Foundations

Hypercausality, Randomisation

Local and Global Independence 1

Alireza Daneshkhah, Jim.Q.Smith

1	Introduction	1
2	Relationships Between Causality And Parameter Independence	4
3	The Multicausal Essential Graph	10
4	Discussion	14
	References	17

Interface Verification for Multiagent Probabilistic Inference . . 19

Y. Xiang, X. Chen

1	Introduction	19
2	Overview of MAMSBNs	20
3	The Issue of Cooperative Verification	23
4	Checking Private Parents	24
5	Processing Public Parents	25
6	Cooperative Verification in a General Hypertree	33
7	Complexity	34
8	Alternative Methods of Verification	35
9	Conclusion	37
	References	38

Propagation

Optimal Time–Space Tradeoff In Probabilistic Inference 39

David Allen, Adnan Darwiche

1	Introduction	39
2	Any–Space Inference	40
3	The Cache Allocation Problem	44
4	Time–Space Tradeoff	48
5	Conclusions	54
	References	55

Hierarchical Junction Trees 57

Roberto O. Puch, Jim Q. Smith, Concha Bielza

1	Introduction	57
2	Bayesian Networks	59
3	Junction Trees	61

4	Forecasting in the Dynamic Setting Using Junction Trees	62
5	Hierarchical Junction Trees	64
6	Conclusions	74
	References	74

Algorithms for Approximate Probability

	Propagation in Bayesian Networks	77
	<i>Andrés Cano, Serafín Moral, Antonio Salmerón</i>	
1	Approximate Probability Propagation	77
2	The Complexity of Probability Propagation	78
3	The Variable Elimination Algorithm	79
4	Shenoy-Shafer Propagation	81
5	Monte Carlo Algorithms for Probability Propagation	88
6	Conclusions	97
	References	97

Abductive Inference in Bayesian Networks: A Review 101

José A. Gámez

1	Introduction	101
2	Abductive Inference in Probabilistic Reasoning	102
3	Solving Total Abduction (MPE) in BNs	105
4	Solving Partial Abduction (MAP) in BNs	109
5	Complexity Results	115
6	Conclusions	116
	References	117

Influence Diagrams

Causal Models, Value of Intervention, and Search for Opportunities 121

Tsai-Ching Lu, Marek J. Druzdzel

1	Introduction	121
2	Causal Models	123
3	Augmented Models	126
4	Value of Intervention	128
5	Search for Opportunities	130
6	Non-intervening Action	133
7	Discussion	133
	References	135

Advances in Decision Graphs 137

Thomas D. Nielsen, Finn V. Jensen

1	Introduction	137
2	Influence Diagrams	138
3	Modeling Decision Problems	142

4	Evaluating Decision Problems	150
5	Model Analysis	154
	References	156

Real-World Applications of Influence Diagrams 161

Manuel Gómez

1	Decision Making Under Uncertainty	161
2	Artificial Intelligence, Expert Systems and Decision Support Systems	162
3	Techniques to Build Complex DSSs	163
4	Real World Applications	167
5	Conclusions	173
	References	173

Learning

Learning Bayesian Networks by Floating Search Methods..... 181

Rosa Blanco, Iñaki Inza, Pedro Larrañaga

1	Introduction.....	181
2	Learning Bayesian Networks by a Score+search Approach	182
3	Floating Methods to Learn Bayesian Networks Structures	187
4	Experimental Results.....	191
5	Conclusions	195
	References	196

A Graphical Meta-Model for Reasoning about Bayesian Network Structure..... 201

Luis M. de Campos, José A. Gámez, J. Miguel Puerta

1	Introduction.....	201
2	Learning Bayesian Networks.....	202
3	Learning a Graphical Meta-Model.....	206
4	Examples	209
5	Concluding Remarks	212
	References	214

Restricted Bayesian Network Structure Learning 217

Peter J.F. Lucas

1	Introduction.....	217
2	Background	219
3	FANs: Forest-Augmented Bayesian Networks	222
4	Evaluation	225
5	Discussion	230
	References	232

Scaled Conjugate Gradients for Maximum Likelihood: An Empirical Comparison with the EM Algorithm 235

Kristian Kersting, Niels Landwehr

1	Introduction	235
2	Bayesian Networks	237
3	Basic Maximum Likelihood Estimation	238
4	“EM-hard” and “EM-easy” Problems	241
5	(Scaled) Conjugate Gradients	241
6	Experiments	244
7	Related Work	252
8	Conclusions	252
	References	253

Learning Essential Graph Markov Models

from Data	255
----------------------------	-----

Robert Castelo, Michael D. Perlman

1	Introduction	255
2	Background Concepts	256
3	Factorization of a Multivariate Distribution According to an Essential Graph	257
4	Bayesian Scoring Metric for Multinomial Data	259
5	Equivalence with Respect to Other Factorizations	263
6	Local Computations and Bayes Factors	264
7	Concluding Remarks	267
	References	268

Applications

Fast Propagation Algorithms for Singly Connected Networks and their Applications to Information Retrieval 271

Luis M. de Campos, Juan M. Fernández-Luna, Juan F. Huete

1	Introduction	271
2	Preliminaries: Information Retrieval	273
3	The Bayesian Network Retrieval Model	273
4	Proposals for Reducing the Propagation Time	276
5	Experiments and Results	279
6	Related works	282
7	Concluding Remarks	286
	References	287

Continuous Speech Recognition Using Dynamic Bayesian Networks: A Fast Decoding Algorithm 289

Murat Deviren, Khalid Daoudi

1	Introduction	289
2	Dynamic Bayesian Networks	290

3	Structure Search Class	294
4	Learning Algorithm	296
5	Decoding Algorithm	299
6	Experiments	304
	References	307
 Applications of Bayesian Networks in Meteorology		309
<i>Rafael Cano, Carmen Sordo, José M. Gutiérrez</i>		
1	Introduction	309
2	Area of Study and Available Data	310
3	Some Common Problems in Meteorology	312
4	Bayesian Networks. Learning from Data	314
5	Applications of Bayesian Networks	320
	References	327

Advances in Bayesian Networks

Gámez, J.A.; Moral, S.; Salmerón Cerdan, A. (Eds.)

2004, XI, 328 p., Hardcover

ISBN: 978-3-540-20876-1
