

Table of Contents

| | |
|--|-----------|
| 1. Towards Novel Methods in the Human Sciences | 1 |
| 1.1. Western Methodological Traditions | 2 |
| 1.2. In the Beginning, There Was Imprecision | 5 |
| 1.3. What Is Soft in Soft Computing? | 8 |
| 1.4. Justifications for Soft Computing Models | 9 |
| 2. Brief Introduction to Fuzzy Set Theory | 14 |
| 2.1. Fuzzy Sets | 14 |
| 2.2. Basic Operations of Fuzzy Sets | 17 |
| 2.3. Fuzzy Sets and Probability | 21 |
| 2.4. Fuzzy Relations and Graphs | 23 |
| 2.4.1. Compositions of Fuzzy Relations | 25 |
| 2.4.2. Fuzzy Graphs | 28 |
| 2.5. Fuzzy Functions | 30 |
| 3. Concise Logopedics for Soft Computing Models | 35 |
| 3.1. Quasi-Natural Language | 36 |
| 3.1.1. Syntactic Aspects | 36 |
| 3.1.2. Semantic and Pragmatic Aspects | 43 |
| 3.2. Linguistic Approximation | 47 |
| 4. The Approximate Truth about the Degrees of Truth | 49 |
| 4.1. A Brief Exegesis of Truth | 49 |
| 4.1.1. Two Conceptions of Truth | 49 |
| 4.1.2. Information, Knowledge and Truth | 49 |
| 4.2. Sorites Paradox and Truth | 50 |
| 4.3. Probability and Truth | 51 |
| 4.4. Fuzzy Metric Truth | 53 |
| 4.4.1 Atomic Sentences | 53 |
| 4.4.2. Negation and Compound Sentences | 57 |
| 4.4.3. From Truth to Linguistic Values | 59 |
| 4.4.4. Approximate Quantifiers | 61 |

| | |
|--|-----|
| 5. Approximate Reasoning | 63 |
| 5.1. Principal Types of Reasoning | 63 |
| 5.2. Fuzzy Reasoning | 65 |
| 5.2.1. Prevailing Fuzzy Reasoning | 68 |
| 5.2.2. FMT Reasoning with Prevailing Algorithms | 72 |
| 5.3. Generalized Modus Ponens Reasoning | 75 |
| 6. Quantitative Data Examination | 84 |
| 6.1. Soft Computing Approach to Descriptive Statistics | 84 |
| 6.1.1. Soft Measurement | 85 |
| 6.1.2. Soft Data Compression | 86 |
| 6.1.3. Soft Computing Approach to Statistics Calculation | 95 |
| 6.1.3.1. Averages | 95 |
| 6.1.3.2. Standard Deviation and Variance | 100 |
| 6.2. Soft Inferential Statistics | 103 |
| 6.2.1. Typical Soft Random Distributions | 104 |
| 6.2.2. Soft Statistical Hypothesis Assessment | 109 |
| 6.2.3. Entailment and Causality | 111 |
| 6.2.3.1. Contingency Tables | 112 |
| 6.2.3.2. Elaboration models | 123 |
| 6.2.4. Regression Models, Preliminary Considerations | 134 |
| 6.2.4.1. Regression Model with One Independent Variable | 137 |
| 6.2.4.2. Regression Model with Two Independent Variables | 145 |
| 6.2.5. Criteria for Assessing the Goodness of Soft Computing Models | 149 |
| 6.2.6. Regression Models with Training, Control and Validation Data | 152 |
| 6.2.6.1. Example of Tuning with Control Data | 154 |
| 6.2.7. Models Based on Analysis of Variance | 174 |
| 6.2.7.1. Conventional Analysis of Variance | 174 |
| 6.2.8. Analysis of Variance in Soft Computing Model Goodness Assessments | 183 |
| 6.2.9. Soft Computing Approach to Analysis of Variance | 186 |
| 7. Soft Computing Models for Complex Systems | 198 |
| 7.1. A Simple Feedback System | 198 |
| 7.2. Two Classic Problems in Reasoning | 207 |
| 7.2.1. Sorites Paradox | 207 |
| 7.2.2. Prisoner's Dilemma | 211 |
| 7.3. An Adaptive Fuzzy Cognitive Map | 215 |
| 7.4. Cognitive Maps and Virtual Worlds | 219 |

| | |
|--|-----|
| | XV |
| 7.5. Reasoning with Hypotheses | 223 |
| 7.5.1. Methodological Aspects of Hypotheses | 223 |
| 7.5.2. Soft Computing and Hypothetico-Deductive Reasoning | 231 |
| 8. Towards Soft Computing Applications in Qualitative Research | 237 |
| 8.1. Qualitative Models and Hypermedia | 237 |
| 8.2. Challenges to Computer Models – How Can We Apply Qualitative Research? | 239 |
| 8.3. Challenges to Qualitative Research – How Can We Apply Soft Computing Methods? | 245 |
| 9. Conclusions | 249 |
| List of Figures | 252 |
| List of Tables | 260 |
| List of Boxes | 262 |
| References | 264 |
| Subject Index | 270 |

Soft Computing Methods in Human Sciences

Niskanen, V.A.

2004, XV, 272 p., Hardcover

ISBN: 978-3-540-00466-0
