

Contents

Preface	v
Contributors	ix
1 From Natural to Artificial Chromosomes: <i>An Overview</i> Vittorio Sgaramella and Sandro Eridani	1
2 Methodologies Applied to Domestic Animal Chromosomes Leopoldo Iannuzzi	15
3 Mapping of the Hotspots of Recombination in Human DNA Cloned as Yeast Artificial Chromosomes Grzegorz Ira, Jacek Król, and Jan Filipiński	35
4 Genomic Imprinting and Its Effects on Genes and Chromosomes in Mammals Yuji Goto and Robert Feil	53
5 Centromeres and Neocentromeres G��rard Roiz��s, Christoph Grunau, J��r��me Buard, Albertina De Sario, and Jacques Puechberty	77
6 Identification of Start Sites of Bi-Directional DNA Synthesis at Eukaryotic DNA Replication Origins Alessandro Vindigni, Gulnara Abdurashidova, and Arturo Falaschi	105
7 Telomere Length Analysis and In Vitro Telomerase Assay Fiorentina Ascenzioni, Pier Assunta Fradiani, and Pierluigi Donini	123
8 Telomerization of Mammalian Cells and Transplantation of Telomerized Cells in Immunodeficient Mice Peter J. Hornsby	147
9 Chromosome-Based Vectors for Mammalian Cells: <i>An Overview</i> Han N. Lim and Christine J. Farr	167
10 Mammalian Artificial Chromosome Formation in Human Cells After Lipofection of a PAC Precursor Jose I. de las Heras, Leonardo D'Aiuto, and Howard Cooke	187
11 Use of Natural and Artificial Chromosome Vectors for Animal Transgenesis Yoshimi Kuroiwa, Kazuma Tomizuka, and Isao Ishida	207

12 Pronuclear Microinjection of Purified Artificial Chromosomes
for Generation of Transgenic Mice: *Pick-and-Inject Technique*
**Diane P. Monteith, Josephine D. Leung, Anita H. Borowski,
Deborah O. Co, Tünde Praznovszky, Frank R. Jirik,
Gyula Hadlaczky, and Carl F. Perez** 227

13 Modification of Human Bacterial Artificial Chromosome Clones
for Functional Studies and Therapeutic Applications
**Michael R. Orford, Duangporn Jamsai, Samuel McLenachan,
and Panayiotis A. Ioannou** 243

Index 267

Mammalian Artificial Chromosomes

Methods and Protocols

Sgaramella, V.; Eridani, S. (Eds.)

2004, XI, 269 p. 63 illus., 2 illus. in color., Hardcover

ISBN: 978-1-58829-096-0
