Prediction and Statistical Analysis of Alternatively Spliced Exons

T.A. Thanaraj and S. Stamm

1	Overview	1
2	Mechanism of Splicing	2
2.1	General Splicing Mechanism	2
2.2	Exon Definition	2
2.3	Splice-Site Recognition Is Influenced by the Relative Concentration of Regulatory Proteins	3
3	Properties of Alternative Spliced Exons	5
3.1	Several Types of Splicing	5
3.2	Types of Exons	6
3.3	Regulatory Elements	7
3.3.1	5' Splice Site	8
3.3.2	3' Splice Site	9
3.3.3	Branch Point	10
3.4	Overall Splice Site Quality	10
3.5	Exonic Elements	10
3.6	Length of Alternative Exons	16
3.7	A Major Function of Alternative Exons Are the Introduction of Premature Stop Codons	18
4	Bioinformatics Resources to Identify Alternative Exons	18
4.1	Detection of Alternative Splice Events Using Sequence Comparison	19
4.2	Computer Programs for Detecting Alternative Splicing	19
4.2.1	Finding Alternative Exons from Known Gene Structures	22
4.2.2	Finding Alternative Splice Events in Genome Regions of Unknown Gene Structures	22
4.3	Limitations, Problems and Accuracy of Predicting Alternative Splicing Events	24
4.4	Ad initio Prediction of Alternative Exons	25
5	Overview of Available Databases and Programs	26
	References	27

Multiple Roles of the SR Protein Family in Splicing Regulation

J.R. Sanford, D. Longman, and J.F. Cáceres

1	Introduction	33
2	Spliceosome Assembly	34
3	The Serine and Arginine-Rich Family of Proteins	36
4	The Many Roles of Serine and Arginine-Rich Proteins in Constitutive Splicing	38
5	Actions of Serine and Arginine-Rich Proteins and hnRNP A/B Proteins in Splice Site Selection	39
6	Serine and Arginine-Rich Modular Domains	42
6.1	RNA Binding Activities	42
6.2	The RS Domain	43
7	Role of the Modular Domains of Serine and Arginine-Rich Proteins in Constitutive and Alternative Splicing	44
7.1	Constitutive Splicing Activities	44
7.2	Alternative Splicing Activities	45
8	Functional Redundancy of Serine and Arginine-Rich Proteins	48
9	Role of Transcription in Alternative Splicing	49
10	Alternative Splicing and Signal Transduction	49
11	Conclusions	51
	References	52

Heterogeneous Nuclear Ribonucleoprotein Particle A/B Proteins and the Control of Alternative Splicing of the Mammalian Heterogeneous Nuclear Ribonucleoprotein Particle A1 Pre-mRNA

B. Chabot, C. LeBel, S. Hutchison, F.H. Nasim, and M.J. Simard

1	Heterogeneous Nuclear Ribonucleoprotein Particle Proteins and Splicing	59
1.1	hnRNP Proteins	59
1.2	hnRNP Proteins and Generic Splicing	60
1.3	hnRNP Proteins and Alternative Splicing	61
1.4	The Function of Core hnRNP A/B Proteins in Splice Site Selection	62
2	The hnRNP A1 Alternative Splicing Unit	63
2.1	High-Affinity Binding Sites for hnRNP A/B Proteins Contribute to Exon Skipping	64
2.1.1	A Model to Explain how A1 Modulates 5' Splice Site Selection	66
2.1.1.1	Repression of a Looped Out 5' Splice Site	70
2.1.1.2	Activation of the External Pair of Splice Sites	71
2.1.1.3	Functional Redundancy Between Core hnRNP A/B Protein Members	72
2.1.1.4	The Looping Model and Other hnRNP Proteins	73

2.2	RNA Duplex Formation and 5' Splice Site Selection	74
2.3	Elements Controlling 3' Splice Site Selection	75
3	Conclusions	78
3.1	A Role for the hnRNP A1 Protein in Alternative and Constitutive Splicing	78
3.2	Several Elements Control the Alternative Splicing of Exon 7B	81
	References	82

Phosphorylation-Dependent Control of the Pre-mRNA Splicing Machinery

J. Soret and J. Tazi

1	Introduction	89
2	Spliceosome Assembly and Pre-mRNA Splicing	90
2.1	Dynamic Assembly of the Spliceosome	90
2.2	Dissecting the Requirement for ATP in Pre-mRNA Splicing	91
3	Phosphorylation of Serine/Arginine-Rich Prote in Splicing Factors	93
3.1	Regulation of Splicing	93
3.2	Regulation of Cellular Localization	95
4	Serine/Arginine-Rich Protein Kinases	95
4.1	SRPK Protein Family	95
4.2	Clk/Syk Kinase Family	97
4.3	DNA Topoisomerase I	100
5	Phosphorylation of SR-Like Proteins	104
6	Phosphorylation of hnRNP Proteins	105
6.1	HnRNP A1	105
6.2	SF1/BBP, Member of the hnRNP-K Family	107
6.3	HnRNP C	108
7	Phosphorylation of snRNP Components	109
7.1	The U1 snRNP-Specific Protein 70K	109
7.2	The U2 snRNP Protein 155K	111
7.3	The U4/U5/U6 Associated Proteins	112
8	Concluding Remarks	112
	References	113

Splicing Regulation in *Drosophila* Sex Determination

P. Förch and J. Valcárcel

1	Introduction	127
2	Establishment and Maintenance of Sexual Identity	128
3	Sex-Lethal Proteins	130
4	Somatic Sexual Differentiation	133
4.1	Regulation of <i>transformer</i>	133

4.2	Regulation of <i>doublesex</i>	136
5	Dosage Compensation	138
6	Sexual Behavior	140
6.1	Fruitless	140
7	Transformer-2 Autoregulation	141
8	<i>Sex-lethal</i> Autoregulation	142
9	Perspectives	144
