## Contents

<b>Foreword</b> .....	VII
<b>Preface</b> .....	IX
<b>1 Introduction to Balanced Incomplete Block Designs</b> .....	1
1.1 What Is Design Theory? .....	1
1.2 Basic Definitions and Properties .....	2
1.3 Incidence Matrices .....	6
1.4 Isomorphisms and Automorphisms .....	8
1.4.1 Constructing BIBDs with Specified Automorphisms ...	12
1.5 New BIBDs from Old .....	15
1.6 Fisher's Inequality .....	16
1.7 Notes and References .....	18
1.8 Exercises .....	19
<b>2 Symmetric BIBDs</b> .....	23
2.1 An Intersection Property .....	23
2.2 Residual and Derived BIBDs .....	25
2.3 Projective Planes and Geometries .....	27
2.4 The Bruck-Ryser-Chowla Theorem .....	30
2.5 Notes and References .....	39
2.6 Exercises .....	39
<b>3 Difference Sets and Automorphisms</b> .....	41
3.1 Difference Sets and Automorphisms .....	41
3.2 Quadratic Residue Difference Sets .....	50
3.3 Singer Difference Sets .....	52
3.4 The Multiplier Theorem .....	54
3.4.1 Multipliers of Difference Sets .....	54
3.4.2 The Group Ring .....	58
3.4.3 Proof of the Multiplier Theorem .....	61

3.5	Difference Families .....	63
3.6	A Construction for Difference Families .....	66
3.7	Notes and References .....	69
3.8	Exercises .....	70
<b>4</b>	<b>Hadamard Matrices and Designs</b> .....	<b>73</b>
4.1	Hadamard Matrices .....	73
4.2	An Equivalence Between Hadamard Matrices and BIBDs ....	74
4.3	Conference Matrices and Hadamard Matrices .....	76
4.4	A Product Construction .....	80
4.5	Williamson's Method .....	81
4.6	Existence Results for Hadamard Matrices of Small Orders ....	84
4.7	Regular Hadamard Matrices .....	84
4.7.1	Excess of Hadamard Matrices .....	87
4.8	Bent Functions .....	89
4.9	Notes and References .....	98
4.10	Exercises .....	98
<b>5</b>	<b>Resolvable BIBDs</b> .....	<b>101</b>
5.1	Introduction .....	101
5.2	Affine Planes and Geometries .....	102
5.2.1	Resolvability of Affine Planes .....	104
5.2.2	Projective and Affine Planes .....	106
5.2.3	Affine Geometries .....	107
5.3	Bose's Inequality and Affine Resolvable BIBDs .....	109
5.3.1	Symmetric BIBDs from Affine Resolvable BIBDs .....	114
5.4	Orthogonal Resolutions .....	115
5.5	Notes and References .....	119
5.6	Exercises .....	120
<b>6</b>	<b>Latin Squares</b> .....	<b>123</b>
6.1	Latin Squares and Quasigroups .....	123
6.2	Steiner Triple Systems .....	126
6.2.1	The Bose Construction .....	127
6.2.2	The Skolem Construction .....	128
6.3	Orthogonal Latin Squares .....	131
6.4	Mutually Orthogonal Latin Squares .....	136
6.4.1	MOLS and Affine Planes .....	136
6.4.2	MacNeish's Theorem .....	139
6.5	Orthogonal Arrays .....	140
6.5.1	Orthogonal Arrays and MOLS .....	140
6.5.2	Some Constructions for Orthogonal Arrays .....	142
6.6	Transversal Designs .....	144
6.7	Wilson's Construction .....	146
6.8	Disproof of the Euler Conjecture .....	151

6.9	Notes and References .....	153
6.10	Exercises .....	153
<b>7</b>	<b>Pairwise Balanced Designs I .....</b>	<b>157</b>
7.1	Definitions and Basic Results .....	157
7.2	Necessary Conditions and PBD-Closure .....	159
7.3	Steiner Triple Systems .....	164
7.4	$(v, 4, 1)$ -BIBDs .....	167
7.5	Kirkman Triple Systems .....	170
7.6	Notes and References .....	176
7.7	Exercises .....	177
<b>8</b>	<b>Pairwise Balanced Designs II .....</b>	<b>179</b>
8.1	The Stanton-Kalbfleisch Bound .....	179
8.1.1	The Erdős-de Bruijn Theorem .....	183
8.2	Improved Bounds .....	185
8.2.1	Some Examples .....	188
8.3	Minimal PBDs and Projective Planes .....	190
8.4	Minimal PBDs with $\lambda > 1$ .....	193
8.5	Notes and References .....	198
8.6	Exercises .....	198
<b>9</b>	<b><math>t</math>-Designs and <math>t</math>-wise Balanced Designs .....</b>	<b>201</b>
9.1	Basic Definitions and Properties of $t$ -Designs .....	201
9.2	Some Constructions for $t$ -Designs with $t \geq 3$ .....	206
9.2.1	Inversive Planes .....	209
9.2.2	Some 5-Designs .....	212
9.3	$t$ -wise Balanced Designs .....	216
9.3.1	Holes and Subdesigns .....	217
9.4	Notes and References .....	221
9.5	Exercises .....	222
<b>10</b>	<b>Orthogonal Arrays and Codes .....</b>	<b>225</b>
10.1	Orthogonal Arrays .....	225
10.2	Codes .....	230
10.3	Bounds on Codes and Orthogonal Arrays .....	233
10.4	New Codes from Old .....	236
10.5	Binary Codes .....	239
10.5.1	The Plotkin Bound and Hadamard Codes .....	239
10.5.2	Reed-Muller Codes .....	242
10.6	Resilient Functions .....	249
10.7	Notes and References .....	253
10.8	Exercises .....	253

<b>11 Applications of Combinatorial Designs</b> .....	257
11.1 Authentication Codes .....	257
11.1.1 A Construction from Orthogonal Arrays .....	259
11.2 Threshold Schemes .....	261
11.2.1 A Construction from Orthogonal Arrays .....	261
11.2.2 Anonymous Threshold Schemes .....	263
11.3 Group Testing Algorithms .....	264
11.3.1 A Construction from BIBDs .....	266
11.4 Two-Point Sampling .....	268
11.4.1 Monte Carlo Algorithms .....	268
11.4.2 Orthogonal Arrays and Two-Point Sampling .....	270
11.5 Notes and References .....	273
11.6 Exercises .....	273
<b>A Small Symmetric BIBDs and Abelian Difference Sets</b> .....	279
<b>B Finite Fields</b> .....	281
<b>References</b> .....	287
<b>Index</b> .....	295
