

# Contents

<b>1 Introduction to Uncertain Systems</b>	<b>1</b>
1.1 Uncertainty and Uncertain Systems	1
1.2 Uncertain Variables	3
1.3 Basic Deterministic Problems	5
1.4 Structure of the Book	7
<b>2 Relational Systems</b>	<b>11</b>
2.1 Relational Knowledge Representation	11
2.2 Analysis and Decision Making for Relational Plants	14
2.3 Relational Plant with External Disturbances	18
2.4 Determinization	22
2.5 Discrete Case	25
<b>3 Application of Random Variables</b>	<b>29</b>
3.1 Random Variables and Probabilistic Forms of Knowledge Representations	29
3.2 Functional Plants with Random Parameters. Continuous Case	32
3.3 Functional Plants with Random Parameters. Discrete Case	39
3.4 Empirical Interpretations	41
3.5 Relational Plants with Random Parameters	44
3.6 Determinization	48
3.7 Non-parametric Uncertainty. Continuous Case	54
3.8 Non-parametric Uncertainty. Discrete Case	58
<b>4 Uncertain Logics and Variables</b>	<b>63</b>
4.1 Uncertain Logic	63
4.2 Other Versions of Uncertain Logic	67
4.3 Uncertain Variables	71
4.4 Additional Description of Uncertain Variables	76
4.5 Functions of Uncertain Variables	78
<b>5 Application of Uncertain Variables</b>	<b>85</b>
5.1 Analysis Problem for a Functional Plant	85
5.2 Decision Making Problem for a Functional Plant	86
5.3 External Disturbances	88
5.4 Analysis for Relational Plants with Uncertain Parameters	93
5.5 Decision Making for Relational Plants with Uncertain Parameters	98

5.6	Computational Aspects	103
5.7	Non-parametric Uncertainty	108
5.8	Non-parametric Problems for a Plant with External Disturbances	115
<b>6</b>	<b>Fuzzy Variables, Analogies and Soft Variables</b>	<b>123</b>
6.1	Fuzzy Sets and Fuzzy Numbers	123
6.2	Application of Fuzzy Variables in Analysis and Decision Problems	129
6.3	Plant with External Disturbances	134
6.4	Comparison of Uncertain Variables with Random and Fuzzy Variables	140
6.5	Comparisons and Analogies for Non-parametric Problems	143
6.6	Introduction to Soft Variables	149
6.7	Application of Soft Variables to Non-parametric Problems	151
6.8	Generalized Non-parametric Problems	153
<b>7</b>	<b>Systems with Logical Knowledge Representation</b>	<b>155</b>
7.1	Logical Knowledge Representation	155
7.2	Analysis and Decision Making Problems	157
7.3	Logic-algebraic Method	159
7.4	Analysis and Decision Making for a Plant with Random Parameters	162
7.5	Analysis and Decision Making for a Plant with Uncertain Parameters	164
7.6	Uncertain and Random Logical Decision Algorithms	165
<b>8</b>	<b>Dynamical Systems</b>	<b>169</b>
8.1	Relational Knowledge Representation	169
8.2	Analysis and Decision Making for Dynamical Plants with Uncertain Parameters	175
8.3	Analysis and Decision Making for Dynamical Plants with Random Parameters	182
8.4	Optimization of Random and Uncertain Multistage Decision Process	184
8.5	Applications of Uncertain Variables for a Class of Knowledge-based Assembly Systems	189
8.5.1	Knowledge Representation and Decision Problem	190
8.5.2	Assembly Process with Uncertain Parameters	193
8.6	Non-parametric Problems	196
<b>9</b>	<b>Parametric Optimization of Decision Systems</b>	<b>201</b>
9.1	General Idea of Parametric Optimization and Adaptation	201
9.2	Uncertain Controller in a Closed-loop System	206
9.3	Random Controller in a Closed-loop System	210
9.4	Descriptive and Prescriptive Approaches	212
9.5	Fuzzy Controller in a Closed-loop System	216
9.6	Quality of Decisions Based on Non-parametric Descriptions	220
<b>10</b>	<b>Stability of Uncertain Dynamical Systems</b>	<b>225</b>
10.1	Introduction	225

10.2	Stability Conditions	227
10.3	Special Cases	230
10.3.1	Additive Uncertainty	230
10.3.2	Multiplicative Uncertainty	235
10.4	Examples	238
10.5	An Approach Based on Random Variables	243
10.6	An Approach Based on Uncertain Variables	251
10.7	Stabilization	254
<b>11</b>	<b>Learning Systems</b>	<b>259</b>
11.1	Learning System Based on Knowledge of the Plant	259
11.1.1	Knowledge Validation and Updating	260
11.1.2	Learning Algorithm for Decision Making in a Closed-loop System	262
11.2	Learning System Based on Knowledge of Decisions	263
11.2.1	Knowledge Validation and Updating	264
11.2.2	Learning Algorithm for Decision Making in a Closed-loop System	266
11.3	Learning Algorithms for a Class of Dynamical Systems	269
11.3.1	Knowledge Validation and Updating	270
11.3.2	Learning Control System	273
11.3.3	Example	274
11.4	Learning Algorithms for a Class of Knowledge-based Assembly Systems	278
11.4.1	Knowledge Validation and Updating	278
11.4.2	Learning Algorithm for Decision Making in a Closed-loop System	281
<b>12</b>	<b>Complex Problems and Systems</b>	<b>283</b>
12.1	Decision Problems for Plants with Uncertain and Random Parameters	283
12.2	Other Formulations. Three-level Uncertainty	289
12.3	Complex Systems with Distributed Knowledge	292
12.3.1	Complex Relational System	292
12.3.2	Complex System with Uncertain and Random Parameters	295
12.4	Knowledge Validation and Updating	297
12.4.1	Validation and Updating of the Knowledge Concerning the System	298
12.4.2	Validation and Updating of the Knowledge Concerning the Decision Making	299
12.5	Learning System	302
<b>13</b>	<b>Complex of Operations</b>	<b>313</b>
13.1	Complex of Parallel Operations with Relational Knowledge Representation	313
13.2	Application of Uncertain Variables	316
13.3	Special Cases and Examples	320
13.4	Decomposition and Two-level Control	325
13.5	Application of Random Variables	328

13.6	Application to Task Allocation in a Multiprocessor System	331
13.7	Learning Algorithms	335
<b>14</b>	<b>Pattern Recognition</b>	339
14.1	Pattern Recognition Based on Relational Knowledge Representation	339
14.2	Application of the Logic-algebraic Method	341
14.3	Application of Uncertain Variables	344
14.4	Application of Random Variables	350
14.5	Non-parametric Problems	353
14.6	Learning Algorithms	355
<b>Conclusions</b>		361
<b>References</b>		363
