressure on the Formation of Key Maillard-type Flavour Compounds from D-glucose and L-proline <i>F. Deters, T. Hofmann and P. Schieberle</i>	347
Comparison of Structural Cell Membrane Changes Induced by Different High Pressure Processes at Low Temperatures <i>C. Luscher, O. Schlüter, A. Angersbach and D. Knorr</i>	351
Effects of High-pressure Gas on the Growth Thermograms of Yeast <i>T. Arao, Y. Muramoto, Y. Suzuki and K. Tamura</i>	355
The Influence of High Pressure Treated $\beta$ -Glucan-gel on the Filterability of Beer <i>S. Fischer and R. Meyer-Pittroff</i>	359
Influence of High Pressure Treatment on the Allergenicity of Foods <i>M. Scheibenzuber, V. Grimm, G. Blümelhuber, H. Behrendt, J. Ring and R. Meyer-Pittroff</i>	363
Sterilization by High Hydrostatic Pressure: Increasing Efficiency and Product Quality by Improved Temperature Control <i>W.B.C. de Heij, L.J.M.M. Van Schepdael, R. Moezelaar and R.W. van den Berg</i>	367
High Pressure Freezing Effects on Vegetables <i>A. Largeteau, Y. Lambert, G. Demazeau, N. Moussaoui and J.M. Bouvier</i>	371
Stabilization of <i>Agaricus Bisporus</i> Mushrooms by Combined Action of High Pressure and Heat <i>C. Verret, P. Ballestra, L. Jacquet and A. El Moueffak</i>	375
Effect of High-Pressure on the Denaturation of Meat and Lupin Proteins as Assessed by DSC <i>N. Chapleau, S. Delépine, M.H. Rannou and M. de Lamballerie-Anton</i>	379

# XIV Table of Contents

Transcriptome Profile and Cluster Analysis of <i>Saccharomyces Cerevisiae</i> under Hydrostatic Pressure Conditions <i>T. Homma, Y. Momose, E. Ishidou, M. Odani, H. Shimizu, S. Oka and H. Iwahashi</i>	385
High Pressure Inactivation of Yeast and Spheroplasts at Subzero Temperature <i>J.-M. Perrier-Cornet, S. Tapin and P. Gervais</i>	389
Transitiometric <i>In Situ</i> Measurements of Pressure Effects on the Phase Transitions During Starch Gelatinization <i>M. Orlowska, S.L. Randzio and J.-P.E. Grolier</i>	395
Effect of High Pressures on Enzymatic System of Mesophilic Starters Used for Cheesemaking <i>M. Krasowska, A. Reys, A. Jankowska and M. Bielecka</i>	399
Stabilisation of Strawberry Puree Treated by High Pressure During Storage <i>M. Navarro, C. Verret, P. Pardon and A. El Moueffak</i>	403
Determination of the Activation Parameters of the Early Steps of Greening in Dark-grown Wheat Leaf Homogenates by High Pressure Fluorescence Spectroscopy <i>L. Smeller, K. Solymosi, B. Böddi and J. Fidy</i>	407
Biological Sample Preparation System Using Pressure Cycling Technology (PCT) <i>F. Tao, N.P. Lawrence, W.W. Miller, C. Li, P. Tuzmen, J. Behnke, B. Nakhai, A. Kakita, T. Christian, D. Reed, M.M. Manak and R.T. Schumacher</i>	413
Sterilization of Fruit Juice by High Pressure CO <sub>2</sub> <i>T. Parton, E. Rocchi, S. Spilimbergo, N. Elvassore and A. Bertucco</i>	419
Freezing Kinetics Due to Ice III Formation in Potato Tissue <i>O. Schlüter, V. Heinz and D. Knorr</i>	425
Effect of Ultra High Pressure Under Argon and Temperature on the Volatiles and Piperine Content and Microbiological Quality of Black Pepper ( <i>Piper Nigrum</i> L.) <i>S. Skapska, B. Windyga, E. Kostrzewa, Z. Jendrzeczak, K. Karłowski, M. Fonberg-Broczek, H. Ścieżyńska, A. Grochowska, K. Górecka, S. Porowski, A. Morawski, J. Arabas and S. Szczepek</i>	431
High Pressure Pasteurisation and Sterilisation of Tomato Puree <i>A. M. Matser, B. Krebbers, S.W. Hoogerwerf, R. Moezelaar and R.W. van den Berg</i>	437

High Pressure Calorimetry as a Tool to Monitor Phase Transitions in Foods: Application to Water and Selected Lipids <i>M. Hayert, A. Le Bail, M.H. Rigenbach and E. Gruss</i>	441
A Novel High Pressure Technology for the Production of Margarine <i>Y. Nosho, S. Hashimoto, M. Kato and K. Suzuki</i>	447
On the Influence of High Pressure on Edible Oils <i>S.V Kapranov., M. Pehl, Chr. Hartmann, A. Baars and A. Delgado</i>	453
Pressure Treatment of Food: Instantaneous but not Homogeneous Effect <i>A. Delgado and Chr. Hartmann</i>	459
Modelling and Numerical Simulation of Pressure Induced Phase Changes of a Fluid Food System <i>W. Kowalczyk, Chr. Hartmann and A. Delgado</i>	465
High Pressure Differential Scanning Calorimetry of Proteins: Attenuation of Peak. <i>K. Obuchi</i>	473
Pressure Perturbation Calorimetry <i>H. Heerklotz, R. Winter, C. Royer and J. Seelig</i>	477
On the Calculation of the Compressibility from Ultrasonic Velocity <i>H. Pfeiffer and K. Heremans</i>	481
An Internet-based Possibility for Exchange of Informations between High Pressure Researchers - The Ultra High Pressure Webproject <i>G. Blümelhuber, S. Fischer and R. Meyer-Pittroff</i>	485
Author Index	487

Advances in High Pressure Bioscience and  
Biotechnology II  
Proceedings of the 2nd International Conference on  
High Pressure Bioscience and Biotechnology,  
Dortmund, September 16-19, 2002  
Winter, R. (Ed.)  
2003, XV, 490 p., Hardcover  
ISBN: 978-3-540-00977-1
