I. CHONDROGENESIS, CHONDROCYTES, AND CARTILAGE

1	Molecular Basis of Cell–Cell Interaction and Signaling in Mesenchymal Chondrogenesis	3
	<i>Rocky S. Tuan</i>	
2	Chondrocyte Cell Fate Determination in Response to Bone Morphogenetic Protein Signaling	17
	<i>Lillian Shum, Yuji Hatakeyama, Julius Leyton, and Kazuaki Nonaka</i>	
3	Regulation of Chondrocyte Differentiation	43
	<i>Andreia M. Ionescu, M. Hicham Drissi, and Regis J. O’Keefe</i>	
4	Continuous Expression of <i>Cbfa1</i> in Nonhypertrophic Chondrocytes Uncovers Its Ability to Induce Hypertrophic Chondrocyte Differentiation and Partially Rescues <i>Cbfa1</i> -Deficient Mice	55
	<i>Shu Takeda, Jean-Pierre Bonnamy, Michael J. Owen, Patricia Ducy, and Gerard Karsenty</i>	
5	Molecular Biology and Biosynthesis of Collagens	77
	<i>Johanna Myllyharju</i>	
6	Mechanotransduction Pathways in Cartilage	89
	<i>Qian Chen</i>	

II. CONTROL OF SKELETAL DEVELOPMENT

7	Molecular Genetic Analysis of the Role of the <i>HoxD</i> Complex in Skeletal Development: <i>Impact of the loxP/Cre System in Targeted Mutagenesis of the Mouse HoxD Complex</i>	101
	<i>Marie Kmita, Denis Duboule, and József Zákány</i>	
8	Control of Development and Homeostasis Via Regulation of BMP, Wnt, and Hedgehog Signaling	113
	<i>Renee Hackenmiller, Catherine Degnin, and Jan Christian</i>	
9	FGF4 and Skeletal Morphogenesis	131
	<i>Valerie Ngo-Muller, Shaoguang Li, Scott A. Schaller, Manjong Han, Jennifer Farrington, Minoru Omi, Rosalie Anderson, and Ken Muneoka</i>	
10	Retinoid Signaling and Skeletal Development	147
	<i>Andrea D. Weston and T. Michael Underhill</i>	

- 11 Retinoids and Indian Hedgehog Orchestrate Long Bone Development 159
Maurizio Pacifici, Chiara Gentili, Eleanor Golden, and Eiki Koyama

III. OSTEOLASTIC CELL DIFFERENTIATION

- 12 Synergy Between Osteogenic Protein-1 and Osteotropic Factors in the Stimulation of Rat Osteoblastic Cell Differentiation 173
John C. Lee and Lee-Chuan C. Yeh
- 13 Bone Morphogenic Proteins, Osteoblast Differentiation, and Cell Survival During Osteogenesis 185
Cun-Yu Wang
- 14 Osteoclast Differentiation 195
Sakamuri V. Reddy and G. David Roodman

IV. BONE INDUCTION, GROWTH, AND REMODELING

- 15 Soluble Signals and Insoluble Substrata: *Novel Molecular Cues Instructing the Induction of Bone* 217
Ugo Ripamonti, Nathaniel L. Ramoshebi, Janet Patton, Thato Matsaba, June Teare, and Louise Renton
- 16 Perichondrial and Periosteal Regulation of Endochondral Growth 229
Dana L. Di Nino and Thomas F. Linsenmayer
- 17 Computer Simulations of Cancellous Bone Remodeling 249
Jacqueline C. van der Linden, Harrie Weinans, and Jan A. N. Verhaar
- 18 Effects of Microgravity on Skeletal Remodeling and Bone Cells 263
Pierre J. Marie

V. BONE MINERALIZATION

- 19 Quantitative Analyses of the Development of Different Hard Tissues 279
Siegfried Arnold, Hans J. Höhling, and Ulrich Plate
- 20 Fetal Mineral Homeostasis and Skeletal Mineralization 293
Christopher S. Kovacs
- 21 Control of Osteoblast Function and Bone Extracellular Matrix Mineralization by Vitamin D 307
Johannes P. T. M. van Leeuwen, Marjolein van Driel, and Hulbert A. P. Pols

VI. SKELETAL DYSMORPHOLOGY

22	Role of <i>Pax3</i> and <i>PDGF-α Receptor</i> in Skeletal Morphogenesis and Facial Clefting	335
	<i>Simon J. Conway</i>	
23	Genetics of Achondroplasia and Hypochondroplasia	349
	<i>Giedre Grigelioniene</i>	
24	Effects of Boric Acid on <i>Hox</i> Gene Expression and the Axial Skeleton in the Developing Rat	361
	<i>Michael G. Narotsky, Nathalie Wéry, Bonnie T. Hamby, Deborah S. Best, Nathalie Pacico, Jacques J. Picard, Françoise Gofflot, and Robert J. Kavlock</i>	
25	Toxicant-Induced Lumbar and Cervical Ribs in Rodents	373
	<i>John M. Rogers, R. Woodrow Setzer, and Neil Chernoff</i>	
26	Experimental Skeletal Dysmorphology: <i>Risk Assessment Issues</i>	385
	<i>Rochelle W. Tyl, Melissa C. Marr, and Christina B. Myers</i>	
Index		415

The Skeleton

Biochemical, Genetic, and Molecular Interactions in
Development and Homeostasis

Massaro, E.J.; Rogers, J.M. (Eds.)

2004, XVIII, 428 p., Hardcover

ISBN: 978-1-58829-215-5
