Preface	vii
1 Introduction	1
<i>Michel Beuthe, Veli Himanen, Aura Reggiani and Luca Zamparini</i>	
 PART A: Technological Developments in Transport	
2 The Political Economy of Transport Innovations	11
<i>Eran Feitelson and Ilan Salomon</i>	
2.1 Introduction	11
2.2 Factors That Affect Adopting of Innovations: A Brief Review	12
2.3 A Political Economy Framework for Analyzing Transport Innovation Adoption	14
2.4 The Experience of Three Innovations: Road Pricing, Rail and Telecommuting Centres	17
2.5 Discussion: The Sources of Support or Opposition	20
2.6 Conclusions	23
3 ICTs and Accessibility: An Action Space Perspective on the Impact of New Information and Communication Technologies	27
<i>Martin Dijst</i>	
3.1 Introduction	27
3.2 Accessibility Dimensions and Action Spaces	28
3.3 Spatio-temporal Perspective on New ICTs	31
3.4 Perpetual Perspective on New ICTs	37
3.5 Conclusions and Future Research	40

4	E-commerce and the Container Shipping Industry	47
	<i>Hans van Ham and Bart Kuipers</i>	
4.1	Introduction	47
4.2	The Container Shipping Industry	48
4.3	E-commerce and E-business	53
4.4	Container Shipping and E-commerce	61
4.5	Conclusions	65
5	In Search of Urban Futures in the E-economy	69
	<i>Marina van Geenhuizen and Peter Nijkamp</i>	
5.1	Setting the Scene	69
5.2	Limited Access to Global Grids	71
5.3	Limits of Electronic Communication	72
5.4	Value Chain Adjustment and Urban Functions	75
5.5	Urban Futures and Uncertainty	80

PART B: New Forms of Travel Behaviour

6	Inertia of Travel Behaviour: A Stated Preference Analysis of Commuting	87
	<i>Job van Exel and Piet Rietveld</i>	
6.1	Introduction	87
6.2	Method	88
6.3	Past and Current Commuting Behaviour	91
6.4	Stated Preference Experiment	97
6.5	The Model	103
6.6	Conclusions	110
7	The Same Procedure as Last Weekend: Routines and Leisure Mobility	123
	<i>Martin Lanzendorf</i>	
7.1	Introduction	123
7.2	Theoretical Background: A Rational Choice Model	124
7.3	Data and Methodology	127
7.4	Comparing Workday Travel with Weekend Leisure Travel	129
7.5	Decision Making and Routines for Leisure Travel	133
7.6	The Impact of Neighbourhood, Car Ownership and Mobility Style on the Decision Making Process	139

7.7	Conclusions	141
8	Parking Policy Measures and Their Effects on Shopping and Work Trips	147
	<i>Jari Kurri</i>	
8.1	Introduction	147
8.2	Data and Methods	148
8.3	Results	155
8.4	Discussion	165
9	Acceptability of Marginal Cost-based Pricing in Urban Transport	169
	<i>Jens Schade</i>	
9.1	Introduction	169
9.2	Previous Research	170
9.3	Theoretical Background	171
9.4	Method	175
9.5	Results	177
9.6	Summary and Discussion	183
 PART C: Freight Transport Innovations		
10	Transport and Logistics as Network Competencies in a Localized Industrial Cluster	191
	<i>Leif Gjesing Hansen</i>	
10.1	Introduction	191
10.2	Freight Transport as a Residual of Firms' Location and Trading Links	193
10.3	Transport Systems as a Resource for Production Systems	194
10.4	The Interactions between Systems of Production and Transportation: A Network Framework	197
10.5	The Furniture Industry of Salling: An Example of Regional Transport Networks and Capabilities	199
10.6	Conclusions	206

11 A Methodology to Evaluate Potential Locations for Intermodal Barge Terminals: A Policy Decision Support Tool	211
<i>Cathy Macharis</i>	
11.1 Introduction	211
11.2 Overview of the Literature	212
11.3 Overview of the Methodology Adopted	213
11.4 Network Model	215
11.5 Result of the Analysis	216
11.6 Multi-criteria Analysis	221
11.7 Conclusion	232
12 Rail-rail Hub-terminals as an Alternative for Shunting: An Explorative Comparative Case Study	235
<i>Yvonne Bontekoning and Jan Jacob Trip</i>	
12.1 Introduction	235
12.2 Layout and Operations: Shunting Versus Hub-operations	237
12.3 Research Approach	240
12.4 Results of the Performance Comparison	242
12.5 Discussion	247
12.6 Conclusions	249
PART D: Scenario Perspectives	
13 Light Rail: Backbone of European Urban Regions	255
<i>Hugo Priemus</i>	
13.1 Introduction	255
13.2 Light Rail: Definitions and Typology	257
13.3 Successful Light Rail in Some French and German Cities	260
13.4 Japanese Cities: Synergy between Public Transport and Real Estate Development	261
13.5 Promotion of Economic Vitality and Accessibility of Central Cities in the Netherlands	263
13.6 Lessons from International Experiences	265
13.7 Feeder and Interconnecting Public Transport	268
13.8 Conclusions	270

14 Scenario Building for the Future of the Tel Aviv Metropolitan Area and Its Transportation System Using the Delphi Method	275
<i>Yoram Shiftan, Sigal Kaplan and Shalom Hakkert</i>	
14.1 Introduction	275
14.2 Background	276
14.3 Sustainable Development and Transportation	278
14.4 Methodology	280
14.5 Results and Discussion	283
14.6 Conclusions	289
 15 Assessing Spatial Planning Policy with Accessibility Indicators: The Case of Lille's Metropolis Scenario	 293
<i>Alain L'Hostis, Philippe Menerault and Christophe Decoupigny</i>	
15.1 Introduction	293
15.2 The Scenarios	294
15.3 Comparison of the Scenarios with the Regional Council and State Orientations	298
15.4 Method Principles	299
15.5 Is the 'Hegemonic Metropolis' a Reality?	301
15.6 Intermodality for Reinforcing the Internal Coherence of the Metropolis	306
15.7 Conclusion	310
 16 European Innovations in Multi-modal Assessment: How Will They Support and Enhance the Public Policy Process?	 313
<i>John Nellthorp</i>	
16.1 Background	313
16.2 Multi-modal Transport Appraisal	313
16.3 Spatial Output and Employment Effects	316
16.4 Refinements in Theory and Practice of Multi-modal Appraisal	320
16.5 Participation by Stakeholders	323
16.6 Shift in Governments' Perspectives on Appraisal	324
16.7 Links and Conclusions	327
 List of Figures	 333
List of Tables	337
List of Contributors	341

Transport Developments and Innovations in an Evolving
World

Beuthe, M.; Himanen, V.; Reggiani, A.; Zamparini, L.
(Eds.)
