Preface	v
Contributors	xiii

PART I. INDUCTION AND DETECTION OF CHANGES IN CELL CYCLE PROGRESSION

1. Methods to Induce Cell Cycle Checkpoints <i>Howard B. Lieberman and Kevin M. Hopkins</i>	3
2. Methods for Synchronizing Mammalian Cells <i>Michael H. Fox</i>	11
3. Enrichment of Cells in Different Phases of the Cell Cycle by Centrifugal Elutriation <i>Tej K. Pandita</i>	17
4. Analysis of the Mammalian Cell Cycle by Flow Cytometry <i>Haiying Hang and Michael H. Fox</i>	23
5. Methods for Detecting Cells in S Phase <i>Wei-Hsin Sun and Melvin L. DePamphilis</i>	37
6. Yeast Cell Synchronization <i>Audra Day, Colette Schneider, and Brandt L. Schneider</i>	55
7. Analysis of the Budding Yeast <i>Saccharomyces cerevisiae</i> Cell Cycle by Morphological Criteria and Flow Cytometry <i>Hong Zhang and Wolfram Siede</i>	77
8. Analysis of the Fission Yeast <i>Schizosaccharomyces pombe</i> Cell Cycle <i>Eliana B. Gómez and Susan L. Forsburg</i>	93

PART II. ANALYSIS OF GENES INVOLVED IN CHECKPOINT CONTROL

9. Strategies to Isolate Evolutionarily Conserved Cell Cycle Regulatory Genes <i>Scott Davey</i>	115
10. Microarray Approaches for Analysis of Cell Cycle Regulatory Genes <i>Sally A. Amundson and Albert J. Fornace, Jr.</i>	125
11. Using the Yeast Genome-Wide Gene-Deletion Collection for Systematic Genetic Screens <i>Jian Zhang, Lisa Ottmers, and Brandt L. Schneider</i>	143

12. Gene Targeting in Cultured Human Cells <i>Todd A. Waldman</i>	163
13. Use of In Vivo Gap Repair for Isolation of Mutant Alleles of a Checkpoint Gene <i>Migdalisel Colòn and Nancy C. Walworth</i>	175
14. In Vitro Mutagenesis to Define Functional Domains <i>Jian Qin, Zhe Peng, and Maureen V. McLeod</i>	189
15. Use of Gene Overexpression to Assess Function in Cell Cycle Control <i>Erik K. Flemington and Antonio Rodriguez</i>	195
16. Histone Acetylation/Deacetylation As a Regulator of Cell Cycle Gene Expression <i>Chenguang Wang, Maofu Fu, and Richard G. Pestell</i>	207

PART III. ANALYSIS OF PROTEINS INVOLVED IN CHECKPOINT CONTROL

17. Cataloging Proteins in Cell Cycle Control <i>Kazimierz O. Wrzeszczynski and Burkhard Rost</i>	219
18. Multidimensional Proteomic Analysis of Proteolytic Pathways Involved in Cell Cycle Control <i>Michael W. Schmidt, Aruna Jain, and Dieter A. Wolf</i>	235
19. Purification and Identification of Protein Complexes That Control the Cell Cycle <i>Matthew A. Burtelow, Vladimir N. Podust, and Larry M. Karnitz</i>	247
20. <i>Xenopus</i> Cell-Free Extracts to Study DNA Damage Checkpoints <i>Vincenzo Costanzo and Jean Gautier</i>	255
21. Protein–Protein Interactions <i>Graziella Pedrazzi and Igor Stagljär</i>	269
22. Detection of Kinase and Phosphatase Activities <i>Sean M. Post and Eva Y.-H.P. Lee</i>	285
23. Monitoring Changes in the Subcellular Location of Proteins in <i>S. cerevisiae</i> <i>Diego Rua, Teresa Holzen, Benjamin S. Glick, Stephen J. Kron, and Douglas K. Bishop</i>	299

PART IV. CHROMOSOMES AND THE CELL CYCLE

24. Chromosomal Changes and Cell Cycle Checkpoints in Mammalian Cells <i>Charles R. Geard and Brian Ponnaiya</i>	315
------------------------------------------------------------------------------------------------------------------------------	-----

25. Detecting the Influence of Cell Cycle Regulatory Proteins
on Human Telomeres
Tej K. Pandita 329

26. Monitoring Spindle Assembly and Disassembly
in Yeast by Indirect Immunofluorescence
Rita K. Miller 341
