

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>The Early History of Bioenergy</b>	<b>15</b>
2.1	Energy-Related Phase Transitions Toward Life	15
2.1.1	Catalysis	16
2.1.2	Reflexive Activity	20
2.1.3	Energy Transduction	25
2.2	Energy Control Mechanisms	31
2.3	Quantitative Consequences of Energy Control Mechanisms	33
2.4	Distribution of Energy Input	34
<b>3</b>	<b>The Origin of Cell Boundaries and Metabolism</b>	<b>39</b>
3.1	The Make-up of Life's Boundaries	42
3.2	The Early Evolution of Cellular Boundaries	44
3.3	Outcomes of an Early Boundary	50
3.4	Systems Without Defined Boundaries	51
3.5	Systems with Non-Specialized Boundaries	51
3.6	Self-Assembly of Specialized Boundaries	52
3.7	Boundary-Derived Properties of Life	53
3.8	Coupling of Spatial Seclusion with a Reflexive Activity	55
3.9	The Origin of Metabolism	57
<b>4</b>	<b>The Origin of Early Specificity.</b>	
	<b>The Order, Complexity and Diversity of Life</b>	<b>63</b>
4.1	Order	63
4.2	Complexity	64
4.3	Diversity	67
4.4	Specificity	69
4.5	Specificity of Polymer-Based Life	70
4.6	The Origin of Specificity	72
4.7	Transition from External to Internal Control	75
4.8	Major Events in the Early History of Specificity	76
4.9	The Origin of Feedback Mechanisms as a Source of Internal Stability	76
4.10	The Origin of Forward Regulation	78

4.11	Consequences of Internal Regulation . . . . .	78
4.12	Forced Oscillations and Periodic Clocks . . . . .	79
4.13	Specificity-Related Phase Transitions Toward Life . . . . .	79
4.14	Specificity-Related Minimal Requirements of Life . . . . .	80
<b>5</b>	<b>The Origin of Handedness . . . . .</b>	<b>81</b>
5.1	Chirality and Life . . . . .	83
5.2	Natural Sources of Chirality . . . . .	85
5.3	Evolutionary Steps Toward Biological Chirality . . . . .	89
5.4	Handedness-Related Steps Toward Life . . . . .	93
<b>6</b>	<b>The Early History of Bio-Information . . . . .</b>	<b>95</b>
6.1	Early Sources of Bio-Information . . . . .	100
6.2	Contextual vs. Nominative Information and Explicit vs. Cryptic Information . . . . .	102
6.3	Postulates of the Early Evolution of Bio-Information . . . . .	109
6.3.1	The Contextual Information Era . . . . .	110
6.3.2	The Mineral-to-Organic Era . . . . .	110
6.3.3	The Organic-to-Organic Era . . . . .	112
6.3.4	The Emergence of Encryption . . . . .	115
6.3.5	The Rise of the DNA World . . . . .	117
6.4	Information-Related Fundamental Phase Transitions Toward Life . . . . .	119
6.5	Minimal Requirements for the Emergence of Bio-Information . . . . .	120
<b>7</b>	<b>The Purpose-Like Nature of Life . . . . .</b>	<b>121</b>
<b>8</b>	<b>Assembling the Early Puzzle of Life . . . . .</b>	<b>139</b>
8.1	The First Step Toward Life: Coupling Catalysis with Reflexive Activity . . . . .	142
8.2	Self-Assembly . . . . .	143
8.3	Seclusion Within Specialized Boundaries and the Origin of Metabolism . . . . .	144
8.4	Probabilistic Jumps Toward Catalytic Specificity . . . . .	145
8.5	Feedback Regulation . . . . .	145
8.6	Internalization of Minimal Specificity . . . . .	145
8.7	Control over Chirality . . . . .	146
8.8	Inheritable Variability . . . . .	147
8.9	Replication . . . . .	148
8.10	The Last Step Toward Life: The Emergence of Encryption . . . . .	150
8.11	The Non-Life-to-Life Transition . . . . .	150
8.12	Cosmochemical and Geochemical Requirements for the Origin of Life . . . . .	152
8.13	Major Trends During the Early History of Life . . . . .	154
8.14	Differences Between Early Life and Modern Life . . . . .	155

8.15	Early Life and Artificial Life .....	157
8.16	The Definition of Life .....	158
<b>9</b>	<b>The Material-Independent Signatures of Life.</b>	
	<b>Forensic Tools of Astrobiology .....</b>	<b>159</b>
9.1	Rules of Thumb in Astrobiology .....	159
9.2	The Main Questions in Astrobiology .....	161
9.2.1	How Many Parameters are Required to Identify Life? .	162
9.2.2	False Premises and Misguided Fingerprints in Astrobiology .....	162
9.3	The Material-Independent Signatures of Life .....	170
<b>Appendix A</b>	<b>Models and Theories of Life .....</b>	<b>173</b>
A.1	Major Steps Toward Life .....	173
A.2	The (M,R)-System Model .....	174
A.3	The Two-Polymerase System .....	177
A.4	The Hypercycle Model .....	178
A.5	The Autocatalytic Network Model .....	180
A.6	The Chemoton Model .....	183
A.7	Pargellis's Model of Artificial Life .....	188
A.8	The Autopoietic Model .....	189
A.9	The Algorithmic Chemistry Model .....	193
A.10	Chemical Reaction Automata .....	194
<b>Appendix B</b>	<b>Chronology of Definitions and Interpretations of Life .....</b>	<b>197</b>
<b>Appendix C</b>	<b>Dictionary .....</b>	<b>207</b>
<b>Appendix D</b>	<b>Abbreviations .....</b>	<b>225</b>
<b>References</b>	<b>.....</b>	<b>227</b>

Between Necessity and Probability: Searching for the  
Definition and Origin of Life

Popa, R.

2004, XIII, 252 p., Hardcover

ISBN: 978-3-540-20490-9
