## Part I A Historical Survey of Jordan Structure Theory

---

<b>1 Jordan Algebras in Physical Antiquity</b>	<b>39</b>
1.1 The Matrix Interpretation of Quantum Mechanics . . . . .	39
1.2 The Jordan Program . . . . .	40
1.3 The Jordan Operations . . . . .	40
1.4 Digression on Linearization . . . . .	41
1.5 Back to the Bullet . . . . .	42
1.6 The Jordan Axioms . . . . .	43
1.7 The First Example: Full Algebras . . . . .	45
1.8 The Second Example: Hermitian Algebras . . . . .	46
1.9 The Third Example: Spin Factors . . . . .	47
1.10 Special and Exceptional . . . . .	48
1.11 Classification . . . . .	48

<b>2</b>	<b>Jordan Algebras in the Algebraic Renaissance</b>	<b>51</b>
2.1	Linear Algebras over General Scalars	52
2.2	Categorical Nonsense	53
2.3	Commutators and Associators	55
2.4	Lie and Jordan Algebras	57
2.5	The Three Basic Examples Revisited	58
2.6	Jordan Matrix Algebras with Associative Coordinates	59
2.7	Jordan Matrix Algebras with Alternative Coordinates	60
2.8	The $n$ -Squares Problem	61
2.9	Forms Permitting Composition	62
2.10	Composition Algebras	63
2.11	The Cayley–Dickson Construction and Process	64
2.12	Split Composition Algebras	65
2.13	Classification	67
<b>3</b>	<b>Jordan Algebras in the Enlightenment</b>	<b>69</b>
3.1	Forms of Algebras	69
3.2	Inverses and Isotopes	70
3.3	Nuclear Isotopes	71
3.4	Twisted Involutions	72
3.5	Twisted Hermitian Matrices	73
3.6	Spin Factors	74
3.7	Quadratic Factors	74
3.8	Cubic Factors	76
3.9	Reduced Cubic Factors	78
3.10	Classification	79
<b>4</b>	<b>The Classical Theory</b>	<b>81</b>
4.1	$U$ -Operators	81
4.2	The Quadratic Program	82
4.3	The Quadratic Axioms	83
4.4	Justification	84
4.5	Inverses	85
4.6	Isotopes	86
4.7	Inner Ideals	86
4.8	Nondegeneracy	88
4.9	Radical Remarks	89
4.10	$i$ -Special and $i$ -Exceptional	90
4.11	Artin–Wedderburn–Jacobson Structure Theorem	92
<b>5</b>	<b>The Final Classical Formulation</b>	<b>95</b>
5.1	Algebras with Capacity	95
5.2	Classification	97

<b>6</b>	<b>The Classical Methods</b>	<b>99</b>
6.1	Peirce Decompositions	99
6.2	Coordinatization	100
6.3	The Coordinates	102
6.4	Minimal Inner Ideals	102
6.5	Capacity	104
6.6	Capacity Classification	104
<b>7</b>	<b>The Russian Revolution</b>	<b>107</b>
7.1	The Lull Before the Storm	107
7.2	The First Tremors	108
7.3	The Main Quake	109
7.4	Aftershocks	111
<b>8</b>	<b>Zel'manov's Exceptional Methods</b>	<b>114</b>
8.1	I-Finiteness	114
8.2	Absorbers	116
8.3	Modular Inner Ideals	117
8.4	Primitivity	118
8.5	The Heart	119
8.6	Spectra	120
8.7	Comparing Spectra	122
8.8	Big Resolvents	123
8.9	Semiprimitive Imbedding	124
8.10	Ultraproducts	125
8.11	Prime Dichotomy	127

---

## Part II The Classical Theory

---

<b>1</b>	<b>The Category of Jordan Algebras</b>	<b>132</b>
1.1	Categories	132
1.2	The Category of Linear Algebras	133
1.3	The Category of Unital Algebras	136
1.4	Unitalization	137
1.5	The Category of Algebras with Involution	139
1.6	Nucleus, Center, and Centroid	141
1.7	Strict Simplicity	144
1.8	The Category of Jordan Algebras	146
1.9	Problems for Chapter 1	150
<b>2</b>	<b>The Category of Alternative Algebras</b>	<b>153</b>
2.1	The Category of Alternative Algebras	153
2.2	Nuclear Involutions	154
2.3	Composition Algebras	155

2.4	Split Composition Algebras .....	157
2.5	The Cayley–Dickson Construction .....	160
2.6	The Hurwitz Theorem .....	164
2.7	Problems for Chapter 2 .....	167
<b>3</b>	<b>Three Special Examples</b> .....	<b>168</b>
3.1	Full Type .....	168
3.2	Hermitian Type .....	171
3.3	Quadratic Form Type .....	176
3.4	Reduced Spin Factors .....	180
3.5	Problems for Chapter 3 .....	183
<b>4</b>	<b>Jordan Algebras of Cubic Forms</b> .....	<b>186</b>
4.1	Cubic Maps .....	187
4.2	The General Construction .....	188
4.3	The Jordan Cubic Construction .....	191
4.4	The Freudenthal Construction .....	193
4.5	The Tits Constructions .....	195
4.6	Problems for Chapter 4 .....	197
<b>5</b>	<b>Two Basic Principles</b> .....	<b>199</b>
5.1	The Macdonald and Shirshov–Cohn Principles .....	199
5.2	Fundamental Formulas .....	200
5.3	Nondegeneracy .....	205
5.4	Problems for Chapter 5 .....	209
<b>6</b>	<b>Inverses</b> .....	<b>211</b>
6.1	Jordan Inverses .....	211
6.2	von Neumann and Nuclear Inverses .....	217
6.3	Problems for Chapter 6 .....	219
<b>7</b>	<b>Isotopes</b> .....	<b>220</b>
7.1	Nuclear Isotopes .....	220
7.2	Jordan Isotopes .....	222
7.3	Quadratic Factor Isotopes .....	224
7.4	Cubic Factor Isotopes .....	226
7.5	Matrix Isotopes .....	228
7.6	Problems for Chapter 7 .....	232
<b>8</b>	<b>Peirce Decomposition</b> .....	<b>235</b>
8.1	Peirce Decompositions .....	235
8.2	Peirce Multiplication Rules .....	239
8.3	Basic Examples of Peirce Decompositions .....	240
8.4	Peirce Identity Principle .....	245
8.5	Problems for Chapter 8 .....	246

<b>9</b>	<b>Off-Diagonal Rules</b>	<b>247</b>
9.1	Peirce Specializations	247
9.2	Peirce Quadratic Forms	250
9.3	Problems for Chapter 9	252
<b>10</b>	<b>Peirce Consequences</b>	<b>253</b>
10.1	Diagonal Consequences	253
10.2	Diagonal Isotopes	255
10.3	Problems for Chapter 10	258
<b>11</b>	<b>Spin Coordinatization</b>	<b>259</b>
11.1	Spin Frames	259
11.2	Diagonal Spin Consequences	262
11.3	Strong Spin Coordinatization	263
11.4	Spin Coordinatization	265
11.5	Problems for Chapter 11	267
<b>12</b>	<b>Hermitian Coordinatization</b>	<b>268</b>
12.1	Cyclic Frames	268
12.2	Diagonal Hermitian Consequences	270
12.3	Strong Hermitian Coordinatization	272
12.4	Hermitian Coordinatization	274
<b>13</b>	<b>Multiple Peirce Decompositions</b>	<b>278</b>
13.1	Decomposition	278
13.2	Recovery	282
13.3	Multiplication	282
13.4	The Matrix Archetype	284
13.5	The Peirce Principle	286
13.6	Modular Digression	288
13.7	Problems for Chapter 13	290
<b>14</b>	<b>Multiple Peirce Consequences</b>	<b>292</b>
14.1	Jordan Coordinate Conditions	292
14.2	Peirce Specializations	294
14.3	Peirce Quadratic Forms	295
14.4	Connected Idempotents	296
<b>15</b>	<b>Hermitian Symmetries</b>	<b>301</b>
15.1	Hermitian Frames	301
15.2	Hermitian Symmetries	303
15.3	Problems for Chapter 15	307
<b>16</b>	<b>The Coordinate Algebra</b>	<b>308</b>
16.1	The Coordinate Triple	308

<b>17</b>	<b>Jacobson Coordinatization</b>	<b>312</b>
17.1	Strong Coordinatization	312
17.2	General Coordinatization	315
<b>18</b>	<b>Von Neumann Regularity</b>	<b>318</b>
18.1	vNr Pairing	318
18.2	Structural Pairing	321
18.3	Problems for Chapter 18	324
<b>19</b>	<b>Inner Simplicity</b>	<b>325</b>
19.1	Simple Inner Ideals	325
19.2	Minimal Inner Ideals	327
19.3	Problems for Chapter 19	329
<b>20</b>	<b>Capacity</b>	<b>330</b>
20.1	Capacity Existence	330
20.2	Connected Capacity	331
20.3	Problems for Chapter 20	334
<b>21</b>	<b>Herstein–Kleinfeld–Osborn Theorem</b>	<b>335</b>
21.1	Alternative Algebras Revisited	335
21.2	A Brief Tour of the Alternative Nucleus	338
21.3	Herstein–Kleinfeld–Osborn Theorem	341
21.4	Problems for Chapter 21	345
<b>22</b>	<b>Osborn’s Capacity 2 Theorem</b>	<b>348</b>
22.1	Commutators	348
22.2	Capacity Two	351
<b>23</b>	<b>Classical Classification</b>	<b>356</b>
23.1	Capacity $n \geq 3$	356

---

### Part III Zel’manov’s Exceptional Theorem

---

<b>1</b>	<b>The Radical</b>	<b>362</b>
1.1	Invertibility	363
1.2	Structurality	364
1.3	Quasi-Invertibility	366
1.4	Proper Quasi-Invertibility	369
1.5	Elemental Characterization	374
1.6	Radical Inheritance	375
1.7	Radical Surgery	376
1.8	Problems for Chapter 1	379

<b>2</b>	<b>Begetting and Bounding Idempotents</b>	<b>381</b>
2.1	I-gene	381
2.2	Algebraic Implies I-Genic	383
2.3	I-genic Nilness	384
2.4	I-Finiteness	384
2.5	Problems for Chapter 2	387
<b>3</b>	<b>Bounded Spectra Beget Capacity</b>	<b>388</b>
3.1	Spectra	388
3.2	Bigness	390
3.3	Evaporating Division Algebras	392
3.4	Spectral Bounds and Capacity	392
3.5	Problems for Chapter 3	395
<b>4</b>	<b>Absorbers of Inner Ideals</b>	<b>397</b>
4.1	Linear Absorbers	397
4.2	Quadratic Absorbers	400
4.3	Absorber Nilness	403
4.4	Problems for Chapter 4	409
<b>5</b>	<b>Primitivity</b>	<b>410</b>
5.1	Modularity	410
5.2	Primitivity	413
5.3	Semiprimitivity	415
5.4	Imbedding Nondegenerates in Semiprimitives	416
5.5	Problems for Chapter 5	420
<b>6</b>	<b>The Primitive Heart</b>	<b>422</b>
6.1	Hearts and Spectra	422
6.2	Primitive Hearts	424
6.3	Problems for Chapter 6	425
<b>7</b>	<b>Filters and Ultrafilters</b>	<b>427</b>
7.1	Filters in General	427
7.2	Filters from Primes	428
7.3	Ultimate Filters	430
7.4	Problems for Chapter 7	432
<b>8</b>	<b>Ultraproducts</b>	<b>433</b>
8.1	Ultraproducts	433
8.2	Examples	435
8.3	Problems for Chapter 8	439

<b>9</b>	<b>The Final Argument</b>	<b>440</b>
9.1	Dichotomy	440
9.2	The Prime Dichotomy	441
9.3	Problems for Chapter 9	443

---

## Part IV Appendices

---

<b>A</b>	<b>Cohn's Special Theorems</b>	<b>447</b>
A.1	Free Gadgets	447
A.2	Cohn Symmetry	449
A.3	Cohn Speciality	450
A.4	Problems for Appendix A	454
<b>B</b>	<b>Macdonald's Theorem</b>	<b>455</b>
B.1	The Free Jordan Algebra	455
B.2	Identities	458
B.3	Normal Form for Multiplications	461
B.4	The Macdonald Principles	466
B.5	Albert i-Exceptionality	469
B.5.1	Nonvanishing of $G_9$	471
B.5.2	Nonvanishing of $G_8$	472
B.5.3	Nonvanishing of $T_{11}$	473
B.6	Problems for Appendix B	475
<b>C</b>	<b>Jordan Algebras of Degree 3</b>	<b>476</b>
C.1	Jordan Matrix Algebras	476
C.2	The General Construction	480
C.3	The Freudenthal Construction	487
C.4	The Tits Constructions	490
C.5	Albert Division Algebras	498
C.6	Problems for Appendix C	500
<b>D</b>	<b>The Jacobson–Bourbaki Density Theorem</b>	<b>501</b>
D.1	Semisimple Modules	501
D.2	The Jacobson–Bourbaki Density Theorem	504
<b>E</b>	<b>Hints</b>	<b>506</b>
E.1	Hints for Part II	506
E.2	Hints for Part III	517
E.3	Hints for Part IV	521

---

**Part V Indexes**

---

<b>A</b>	<b>Index of Collateral Readings</b>	<b>524</b>
A.1	Foundational Readings .....	524
A.2	Readings in Applications .....	527
A.3	Historical Perusals .....	529
<b>B</b>	<b>Pronouncing Index of Names</b>	<b>531</b>
<b>C</b>	<b>Index of Notations</b>	<b>536</b>
<b>D</b>	<b>Index of Statements</b>	<b>545</b>
<b>E</b>	<b>Index of Definitions</b>	<b>555</b>
