### **Part 1. Introduction to Biodeterioration and Human Health**

Chapter 1 .....	3
The Biological Aerosol as a Factor of Biodeterioration.....	3
1. Introduction .....	3
1.1 Biological Alteration Processes and Conditioning Factors .....	3
1.2 Biodeterioration of Materials Forming Pieces of Cultural Property.....	6
1.2.1 Biodeterioration of Organic Materials .....	7
1.2.1.1 Paper .....	7
1.2.1.2 Wood .....	10
1.2.1.3 Textiles .....	12
1.2.1.4 Parchment and Leather .....	13
1.2.1.5 Paintings (Ground Layers and Pigments) .....	15
1.2.1.6 Plastics .....	16
1.2.2 Biodeterioration of Inorganic Materials.....	18
1.2.2.1 Stone materials.....	19
1.2.2.2 Glass .....	21
1.2.2.3 Metals .....	22
1.3 Aerobiology Applied to Cultural Heritage .....	22
1.3.1 Biological Aerosol and Biodeterioration .....	22
1.3.2 Origin and Dispersion of Biological Matter in the Air .....	23
Chapter 2 .....	31
Pathogenic Microorganisms and Situations of Risk to Man .....	31
2. Introduction .....	31
2.1 Indoor Pollution and Effects on Human Health .....	31
2.2 Biological Pollution and Risk Situations.....	37
2.3 Studies on the Quality of Air in Libraries and Archives .....	41

### **Part 2. Environmental Measurements for Aerobiological Monitoring**

Chapter 3 .....	47
Measurement of Environmental Physical Parameters.....	47
3. Introduction .....	47
3.1 Measurement of Physical Parameters.....	48
3.1.1 Temperature .....	48

3.1.2	Moisture .....	51
3.1.3	Air Movements .....	54
3.1.4	Light .....	59
3.2	Measuring Methods .....	64
3.2.1	Indoor Measurements .....	64
3.2.2	Outdoor Environment .....	66
3.2.3	Microclimatic Monitoring .....	67
3.2.4	Data Processing .....	70
3.3	Influence of Physical Parameters on the Development of Organisms that Promote Biodeterioration .....	73
Chapter 4 .....		81
Chemical Parameters and Development of Biodeteriogens .....		81
4.	Introduction .....	81
4.1	Types of pollutants .....	82
4.1.1	Inorganic compounds of atmospheric particulate .....	84
4.1.2	Gaseous inorganic compounds .....	85
4.1.3	Organic compounds .....	87
4.2	Pollutants Promoting the Growth of Microorganisms .....	87
4.3	Growth-inhibiting pollutants .....	90
4.3.1	Types of Substrates .....	91
4.4	Detection of Pollutants .....	93
4.4.1	Active Methods .....	94
4.4.1.1	Liquid impingers .....	95
4.4.1.2	Denuders .....	97
4.4.2	Passive Methods .....	97
4.5	Data Processing .....	100
<b>Part 3. Methods and Measurement Techniques for Aerobiological Monitoring</b>		
Chapter 5 .....		107
Monitoring the Biological Aerosol .....		107
5.	Introduction .....	107
5.1	Principles of Atmospheric Dispersion of Particles .....	110
5.1.1	Deposition .....	110
5.1.2	Settling velocity .....	111
5.1.3	Density .....	113
5.1.4	Coagulation .....	113
5.1.5	Impact .....	114
5.1.6	Deposition in Precipitations .....	114
5.2	Sampling Principles .....	116
5.2.1	Gravitational Deposition .....	118
5.2.2	Impact .....	119
5.2.3	Suction .....	119

5.2.4	Filtration.....	120
5.2.5	Electrostatic Precipitation .....	121
5.2.6	Thermal Precipitation.....	121
5.2.7	Impingement .....	121
5.3	Sampling Equipment.....	122
5.3.1	Deposition Samplers .....	122
5.3.2	Impaction Samplers.....	123
5.3.3	Liquid impingers .....	130
5.4	Strategy of Aerobiological Sampling Techniques.....	131
5.4.1	Choice of Aerobiological Monitoring Method .....	135
5.4.2	Criteria for Indoor Aerobiological Monitoring .....	136
5.4.3	Sampling Site .....	137
5.4.4	Timing and Duration of Sampling .....	138
5.4.5	Influence of Heating and Conditioning Systems .....	139
5.4.6	Choice of Sampling Technique .....	140
Chapter 6	.....	145
Analysis of the Biological Aerosol	.....	145
6.	Introduction .....	145
6.1	Methods for Analysis of Biological Aerosol.....	146
6.2	Bacteria and Actinomycetes.....	150
6.2.1	Ecological and Functional Characteristics .....	150
6.2.2	Autotrophic Bacteria .....	151
6.2.3	Heterotrophic Bacteria .....	152
6.2.4	Specific Analysis Methods.....	154
6.3	Fungi .....	156
6.3.1	Ecological and Functional Characteristics .....	156
6.3.2	Specific Analysis Methods.....	158
6.4	Cyanobacteria and Algae.....	159
6.4.1	Ecological and Functional Characteristics .....	159
6.4.2	Specific Analysis Methods.....	160
6.5	Lichens .....	163
6.5.1	Ecological and Functional Characteristics .....	163
6.5.2	Specific Sampling Methods .....	165
6.6	Higher Plants and Mosses .....	166
6.6.1	Ecological and Functional Characteristics .....	166
6.6.2	Specific Sampling Methods .....	167
<b>Part 4. Aerobiological Monitoring for the Preservation of Cultural Heritage</b>		
Chapter 7	.....	175
Libraries and Archives	.....	175
7.	Introduction .....	175
7.1	Specific Contexts.....	175

7.1.1	Types of Environments and Their Climates.....	176
7.1.1.1	Types of Buildings.....	176
7.1.1.2	Remarks on microclimates .....	177
7.1.1.3	Types of Shelves and their Microclimates.....	179
7.1.2	Types of Materials and their Biodegradability.....	181
7.1.2.1	Hygroscopicity of Materials and Biodeterioration Processes .....	182
7.1.3	Biodeteriogens of Library and Archive Materials.....	184
7.2	State of Researches of Aerobiology in Archives and Libraries.	187
7.3	Aerobiological Sampling in Libraries and Archives .....	189
Chapter 8	.....	195
Museums	.....	195
8.	Introduction .....	195
8.1	Aspects to be Considered .....	195
8.1.1	Types of Museums .....	195
8.1.1.1	Types of Environments and Relevant Microclimates..	196
8.1.1.2	Types of Exhibition .....	198
8.1.2	Types of Materials Preserved.....	201
8.1.3	Biodeteriogens .....	201
8.2	State of Aerobiological Researches in Museums .....	203
8.3	Aerobiological Sampling in Museum Environments .....	203
Chapter 9	.....	207
Churches and Hypogea	.....	207
9.	Introduction .....	207
9.1	Types of Environments and their Microclimates .....	207
9.1.1	Churches .....	207
9.1.2	Hypogea .....	209
9.2	Types of Materials Preserved.....	210
9.3	Biodeteriogens.....	211
9.4	State of Aerobiological Research on Churches and Hypogea...	217
9.5	Aerobiological Sampling in Churches and Hypogea .....	221
Chapter 10	.....	225
Outdoor Environments	.....	225
10.	Introduction.....	225
10.1	Specific Goals .....	225
10.2	Types of Materials Exposed and Conditions of Exposure .....	229
10.3	Biodeteriogens of Materials Used in Buildings.....	231
<b>Index</b>	.....	235
<b>Colour Plates</b>	.....	239

Cultural Heritage and Aerobiology  
Methods and Measurement Techniques for  
Biodeterioration Monitoring  
Mandrioli, P.; Caneva, G.; Sabbioni, C. (Eds.)  
2003, XIV, 243 p. 56 illus., 8 illus. in color., Hardcover  
ISBN: 978-1-4020-1622-6
