<b>Preface</b>	<b>vii</b>
<b>Introduction</b>	<b>1</b>
<b>I Groups</b>	<b>5</b>
<b>Introduction</b>	<b>7</b>
<b>1 Classical Techniques of Combinatorial Group Theory</b>	<b>9</b>
1.1 Nielsen's Method . . . . .	9
1.2 Whitehead's Method . . . . .	11
1.3 Tietze's Method . . . . .	13
1.4 Free Differential Calculus . . . . .	14
1.4.1 Two applications . . . . .	17
<b>2 Test Elements</b>	<b>20</b>
2.1 Nielsen's Commutator Test . . . . .	21
2.2 Recognizing Test Elements . . . . .	25
2.3 Test Sets . . . . .	30
2.4 The "Double Jacobian" Matrix . . . . .	33
<b>3 Other Special Elements</b>	<b>35</b>
3.1 $\Delta$ -Primitive Elements . . . . .	35
3.2 Almost Primitive and Generic Elements . . . . .	41

<b>4 Automorphic Orbits</b>	<b>45</b>
4.1 Finite Orbits . . . . .	46
4.2 Abridged Orbits . . . . .	48
4.2.1 Counting primitive elements . . . . .	48
4.2.2 Complexity of Whitehead's algorithm . . . . .	53
4.3 Endomorphisms that Preserve Automorphic Orbits . . .	59
 <b>II Polynomial Algebras</b>	 <b>65</b>
<b>Introduction</b>	<b>67</b>
 <b>5 The Jacobian Conjecture</b>	 <b>71</b>
5.1 Polynomial Retracts and the Jacobian Conjecture . . . .	72
5.2 Retracts of $K[x, y]$ . . . . .	75
5.3 Applications to the Jacobian Conjecture . . . . .	76
 <b>6 The Cancellation Conjecture</b>	 <b>80</b>
6.1 Equivalence and Stable Equivalence . . . . .	83
6.2 Around Danielewski's Example . . . . .	88
 <b>7 Nagata's Problem</b>	 <b>92</b>
7.1 Gröbner Bases and Face Functions . . . . .	95
7.2 Lifting the Nagata Automorphism . . . . .	101
 <b>8 The Embedding Problem</b>	 <b>108</b>
8.1 Embeddings of Curves in the Plane . . . . .	109
8.1.1 Elementary automorphisms and peak reduction .	111
8.1.2 A classification of parametric curves . . . . .	113
8.1.3 Embeddings of curves in the plane . . . . .	115
8.2 Embeddings of Hypersurfaces in Affine Space . . . . .	118
8.2.1 Invariants of isomorphic varieties . . . . .	122
8.2.2 Inequivalent isomorphic varieties . . . . .	124
8.3 The Embedding Conjecture for Free Associative Algebras	127
 <b>9 Coordinate Polynomials</b>	 <b>129</b>
9.1 Coordinates of Two-Variable Polynomial Algebras . . . .	130
9.1.1 Proofs of main results . . . . .	132
9.1.2 Algorithm for detecting coordinate polynomials .	136
9.1.3 Relation to the Jacobian Conjecture . . . . .	137
9.2 Coordinates in Free Associative Algebra of Rank Two . .	138
9.2.1 Fox derivatives in a free associative algebra . . .	141
9.2.2 Proofs and algorithms . . . . .	142
9.3 Density of Coordinates in Polynomial Algebras . . . . .	144
9.4 Coordinates in $K[z][x, y]$ . . . . .	147
9.4.1 Preliminaries . . . . .	148

9.4.2	Characterization of tame and wild coordinates in $K[z][x, y]$ . . . . .	151
9.4.3	New class of wild automorphisms . . . . .	158
<b>10</b>	<b>Test Polynomials</b> . . . . .	<b>169</b>
10.1	Test Polynomials in Polynomial Algebras . . . . .	171
10.2	Test Elements in Free Associative Algebras . . . . .	174
10.3	Open Problems . . . . .	180
<b>III</b>	<b>Free Nielsen–Schreier Algebras</b> . . . . .	<b>183</b>
	<b>Introduction</b> . . . . .	<b>185</b>
<b>11</b>	<b>Schreier Varieties of Algebras</b> . . . . .	<b>190</b>
11.1	Main Types of Nielsen–Schreier Algebras . . . . .	191
11.2	Schreier Techniques . . . . .	196
11.3	Free Differential Calculus . . . . .	201
11.3.1	Free differential calculus and Schreier varieties . . . . .	201
11.3.2	Ranks of subalgebras . . . . .	207
11.4	Stable Equivalence . . . . .	208
11.5	The Rank of an Endomorphism . . . . .	210
<b>12</b>	<b>Rank Theorems and Primitive Elements</b> . . . . .	<b>213</b>
12.1	Basic Properties of Partial Derivatives . . . . .	214
12.2	Homogeneous Admissible Elements . . . . .	217
12.3	Elimination of Variables . . . . .	219
12.4	Rank Theorems . . . . .	225
12.5	Primitive Elements . . . . .	229
12.5.1	Primitive elements in free nonassociative algebras . . . . .	230
12.5.2	Primitive elements in free Lie superalgebras . . . . .	230
12.5.3	The Freiheitssatz and primitive elements . . . . .	235
12.6	Primitive Elements and Endomorphisms . . . . .	237
12.7	Inverse Images of Primitive Elements . . . . .	241
<b>13</b>	<b>Generalized Primitive Elements</b> . . . . .	<b>244</b>
13.1	Test Elements . . . . .	247
13.2	Retracts . . . . .	252
13.3	Endomorphisms and Automorphic Orbits . . . . .	254
13.4	Almost Primitive and Test Elements . . . . .	256
13.5	$\Delta$ -Primitive Elements of Free Lie Algebras . . . . .	262
13.6	Generic Elements of Free Lie Algebras . . . . .	264
<b>14</b>	<b>Free Leibniz Algebras</b> . . . . .	<b>270</b>
14.1	Basic Notions . . . . .	271
14.2	Differential Separability of Subalgebras . . . . .	273

14.3	Residual Finiteness of Free Leibniz Algebras . . . . .	275
14.4	Automorphisms of Free Leibniz Algebras . . . . .	279
14.4.1	Simple automorphisms . . . . .	279
14.4.2	Recognizing tame automorphisms . . . . .	281

Combinatorial Methods

Free Groups, Polynomials, and Free Algebras

Shpilrain, V.; Mikhalev, A.; Yu, J.-t.

2004, XII, 315 p., Hardcover

ISBN: 978-0-387-40562-9
