# Contents

Preface .....	v
Contributors .....	xi
1 Sequencing Strategies for Parasite Genomes <i>Daniella Bartholomeu and Najib M. El-Sayed</i> .....	1
2 Annotation of Parasite Genomes <i>Matthew Berriman and Midori Harris</i> .....	17
3 Parasite Genome Databases and Web-Based Resources <i>Christiane Hertz-Fowler and Neil Hall</i> .....	45
4 Expressed Sequence Tags: <i>Medium-Throughput Protocols</i> <i>Claire Whitton, Jennifer Daub, Marian Thompson, and Mark Blaxter</i> .....	75
5 Expressed Sequence Tags: <i>Analysis and Annotation</i> <i>John Parkinson and Mark Blaxter</i> .....	93
6 Positive Selection Scanning of Parasite DNA Sequences <i>Winston A. Hide and Raphael D. Isokpehi</i> .....	127
7 RACE and RAGE Cloning in Parasitic Microbial Eukaryotes <i>Bryony A. P. Williams and Robert P. Hirt</i> .....	151
8 Amplified (Restriction) Fragment Length Polymorphism (AFLP) Analysis <i>Daniel K. Masiga and C. Michael R. Turner</i> .....	173
9 Minisatellites and MVR-PCR for the Individual Identification of Parasite Isolates <i>Annette MacLeod</i> .....	187
10 Analysis of Differentially Expressed Parasite Genes and Proteins Using Transcriptomics and Proteomics <i>Daniel C. Gare</i> .....	203
11 Gene Expression Studies Using Self-Fabricated Parasite cDNA Microarrays <i>Karl F. Hoffmann and Jennifer M. Fitzpatrick</i> .....	219
12 DNA Content Analysis on Microarrays <i>Upinder Singh, Preetam H. Shah, and Ryan C. MacFarlane</i> .....	237
13 Typing Single-Nucleotide Polymorphisms in <i>Toxoplasma gondii</i> by Allele-Specific Primer Extension and Microarray Detection <i>Chunlei Su, Christian Hott, Bernard H. Brownstein, and L. David Sibley</i> .....	249

14	Transfection of the Human Malaria Parasite <i>Plasmodium falciparum</i> <b>Brendan S. Crabb, Melanie Rug, Tim-Wolf Gilberger, Jennifer K. Thompson, Tony Triglia, Alexander G. Maier, and Alan F. Cowman</b> .....	263
15	A PCR-Based Method for Gene Deletion and Protein Tagging in <i>Trypanosoma brucei</i> <b>George K. Arhin, Shuiyuan Shen, Elisabetta Ullu, and Christian Tschudi</b> .....	277
16	Analysis of Gene Function in <i>Trypanosoma brucei</i> Using RNA Interference <b>Appolinaire Djikeng, Shuiyuan Shen, Christian Tschudi, and Elisabetta Ullu</b> .....	287
17	In Vitro Shuttle Mutagenesis Using Engineered Mariner Transposons <b>Kelly A. Robinson, Sophie Goyard, and Stephen M. Beverley</b> .....	299
18	Random Mutagenesis Strategies for Construction of Large and Diverse Clone Libraries of Mutated DNA Fragments <b>Sudsanguan Chusacultachai and Yongyuth Yuthavong</b> .....	319
19	Separation, Digestion, and Cloning of Intact Parasite Chromosomes Embedded in Agarose <b>Vanessa Leech, Michael A. Quail, and Sara E. Melville</b> .....	335
20	Chromosome Fragmentation in <i>Leishmania</i> <b>Pascal Dubessay, Christine Blaineau, Patrick Bastien, and Michel Pagès</b> .....	353
21	FISH Mapping for Helminth Genomes <b>Hirohisa Hirai and Yuriko Hirai</b> .....	379
22	Fiber-FISH: Fluorescence <i>In Situ</i> Hybridization on Stretched DNA <b>Klaus Ersfeld</b> .....	395
23	Yeast Two-Hybrid Assay for Studying Protein–Protein Interactions <b>Ahmed Osman</b> .....	403
24	From Genomes to Vaccines for Leishmaniasis <b>Carmel B. Stober</b> .....	423
	Index .....	439
