# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Types of Differential Scanning Calorimeters and Modes of Operation</b>	<b>9</b>
2.1	Heat Flux DSC	10
2.1.1	Heat Flux DSC with Disk-Type Measuring System	10
2.1.2	Heat Flux DSC with Turret-Type Measuring System	13
2.1.3	Heat Flux DSC with Cylinder-Type Measuring System	14
2.2	Power Compensation DSC	17
2.2.1	Function Principle	17
2.2.2	Special Power Compensating DSC	22
2.3	DSC with Combined Heat Flux and Power Compensation Measuring System	25
2.4	Modes of Operation	25
2.4.1	Constant Heating Rate	26
2.4.2	Variable Heating Rate (Modulated Temperature)	27
<b>3</b>	<b>Theoretical Fundamentals of Differential Scanning Calorimeters</b>	<b>31</b>
3.1	Heat Flux DSC	31
3.2	Power Compensation DSC	48
3.3	Temperature-Modulated DSC (TMDSC)	50
3.3.1	The Temperature-Modulated Method	51
3.3.2	Influences of the Sample	52
3.3.3	Influences of Heat Transport	57
3.3.4	Conclusions	63
<b>4</b>	<b>Calibration of Differential Scanning Calorimeters</b>	<b>65</b>
4.1	Aspects of Quality Assurance	66
4.2	Basic Aspects of Calibration	66
4.3	Temperature Calibration	69
4.3.1	Temperature Calibration on Heating	69
4.3.2	Temperature Calibration on Cooling	84
4.4	Caloric Calibration	86
4.4.1	Heat Flow Rate Calibration	87
4.4.2	Heat (Peak Area) Calibration	90
4.4.3	Examples of Caloric Calibration	92
4.4.4	Caloric Calibration in Cooling Mode	97

4.5	Conclusions Regarding the Calibration of DSCs	97
4.6	Reference Materials for DSC Calibration	98
4.6.1	Reference Materials for Temperature Calibration	99
4.6.2	Reference Materials for Heat Flow Rate Calibration	101
4.6.3	Reference Materials for Heat (Peak Area) Calibration	107
4.7	Additional Calibration in Temperature-Modulated Mode of Operation	107
4.7.1	Calibration of Magnitude	113
4.7.2	Calibration of Phase	113
<b>5</b>	<b>DSC Curves and Further Evaluation</b>	<b>115</b>
5.1	Characteristic Terms of DSC Curves	116
5.2	Parameters Influencing the DSC Curve	118
5.3	Further Evaluation of DSC Curves	119
5.3.1	Determination of the Real Sample Heat Flow Rate	119
5.3.2	The Baseline and the Determination of Peak Areas (Enthalpy Differences)	121
5.4	Desmearing of the DSC Curve	126
5.4.1	Correction of the Temperature and Heat Flow Rate Indicated	128
5.4.2	Subtraction of the Zeroline	129
5.4.3	Calculation of the True Heat Flow Rate into the Sample	129
5.4.4	Advanced Desmearing	133
5.4.5	Further Calculations	140
5.5	TMDSC Curves	140
5.5.1	Reversing and Non-Reversing Heat Capacity	141
5.5.2	Complex Heat Capacity	143
5.5.3	Curves from Step-Scan Evaluation	145
5.6	Interpretation and Presentation of Results	145
<b>6</b>	<b>Applications of Differential Scanning Calorimetry</b>	<b>147</b>
6.1	Measurement of the Heat Capacity	147
6.1.1	“Classical” Three-Step Procedure	148
6.1.2	The “Absolute” Dual Step Method	153
6.1.3	General Precautions for the Minimization of Errors and their Estimation	154
6.1.4	Procedure of Small Temperature Steps	155
6.1.5	The Temperature-Modulated Method	159
6.1.6	Typical Applications of Heat Capacity Measurements	160
6.2	Determination of Heats of Reaction	162
6.3	Kinetic Investigations	168
6.3.1	Introduction and Definitions	168
6.3.2	Experimental Prerequisites for a Reliable Kinetic Analysis	173
6.3.3	Selection of the Measuring Conditions – Isothermal or Non-Isothermal Reaction Mode	175
6.3.4	Activation of the Sample by UV Irradiation	180
6.3.5	Different Strategies of Kinetic Evaluation	183
6.3.6	Selected Examples and Possible Predictions	189

6.4	The Glass Transition Process . . . . .	200
6.4.1	The Phenomenology of the Glass Transition . . . . .	200
6.4.2	The Nature of the Glass Transition and Consequences for DSC Measurements . . . . .	201
6.4.3	Definition and Determination of the Glass Transition Temperature $T_g$ . . . . .	203
6.4.4	Applications of Glass Transition Measurements . . . . .	212
6.4.5	The Dynamic Glass Process, an Example . . . . .	217
6.5	Characterization of Substances, the Phase Behavior . . . . .	219
6.5.1	Applications in Biology and Food Science . . . . .	219
6.5.2	Applications in Pharmacy . . . . .	221
6.5.3	Other Applications . . . . .	224
6.5.4	Porosity Measurements . . . . .	228
6.6	Determination of Phase Diagrams . . . . .	230
6.7	Safety Aspects and Characterization of High-Energetic Materials . .	232
6.8	Characterization of Polymers . . . . .	233
6.8.1	Effects of Origin and Thermal History . . . . .	234
6.8.2	Determination of the Degree of Crystallinity . . . . .	236
6.8.3	Advanced Characterization with the TMDSC Method . . . . .	238
6.9	Purity Determination of Chemicals . . . . .	241
7	<b>Evaluation of the Performance of a Differential Scanning Calorimeter</b> . . . . .	245
7.1	Characterization of the Complete Instrument . . . . .	245
7.2	Characterization of the Measuring System . . . . .	245
7.3	Characterization of the Results of a Measurement: Uncertainty Determination . . . . .	251
7.3.1	Black Box Method . . . . .	253
7.3.2	GUM Method . . . . .	253
7.4	Check List for DSCs . . . . .	257
	<b>Appendix 1</b> . . . . .	259
	<b>Appendix 2</b> . . . . .	263
	<b>References</b> . . . . .	281
	<b>Subject Index</b> . . . . .	291
