Preface	v
List of Symbols	xi
1 Basic Concepts	1
1.1 Groups and Subgroups	1
1.2 Homomorphisms and Normal Subgroups	10
1.3 Automorphisms	15
1.4 Cyclic Groups	21
1.5 Commutators	24
1.6 Products of Groups	27
1.7 Minimal Normal Subgroups	36
1.8 Composition Series	39
2 Abelian Groups	43
2.1 The Structure of Abelian Groups	43
2.2 Automorphisms of Cyclic Groups	49
3 Action and Conjugation	55
3.1 Action	55
3.2 Sylow's Theorem	62
3.3 Complements of Normal Subgroups	71

4	Permutation Groups	77
4.1	Transitive Groups and Frobenius Groups	77
4.2	Primitive Action	84
4.3	The Symmetric Group	87
4.4	Imprimitive Groups and Wreath Products	91
5	p-Groups and Nilpotent Groups	99
5.1	Nilpotent Groups	99
5.2	Nilpotent Normal Subgroups	104
5.3	p -Groups with Cyclic Maximal Subgroups	108
6	Normal and Subnormal Structure	121
6.1	Solvable Groups	121
6.2	The Theorem of Schur-Zassenhaus	125
6.3	Radical and Residue	128
6.4	π -Separable Groups	133
6.5	Components and the Generalized Fitting Subgroup	141
6.6	Primitive Maximal Subgroups	145
6.7	Subnormal Subgroups	156
7	Transfer and p-Factor Groups	163
7.1	The Transfer Homomorphism	163
7.2	Normal p -Complements	169
8	Groups Acting on Groups	175
8.1	Action on Groups	175
8.2	Coprime Action	183
8.3	Action on Abelian Groups	190
8.4	The Decomposition of an Action	197
8.5	Minimal Nontrivial Action	203
8.6	Linear Action and the Two-Dimensional Linear Groups	210

9 Quadratic Action	225
9.1 Quadratic Action	225
9.2 The Thompson Subgroup	230
9.3 Quadratic Action in p -Separable Groups	239
9.4 A Characteristic Subgroup	249
9.5 Fixed-Point-Free Action	257
10 The Embedding of p-Local Subgroups	261
10.1 Primitive Pairs	262
10.2 The $p^a q^b$ -Theorem	276
10.3 The Amalgam Method	281
11 Signalizer Functors	303
11.1 Definitions and Elementary Properties	304
11.2 Factorizations	311
11.3 The Completeness Theorem of Glauberman	325
12 N-Groups	335
12.1 An Application of the Completeness Theorem	338
12.2 $J(T)$ -Components	347
12.3 N -Groups of Local Characteristic 2	356
Appendix	369
Bibliography	373
Books and Monographs	373
Journal Articles	374
Index	381

The Theory of Finite Groups

An Introduction

Kurzweil, H.; Stellmacher, B.

2004, XII, 388 p., Hardcover

ISBN: 978-0-387-40510-0
