1 Overview	1
1.1 Introduction	1
1.2 Historical Overview	2
1.3 Plan of the Book	8
1.4 References	12
2 Fundamental Concepts	13
2.1 Introduction	13
2.2 Conventional Perturbation Theory	15
2.3 Integrability	18
2.3.1 Noether's Theorem	19
2.3.2 Hidden Symmetries	21
2.3.3 Poincaré Surface of Section	24
2.4 Nonlinear Resonance and Chaos	28
2.4.1 Single-Resonance Hamiltonians	28
2.4.2 Two-Resonance Hamiltonian	32
2.5 KAM Theory	35
2.6 The Definition of Chaos	38
2.6.1 Lyapounov Exponent	39
2.6.2 KS Metric Entropy and K -Flows	43

2.7	Time-Dependent Hamiltonians	47
2.8	Conclusions	54
2.9	Problems	55
2.10	References	56
3	Area-Preserving Maps	58
3.1	Introduction	58
3.2	Twist Maps	60
3.2.1	Derivation of a Twist Map from a Torus	60
3.2.2	Generating Functions	62
3.2.3	Birkhoff Fixed Point Theorem	63
3.2.4	The Tangent Map	64
3.2.5	Homoclinic and Heteroclinic Points	66
3.3	Melnikov Distance	71
3.4	Whisker Maps	74
3.5	The Standard Map	77
3.5.1	Rational and Irrational Orbits	78
3.5.2	Accelerator Modes	81
3.6	Scaling Behavior of Noble KAM Tori	85
3.6.1	Rational Approximates	85
3.6.2	Scaling Properties of Twist Maps	88
3.7	Renormalization in Twist Maps	95
3.7.1	Integrable Twist Map	95
3.7.2	Nonintegrable Twist Map	98
3.7.3	The Universal Map	100
3.8	Bifurcation of M -Cycles	102
3.8.1	Some General Properties	102
3.8.2	The Quadratic Map	103
3.8.3	Scaling in the Quadratic de Vogelaere Map	105
3.9	Cantori	112
3.10	Diffusion in Two-Dimensional Twist Maps	117
3.10.1	Effect of Cantori	117
3.10.2	Diffusion in the Standard Map	123
3.11	Conclusions	126
3.12	Problems	130
3.13	References	130
4	Global Properties	134
4.1	Introduction	134
4.2	Important Models	136
4.2.1	Delta-Kicked Rotor (Standard Map)	136
4.2.2	The Duffing Oscillator	139
4.2.3	Driven Particle in Infinite Square-Well Potential	140
4.2.4	Driven One-Dimensional Hydrogen	141
4.3	Renormalization Map	146

4.3.1	The Paradigm Hamiltonian	147
4.3.2	The Renormalization Map	149
4.3.3	Fixed Points of the Renormalization Map	153
4.4	Application of Renormalization Predictions	158
4.4.1	Driven Square-Well System	158
4.4.2	Duffing Oscillator	161
4.5	Scattering Chaos	162
4.6	Stochastic Tiling	167
4.6.1	Delta-Kicked Harmonic Oscillator	167
4.6.2	Two Primary Resonances Model	168
4.7	Arnol'd Diffusion	170
4.7.1	Resonance Networks	171
4.7.2	Numerical Observations	174
4.7.3	Diffusion Along Separatrix Layers	175
4.7.4	Diffusion Coefficient	180
4.7.5	Some Applications	182
4.8	Conclusions	186
4.9	Problems	186
4.10	References	187
5	Random Matrix Theory	189
5.1	Introduction	189
5.2	Ensembles	192
5.2.1	Gaussian Ensembles	193
5.2.2	Circular Ensembles	196
5.3	Cluster Functions	197
5.3.1	Cluster Expansion of the Probability Densities	197
5.3.2	Probability Densities and Quaternion Determinants	199
5.3.3	Cluster Functions for Gaussian Ensembles	200
5.3.4	Cluster Functions for Circular Ensembles	202
5.4	Eigenvalue Number Density	204
5.4.1	Eigenvalue Number Density for Gaussian Ensembles	204
5.4.2	Eigenvalue Number Density for Circular Ensembles	210
5.5	Eigenvalue Correlations – Δ_3 -Statistic	211
5.5.1	Δ_3 -Statistic – General Expressions	211
5.5.2	Δ_3 -Statistics for Gaussian Ensembles	214
5.5.3	Δ_3 -Statistics for Circular Ensembles	220
5.6	Eigenvalue Nearest Neighbor Spacing Distribution (GOE)	223
5.6.1	Eigenvalue Spacing Distributions (N=2)	223
5.6.2	Nearest Neighbor Spacing Distribution ($N \rightarrow \infty$)	225
5.6.3	Approximate Nearest Neighbor Spacing Distributions for GOE ($N \rightarrow \infty$)	227
5.7	Eigenvector Statistics – Gaussian Ensembles	228
5.7.1	General Properties	229
5.7.2	Distribution of Eigenvector Components (GOE)	231

5.7.3	Distribution of Eigenvector Components (GUE)	232
5.7.4	Gaussian Symplectic Ensemble	233
5.8	Conclusions	234
5.9	Problems	235
5.10	References	235
6	Bounded Quantum Systems	237
6.1	Introduction	237
6.2	Quantum Integrability	240
6.3	Symmetries and Degeneracy	242
6.4	Quantum Billiards	246
6.4.1	The Rectangular Billiard	247
6.4.2	The Stadium	249
6.4.3	The Sinai Billiard	257
6.4.4	The Ripple Billiard	258
6.5	The Quantized Baker's Map	264
6.6	Time Average as an Invariant	269
6.7	Integrable and Nonintegrable Spin Systems	271
6.7.1	Classical Spin Models	271
6.7.2	Quantum Spin Models	278
6.7.3	Two-Dimensional Clusters with N Spin $\frac{1}{2}$ Objects	281
6.8	Anharmonic Oscillators	282
6.8.1	Polynomial Anharmonicity	282
6.8.2	Coupled Morse Oscillators	284
6.9	Conclusions	288
6.10	Problems	289
6.11	References	289
7	Manifestations of Chaos in Quantum Scattering Processes	293
7.1	Introduction	293
7.2	Scattering Theory	297
7.2.1	Hamiltonian	298
7.2.2	Energy Eigenstates	301
7.2.3	The Reaction Matrix	302
7.2.4	The Scattering Matrix	305
7.3	Wigner-Smith and Partial Delay Times	310
7.3.1	Delay Time of a Wave Packet	310
7.3.2	Delay Times for Multichannel Scattering	311
7.3.3	Delay Times and Complex Poles	314
7.4	Scattering Theory and GOE	316
7.4.1	The Average S-Matrix	317
7.4.2	When Does a GOE Hamiltonian Yield a COE S-Matrix?	318
7.4.3	S-Matrix Correlation Function (GOE)	323

7.4.4	Delay Time Density	326
7.5	S-Matrix Correlation Functions (COE)	327
7.6	Green's Function and S-Matrix	330
7.6.1	The Green's Function	330
7.6.2	Green's Function for Quantum Waveguide	331
7.6.3	Transmission Amplitudes and the Green's Function	332
7.7	Absorption Spectrum and Green's Function	336
7.8	Experimental Observation of RMT Predictions	339
7.8.1	Experimental Nuclear Spectral Statistics	339
7.8.2	Experimental Molecular Spectral Statistics	341
7.9	Conclusions	342
7.10	Problems	344
7.11	References	345
8	Semiclassical Theory—Path Integrals	348
8.1	Introduction	348
8.2	Green's Function and Density of States	350
8.3	The Path Integral	351
8.3.1	The General Case, $\hat{H} = \hat{T} + \hat{V}$	351
8.4	Semiclassical Approximation	354
8.4.1	Method of Stationary Phase	354
8.4.2	The Semiclassical Green's Function	355
8.4.3	Conjugate Points	360
8.5	Energy Green's Function	362
8.5.1	General Expression	362
8.5.2	Density of States	368
8.6	Δ_3 -Statistic for a Rectangular Billiard	372
8.6.1	Energy Green's Function for a Rectangular Billiard	372
8.6.2	Density of States for the Rectangular Billiard	374
8.6.3	Semiclassical Expression for the Δ_3 -Statistic	377
8.7	Gutzwiller Trace Formula	379
8.7.1	Response Function for Chaotic Systems	380
8.8	Anisotropic Kepler System	385
8.9	Diamagnetic Hydrogen	389
8.9.1	The Model	390
8.9.2	Absorption Cross Section	392
8.9.3	Experiment	393
8.9.4	Semiclassical Cross Section	395
8.10	Conclusions	398
8.11	Problems	399
8.12	References	399
