PART I STUDYING RECOMBINATION EVENTS IN EUKARYOTES

1	Determination of Mitotic Recombination Rates by Fluctuation Analysis in <i>Saccharomyces cerevisiae</i> Rachelle Miller Spell and Sue Jinks-Robertson	3
2	Determination of Intrachromosomal Recombination Rates in Cultured Mammalian Cells Jason A. Smith and Alan S. Waldman	13
3	Intrachromosomal Homologous Recombination in <i>Arabidopsis thaliana</i> Waltraud Schmidt-Puchta, Nadiya Orel, Anzhela Kyryk, and Holger Puchta	25
4	Analysis of Recombinational Repair of DNA Double-Strand Breaks in Mammalian Cells With I-SceI Nuclease Jac A. Nickoloff and Mark A. Brenneman	35
5	Transformation of Monomorphic and Pleomorphic <i>Trypanosoma brucei</i> Richard McCulloch, Erik Vassella, Peter Burton, Michael Boshart, and J. David Barry	53
6	Forward Genetic Screens for Meiotic and Mitotic Recombination-Defective Mutants in Mice Laura Reinholdt, Terry Ashley, John Schimenti, and Naoko Shima	87

PART II RECOMBINATION AS A REPORTER OF GENOMIC INSTABILITY

7	Detecting Carcinogens With the Yeast DEL Assay Richard J. Brennan and Robert H. Schiestl	111
8	In Vivo DNA Deletion Assay to Detect Environmental and Genetic Predisposition to Cancer Ramune Reliene, Alexander J. R. Bishop, Jiri Aubrecht, and Robert H. Schiestl	125

PART III RECOMBINATION AS A TOOL FOR PRODUCING TARGETED GENETIC MODIFICATION

9 Gene Targeting at the Chromosomal Immunoglobulin Locus:
*A Model System for the Study of Mammalian Homologous
Recombination Mechanisms*
Mark D. Baker 143

10 DNA Fragment Transplacement in *Saccharomyces cerevisiae*:
Some Genetic Considerations
Glenn M. Manthey, Michelle S. Navarro, and Adam M. Bailis 157

11 Targeted Gene Modification Using Triplex-Forming
Oligonucleotides
Jean Y. Kuan and Peter M. Glazer 173

12 Using Nucleases to Stimulate Homologous Recombination
Dana Carroll 195

13 Enhancement of In Vivo Targeted Nucleotide Exchange
by Nonspecific Carrier DNA
Katie K. Maguire and Eric B. Kmiec 209

PART IV BIOCHEMISTRY OF RECOMBINATION

14 Chromatin Immunoprecipitation to Investigate
Protein–DNA Interactions During Genetic Recombination
Tamara Goldfarb and Eric Alani 223

15 Holliday Junction Branch Migration and Resolution Assays
Angelos Constantinou and Stephen C. West 239

Index 255
