

Contents

Preface	v
Contributors	ix
1 Optimizing PCR for Clinical Diagnosis Michael P. Bulman	1
2 Current and Emerging Techniques for Diagnostic Mutation Detection: <i>An Overview of Methods for Mutation Detection</i> Claire F. Taylor and Graham R. Taylor	9
3 Mutation Scanning for the Clinical Laboratory: <i>DHPLC</i> John F. Harvey and Julian R. Sampson	45
4 Mutation Scanning for the Clinical Laboratory—Protein Truncation Test Yvonne Wallis	67
5 Mutation Scanning for the Clinical Laboratory: <i>Automated Fluorescent Sequencing</i> Andrew J. Wallace	81
6 Comparative Sequence Analysis Chris Mattocks, Patrick Tarpey, and Jo Whittaker	115
7 Gene Dosage Analysis by Multiplex Amplifiable Probe Hybridization John A. L. Armour, Isa A. Rad, Ed J. Hollox, Seyed M. Akrami, and Gareth S. Cross	125
8 Prenatal Detection of Chromosome Aneuploidy by Quantitative Fluorescence-PCR Kathy Mann	141
9 Fragile X Disease Valérie Biancalana and James Macpherson	157
10 Huntington's Disease Linda Meredith	183
11 Hematological Applications: <i>Hemoglobinopathies</i> John M. Old	203
12 Cystic Fibrosis Harry Cuppens, Elisabeth Dequeker, and Jean-Jacques Cassiman	221
13 Familial Adenomatous Polyposis Fiona Macdonald	245

14	Multiple Endocrine Neoplasia Types 1 and 2 Sian Ellard	267
15	Neurofibromatosis Type 1: A Common Familial Cancer Syndrome Meena Upadhyaya, Peter Thompson, Song Han, and David N. Cooper	285
16	Duchenne and Becker Muscular Dystrophy Alexander L. J. Kneppers, Ieke B. Ginjaar, and Egbert Bakker	311
17	Spinal Muscular Atrophy Hans Scheffer	343
18	Quality Management in Molecular Genetics Els Voorhoeve, Alexander L. J. Kneppers, and Simon Patton	359
19	Regulation of Genetic Testing in Clinical Practice Ulf Kristoffersson	369
	Index	377
