<b>Foreword by T. V. Raman</b>	<b>v</b>
<b>Preface</b>	<b>vii</b>
<b>Introduction</b>	<b>1</b>
Who Should Read This Book?	2
How This Book Is Organised	2
<b>Part I. Background to Spoken Dialogue Technology</b>	<b>5</b>
<b>1. Talking with Computers: Fact or Fiction?</b>	<b>7</b>
A Little Fantasy	7
Further Reading	17
Exercises	18
<b>2. Spoken Dialogue Applications: Research Directions and Commercial Deployment</b>	<b>19</b>
Spoken Dialogue Applications	19
Research in Spoken Dialogue Technology	24
The Commercial Deployment of Spoken Dialogue Technology	37
Summary	41
Further Reading	42
Exercises	42
<b>3. Understanding Dialogue</b>	<b>45</b>
Dialogue: A Definition	45
Key Characteristics of Dialogue	46
Modelling Dialogue: Structure and Process	59
Summary	75
Further Reading	76
Exercises	77
<b>4. Components of a Spoken Dialogue System – Speech Input and Output</b>	<b>79</b>
Overview of a Spoken Dialogue System	79
Speech Recognition	81
Language Understanding	91

Language Generation .....	99
Text-to-Speech Synthesis .....	102
Summary .....	104
Further Reading .....	105
Exercises .....	105
<b>5. Dialogue Management .....</b>	<b>107</b>
Dialogue Initiative .....	108
Dialogue Control .....	111
Grounding .....	117
Accessing Information from an External Knowledge Source .....	121
Knowledge Sources for Dialogue Management .....	123
Issues for Developers .....	124
Summary .....	126
Further Reading .....	126
Exercise .....	126
<b>Part II. Developing Spoken Dialogue Applications .....</b>	<b>127</b>
<b>6. Dialogue Engineering: The Dialogue Systems</b>	
<b>Development Lifecycle .....</b>	<b>129</b>
Requirements Analysis .....	129
Requirements Specification .....	135
Design .....	139
Implementation .....	146
Testing .....	150
Evaluation .....	154
Summary .....	160
Further Reading .....	160
Exercises .....	161
<b>7. Developing a Spoken Dialogue System Using the CSLU Toolkit ...</b>	<b>163</b>
Tutorial 1: Basic Functions in RAD: The Pizza Application .....	164
Tutorial 2: Developing Basic Functions for a Student Information System .....	171
Tutorial 3: The Default Repair Subdialogue .....	174
Tutorial 4: Subdialogues .....	176
Tutorial 5: Digit Recognition .....	179
Tutorial 6: DTMF Input .....	181
Tutorial 7: Alpha-digit Recognition .....	184
Tutorial 8: Recognition Grammars .....	187
Tutorial 9: Speech Output in RAD .....	191
Tutorial 10: Using Tcl in RAD .....	192
Tutorial 11: Adding New Pronunciations and Creating a Dynamic Recogniser .....	194
Tutorial 12: Linking a RAD Application to a Database Using TclODBC .....	197
Summary .....	201

---

Further Reading .....	201
Ideas for Further Projects .....	202
<b>8. Developing Multimodal Dialogue Systems Using the CSLU Toolkit .....</b>	<b>205</b>
Tutorial 1: Setting Up the Animated Character .....	206
Tutorial 2: Login Dialogue .....	208
Tutorial 3: Exploring Emotions .....	211
Tutorial 4: Identifying Two-dimensional Shapes .....	217
Tutorial 5: Improving the Interface .....	224
Some Additional Features .....	227
Current Developments .....	229
Further Reading .....	229
Ideas for Further Projects .....	230
<b>9. Developing a Directed Dialogue System Using VoiceXML .....</b>	<b>231</b>
VoiceXML: A Language for Voice Enabling the World Wide Web .....	231
VoiceXML: The Language .....	233
Tutorials .....	233
Tutorial 1: Prompts, Responses and Verification .....	234
Tutorial 2: Repair in VoiceXML .....	241
Tutorial 3: Subdialogues .....	243
Tutorial 4: Digit Recognition .....	247
Tutorial 5: DTMF .....	249
Tutorial 6: Alphadigit Recognition .....	253
Tutorial 7: Modifying Speech Output .....	254
Tutorial 8: Navigation and Global Commands .....	257
Notes on ECMAScript .....	260
Further Reading .....	261
<b>10. More Advanced VoiceXML .....</b>	<b>263</b>
Tutorial 1: Mixed-initiative Dialogue .....	263
Tutorial 2: The Form Interpretation Algorithm (FIA) .....	266
Tutorial 3: Recognition Grammars .....	270
Tutorial 4: Variable and Grammar Scope .....	274
Tutorial 5: Dynamic VoiceXML and Web Server Applications .....	278
Tutorial 6: Dynamic Grammars .....	284
Further Reading .....	288
Ideas for Further Projects .....	288
<b>11. Multimodal Web-based Dialogue: XHTML + Voice and SALT .....</b>	<b>291</b>
XHTML + Voice .....	291
SALT .....	304
Summary .....	318
Further Reading .....	319
Ideas for Further Projects .....	320

<b>Part III. Advanced Applications</b>	<b>321</b>
<b>12. Advanced Dialogue Systems: Some Cases Studies</b>	<b>323</b>
DARPA Communicator	323
TRAINS and TRIPS	332
Conversational Architectures Project	341
Summary	347
Further Reading	348
<b>13. Research Topics in Spoken Dialogue Technology</b>	<b>349</b>
Information State Theory	349
Error Handling in Spoken Dialogue Systems	353
Adaptive Dialogue Systems	362
Learning Optimal Dialogue Strategies	371
Summary	375
Further Reading	376
<b>14. Future Directions: The Way Ahead</b>	<b>379</b>
Advanced Multimodal Systems	379
Future Directions	385
Concluding Remarks	388
<b>Appendixes</b>	<b>389</b>
<b>Appendix 1. Grammar Formats</b>	<b>391</b>
The XML and ABNF Grammar Formats	391
<b>Appendix 2. The CSLU Toolkit and Related Software for Chapters 7 and 8</b>	<b>395</b>
CSLU Toolkit	395
TclODBC	395
Setting Up a Data Source (ODBC)	395
<b>Appendix 3. Software for Chapters 9 and 10</b>	<b>397</b>
Downloading the IBM WebSphere VoiceServer SDK	397
Downloading and Installing Apache Tomcat	399
Java Server Pages (JSP)	399
<b>Appendix 4. Software for Chapter 11. IBM Multimodal Tools and Microsoft.NET Speech SDK</b>	<b>400</b>
IBM Multimodal Tools	400
Microsoft .NET Speech SDK	400
<b>Appendix 5. Spoken Dialogue Technology: Projects and Links</b>	<b>401</b>
<b>Appendix 6. Spoken Dialogue Technology: Toolkits and Resources</b>	<b>406</b>
Toolkits and Resources for Spoken Dialogue Technology	406
Web Sites for Hosted VoiceXML Applications	407
