1	Science in the Post Modern World	
	<i>Peter S. Belton</i>	1
1.1	Introduction	1
1.2	Food Science	1
1.3	Communicating Science	3
1.4	Science as Advocacy, or not	6
1.5	Words, Words, Words	8
1.6	Science and Reality	10
1.7	Science and Risk	13
1.8	Conclusions	16
2	Food and Culture	
	<i>Anne Murcott</i>	21
2.1	Introduction	21
2.2	Food and Culture: Disciplines and Definitions	24
2.3	Food and Culture: Cooking, Classifying and Being Human	28
2.4	Food, the Body and the Senses: Cultural Shapings of the Natural	31
2.5	Food and Cultural Conceptions of the Natural Body	31
2.6	Food and the Cultural Shaping of Taste	33
2.7	Food and Culture: Conceptions and Significance of Meals	34
2.8	Food and Culture: Nationality, Ethnicity and Identity	38
2.9	Food, Social Hierarchy and Class Cultures	43
2.10	Concluding Remarks	48
3	Science, Society and Public Confidence in Food Risk Management	
	<i>Lynn Frewer</i>	55
3.1	Introduction	55
3.2	An Historic Perspective on Risk Perception	56
3.3	Risk Perception and Communication	57

3.4	Institutional Denial of Uncertainty	61
3.5	Public Characterisation of Food Risk Uncertainty	64
3.6	What Drives Food Choices – Perceptions of Risk or Benefit? . .	65
3.7	Conclusions	67

4 Food Risks, Public Policy and the Mass Media

	<i>Jacquie Reilly</i>	71
4.1	Introduction	71
4.2	The Media as a ‘Black Box’	72
4.3	How Risk Assessments are Made	74
4.4	Motivation to Assess Risk	74
4.5	Frameworks	74
4.6	Sources	75
4.7	Judgements about Risks	75
4.8	Professional Assessment Versus Personal Reactions	76
4.9	The Motivation to Make Policy	76
4.10	Channels of Communication	76
4.11	The Presentation of ‘Expert’ Assessments	77
4.12	The Policy Response	77
4.13	Journalists’ Training	79
4.14	News Values, ‘Fresh News’ and Policy Announcements	79
4.15	‘Human Interest’	80
4.16	Media Templates	80
4.17	‘Public Opinion’	83
4.18	The Nature of the Assessments	83
4.19	Story Initiation, Timing and Source Resources	83
4.20	Pressures not to Talk to the Media	84
4.21	Source Credibility	84
4.22	Media Influence on Research, Funding and Policy Priorities . .	85
4.23	The Media as a Risk Factor	85
4.24	Lobbying	85
4.25	The Public as Voters/Consumers	86
4.26	Conclusion	87

5 Exploring Attitudes to Eating Fruit and Vegetables

	<i>Teresa Belton</i>	91
5.1	Introduction	91
5.2	Factors Recognised as Influencing Fruit and Vegetable Consumption	92
5.2.1	Poverty	92

5.2.1.1	Low Income	92
5.2.1.2	Inadequate Access to Supplies of Fruit and Vegetables	94
5.2.1.3	Positive Developments With Regard to ‘Food Poverty’	96
5.2.2	Health Education	97
5.2.2.1	The Valuing of Health and a Healthy Diet	97
5.2.2.2	The Relationship Between Health Education and Behaviour	98
5.2.2.3	Inconsistency Between Knowledge and Perception	100
5.2.2.4	Why Advice on Diet can Never Hope to Reach Everyone	101
5.2.3	Food Culture	102
5.2.3.1	Between and Within Societies	102
5.2.3.2	Public Food	103
5.2.3.3	Advertising	105
5.2.3.4	Snacking	106
5.2.4	Personal Taste	106
5.2.5	Summary of Section One	108
5.3	A New Study	109
5.4	The Role of Psycho-social Health in Influencing Fruit and Vegetable Consumption	115
5.4.1	The Significance of Social Class	117
5.4.2	Social Upheaval and the Need for Comfort and Convenience	119
5.5	Summary and Conclusions	121

6 Novel Foods: The Changing Regulatory Response

	<i>Derek Burke</i>	127
6.1	Introduction	127
6.2	The Situation in the United Kingdom	128
6.3	The Changing Climate for Regulation	131
6.4	A Case Study – An Early Set Back, and the Committee’s Response	132
6.5	The Case of the Transgenic Sheep: an Early Ethical Dilemma	133
6.6	Antibiotic Resistance Genes	135
6.7	Genetically Modified Soya	136
6.8	So why are Consumers so Concerned?	137
6.9	Current Developments	139

7 Communication Between Scientists and Rural Communities in Zimbabwe

	<i>Trust Beta</i>	143
7.1	Introduction	143
7.2	Scientific Objectives	145

7.3	Methodology	145
7.3.1	Getting Started	145
7.3.2	Dress	146
7.3.3	Participatory Method	146
7.3.4	Laboratory Studies	147
7.4	Results and Discussion	147
7.5	Application of Scientific Knowledge and Difficulties Encountered	149
7.6	Communicating Scientific Knowledge	150
8	Interactive Drama and Scientific Issues	
	<i>Malcolm Seddon</i>	153
8.1	Introduction	153
8.2	Development	154
8.3	Presentation	163
8.4	Discussion Sessions	164
8.5	Audiences	168
8.6	Overview	168
8.7	Other Similar Enterprises	169
8.8	Conclusion	170
	Dr. Rainer Wild-Stiftung – Holistic Approach to a Healthy Diet	171
	About the Authors	173
	Subject Index	177

Food, Science and Society

Exploring the Gap Between Expert Advice and Individual
Behaviour

Belton, P.S.; Belton, T. (Eds.)

2003, XII, 184 p., Hardcover

ISBN: 978-3-540-43743-7
