

Table of Contents

Solving Graph Problems by P Systems with Restricted Elementary Active Membranes	1
<i>Artiom Alhazov, Carlos Martín-Vide, Lingqiang Pan</i>	
Writing Information into DNA	23
<i>Masanori Arita</i>	
Balance Machines: Computing = Balancing	36
<i>Joshua J. Arulanandham, Cristian S. Calude, Michael J. Dinneen</i>	
Eilenberg P Systems with Symbol-Objects	49
<i>Francesco Bernardini, Marian Gheorghe, Mike Holcombe</i>	
Molecular Tiling and DNA Self-assembly	61
<i>Alessandra Carbone, Nadrian C. Seeman</i>	
On Some Classes of Splicing Languages	84
<i>Rodica Ceterchi, Carlos Martín-Vide, K.G. Subramanian</i>	
The Power of Networks of Watson-Crick D0L Systems	106
<i>Erzsébet Csuhaj-Varjú, Arto Salomaa</i>	
Fixed Point Approach to Commutation of Languages	119
<i>Karel Culik II, Juhani Karhumäki, Petri Salmela</i>	
Remarks on Relativisations and DNA Encodings	132
<i>Claudio Ferretti, Giancarlo Mauri</i>	
Splicing Test Tube Systems and Their Relation to Splicing Membrane Systems	139
<i>Franziska Freund, Rudolf Freund, Marion Oswald</i>	
Digital Information Encoding on DNA	152
<i>Max H. Garzon, Kiranchand V. Bobba, Bryan P. Hyde</i>	
DNA-based Cryptography	167
<i>Ashish Gehani, Thomas LaBean, John Reif</i>	
Splicing to the Limit	189
<i>Elizabeth Goode, Dennis Pixton</i>	

Formal Properties of Gene Assembly: Equivalence Problem for Overlap Graphs	202
<i>Tero Harju, Ion Petre, Grzegorz Rozenberg</i>	
n -Insertion on Languages	213
<i>Masami Ito, Ryo Sugiura</i>	
Transducers with Programmable Input by DNA Self-assembly	219
<i>Nataša Jonoska, Shiping Liao, Nadrian C. Seeman</i>	
Methods for Constructing Coded DNA Languages	241
<i>Nataša Jonoska, Kalpana Mahalingam</i>	
On the Universality of P Systems with Minimal Symport/Antiport Rules	254
<i>Lila Kari, Carlos Martín-Vide, Andrei Păun</i>	
An Algorithm for Testing Structure Freeness of Biomolecular Sequences	266
<i>Satoshi Kobayashi, Takashi Yokomori, Yasubumi Sakakibara</i>	
On Languages of Cyclic Words	278
<i>Manfred Kudlek</i>	
A DNA Algorithm for the Hamiltonian Path Problem Using Microfluidic Systems	289
<i>Lucas Ledesma, Juan Pazos, Alfonso Rodríguez-Patón</i>	
Formal Languages Arising from Gene Repeated Duplication	297
<i>Peter Leupold, Victor Mitrana, José M. Sempere</i>	
A Proof of Regularity for Finite Splicing	309
<i>Vincenzo Manca</i>	
The Duality of Patterning in Molecular Genetics	318
<i>Solomon Marcus</i>	
Membrane Computing: Some Non-standard Ideas	322
<i>Gheorghe Păun</i>	
The P Versus NP Problem Through Cellular Computing with Membranes	338
<i>Mario J. Pérez-Jiménez, Alvaro Romero-Jiménez, Fernando Sancho-Caparrini</i>	
Realizing Switching Functions Using Peptide-Antibody Interactions	353
<i>M. Sakthi Balan, Kamala Krithivasan</i>	

Plasmids to Solve #3SAT	361
<i>Rani Siromoney, Bireswar Das</i>	
Communicating Distributed H Systems with Alternating Filters	367
<i>Sergey Verlan</i>	
Publications by Thomas J. Head	385
Author Index	391

Aspects of Molecular Computing

Essays Dedicated to Tom Head on the Occasion of His
70th Birthday

Jonoska, N.; Păun, G.; Rozenberg, G. (Eds.)

2004, XII, 396 p., Softcover

ISBN: 978-3-540-20781-8
