

# TABLE OF CONTENTS

|                                                                                          |     |
|------------------------------------------------------------------------------------------|-----|
| <i>Preface</i><br>Dimitri GINEV                                                          | vii |
| <i>Introduction</i><br>Dimitri GINEV                                                     | ix  |
| PART I. INVESTIGATIONS IN THE GENERAL PHILOSOPHY OF SCIENCE                              |     |
| The Danger of Catching Nature in Contradiction<br>Sava PETROV                            | 3   |
| Scientific Rationality, Decision and Choice<br>Vihren BOUZOV                             | 17  |
| The Information Technology Revolution:<br>A New Techno-Economic Paradigm<br>Spas SPASSOV | 31  |
| Are Bifurcations of Human Knowledge Possible?<br>Assen PETROV                            | 43  |
| PART II. PHILOSOPHY OF PHYSICS                                                           |     |
| The Proliferation and Synthesis of Physical Theories<br>Azarya POLIKAROV                 | 53  |
| On Human Agency in Physics<br>Michael BUSHEV                                             | 69  |
| PART III. PHILOSOPHY AND LOGIC                                                           |     |
| Leibniz's Logical Systems: A Reconstruction<br>Vladimir SOTIROV                          | 85  |
| The Logic Between Two Centuries<br>Martin TABAKOV                                        | 95  |

**PART IV. PHILOSOPHY OF SCIENCE AND COGNITIVE SCIENCE**

|                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------|-----|
| <b>Idealized Cognitive Models and Other Mental Representations</b><br>Dafina GENOVA                             | 129 |
| <b>Philosophy of Science Meets Cognitive Science:<br/>The Categorization Debate</b><br>Lilia GUROVA             | 141 |
| <b>Three Words: Hypertext and Argumentation Readings<br/>of Tractatus Logico-Philosophicus</b><br>Slavian RADEV | 163 |

**PART V. PHILOSOPHY OF SCIENCE AND THE CONTINENTAL IDEAS**

|                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------|-----|
| <b>On Kant's Conception of Space and Time</b><br>Anguel S. STEFANOV                                                        | 169 |
| <b>How to Be Simultaneously an Antiessentialist and a Defender of<br/>Science's Cognitive Specificity</b><br>Dimitri GINEV | 187 |
| <b>Notes on Contributors</b>                                                                                               | 207 |

Bulgarian Studies in the Philosophy of Science

Ginev, D. (Ed.)

2003, XII, 221 p., Hardcover

ISBN: 978-1-4020-1496-3
