

INDEX

alphabet, cell biological (for learning and memory) 135, 161

amnesia, human global 63, 76-80, 111
 case H.M. 76, 78

amygdala 78, 90-91, 93, 149

analytic-synthetic distinction 34-35

anti-reductionism (-ists) 18, 22-25, 39, 43, 95, 131, 133, 149, 156, 215

Aplysia 15, 89, 94, 135, 141-151, 160

attention, selective (explicit) 178-189

autonomy (-ists) 8, 20, 51, 103, 111, 116-117, 130-131

behavior (-al), data and trials 1-5, 8, 11, 14, 16, 20, 31, 41, 43-45, 49, 51-52, 59-60, 62, 75-76, 78, 88-91, 93, 96, 99-100, 107-116, 121-122, 130-132, 134, 136-137, 139, 141, 143-144, 148, 150, 154, 156-157, 160-161, 164, 167, 169-175, 179-181, 183-184, 186, 188, 195-196, 206, 212
 contextual-conditioning (memory) task 89-90, 92-93
 delayed matching-to-sample task 180, 186, 188

delayed response (DR) paradigm 166-168, 170-178
 percent(age) correlation, visual stimulus 194-200, 209-210

biochemistry 112, 115, 157, 190

cognition (-tive) (higher) 2, 4-5, 7, 23, 30-31, 34-35, 41, 50-51, 59, 76-77, 81, 107, 111, 116-119, 128-130, 134-135, 148, 157, 159, 161, 163, 165-166, 171, 175, 177, 189, 205-206
 science (-tists) 1-6, 9, 24, 28, 30-31, 35, 37, 41, 43-44, 71, 99, 103, 107, 116, 121, 130, 160, 163-164, 169, 171, 178, 180, 190

conductance, neuronal 55-57, 65-66, 100
 decremental 55
 salutatory 57

consciophile(s) 179, 184, 188-189

consciousness 2, 5, 118, 151, 158-159, 163-166, 171, 178-180, 188-190, 193-194, 205, 207, 210, 212-213
 Hard problem of 183, 189-190, 212-213

content (representational, cognitive, propositional, semantic) 23, 30, 41, 51, 77, 96, 107-108, 111, 117, 165-166, 207-211

cortex 43, 78-79, 91-92, 117-120, 126, 128-129, 135, 158,

167, 171-173, 175-178,
180-182, 187, 190, 193-
194, 196, 199, 203, 206,
214

anterior cingulate (ACC)
126, 159

dorsal visual stream 170-
171, 183, 194

dorsolateral prefrontal
(DLPFC) 119-121, 126,
159, 167, 169-172, 174,
177

frontal eye fields (FEFs)
118-123, 126-129, 159,
169, 183, 213

inferotemporal (IT) 169,
177, 182-183

medial superior
temporal (MST) 182,
200-202, 214-215

middle temporal (MT)
181-182, 194-200, 209,
211-212

movement fields 118-119

posterior parietal (PPC)
169-172, 182-183, 199

post-saccadic activity
118-123

prefrontal (PFC) 157m
169, 171-173, 175-178,
206, 214

pre-saccadic activity
118-123

primary visual (V1) 182,
185-187

principal sulcus (PS)
167-171, 174-177, 213

receptive field (sensory
neuron) 168-169, 176,
181-188, 194-195, 199,
203-204, 214-215

somatosensory (primary,
S1) 142, 203

superior frontal sulcus
120, 126

temporal (lobe) 169, 176-
177, 182-183, 191-194,
200

V4 181-182, 184-186, 188

ventral visual stream
176, 183, 213

visual 173, 180, 182, 187,
189

Drosophila melanogaster 136-
138, 140-144, 146, 148,
150

dunce mutant 136-137,
150

rutabaga mutant 137,
150

eliminative materialism 13-14,
178

embryonic stem (ES) cells 85-86,
88, 91

endogenesis 198

epilepsy (-tic) 191, 193

evolution (-ary) 30, 102, 132-133,
136, 148-151, 153, 155,
160, 172-173

molecular 151-157, 160

natural selection 152-
153, 198

neutral theory of
(molecular) 151-152, 160

exclusion, causal-explanatory
108-110

existence questions

external 32-35, 39, 101-
102

internal 32-35, 42, 115

externalism (-ist), phenomenal
190, 206-210, 215

facilitation, long-lasting
(synaptic) 61, 89, 139-
140, 142-143, 145-147,
149-150

- fruitless questions**
(pragmatically) 34-35, 39, 110, 134, 190
- function(s)** (-al) 2, 24, 29-30, 41, 43, 45-46, 71, 73-74, 82-84, 86-87, 90, 94-102, 128-131, 138-139, 150-155, 160-161, 172, 175, 180, 187, 189-191, 196-197, 205, 211-212
- functional neuroimaging** 2, 41, 116, 121-122, 130, 158-159
- Blood Oxygenation Level Dependent (BOLD)**
signal 122, 124-127
- functional magnetic resonance imaging** (fMRI) 25, 41, 120, 122, 124-126, 129, 159
- Region of Interest (ROI)**
126
- functionalism** (-ists) 131-132, 210-211, 215
- gene expression** 51, 54, 58, 60, 63, 68-69, 71, 73-74, 88, 92-93, 96, 139, 145
- CCAAT enhancer binding protein (C/EBP)**
73-74, 99, 145, 147-148, 160
- immediate early** 71-75, 139, 146-148
- promoter** 71, 87-88, 91, 137
- response activators**
(enhancers) 71-75, 138-139, 155
- response repressors** 71-72, 74-75, 99, 138-139, 148-149
- ubiquitin carboxyl-terminal hydrolase** (uch)
73, 99, 146-147
- heuristic** 4, 29, 110, 114-115, 130, 157
- hippocampus** (-pal) 45-46, 53, 61-63, 68, 70, 76, 78-81, 88-93, 113
- CA1 region** 62-63, 66-67, 70, 72, 90, 92
- dentate gyrus** 46, 53, 61
- perforant pathway**
(fibers) 52-53, 61-62
- Schaffer collateral pathway** (fibers) 62-63, 66-67, 70, 90, 92
- identity theory, mind-brain** 13-14, 20, 108-109, 132, 134, 149
- intended empirical applications**
(of a theory) 96-100
- internalism** (-ist), phenomenal
209-211
- knock-outs, genetic** 82-88, 214
- CREB⁻ mouse mutant**
88-91
- logical empiricism** 9, 14, 27
- long term potentiation (LTP)** 29, 43-46, 51-52, 62-63, 66-67, 70-71, 73-74, 81-82, 90-91, 94-95, 99, 102-103, 110, 114, 150, 156
- early (E-LTP)** 63, 65-70, 73-75, 82, 88, 90-91, 96, 99, 101, 137, 148
- late (L-LTP)** 67-75, 82, 88, 90-93, 96, 99-101, 112, 137, 148
- mechanism(s), cellular and molecular** 3-4, 15-15, 21, 23, 25, 29-30, 43-46, 49, 51-53, 56-60, 62, 65-72, 74-76, 82, 87-91, 93-95, 99-102, 104, 110-119, 121-123, 126, 128-130,

- 132, 134-136, 139-144,
