1	Introduction	1
1.1	Overview	1
1.2	The Fragility Problem	2
1.2.1	Introduction	2
1.2.2	Robust Control Problem	3
1.2.3	Non-fragile (Resilience) Controllers	4
1.2.4	Parameter Space Design	4
1.3	Motivating Examples	6
1.3.1	Inverted Pendulum on a Cart	7
1.3.2	Flexible Disk Drive	9
1.3.3	Simple Heat Exchanger	13
1.3.4	Stream Water Quality	16
1.4	Approaches to Resilient Control	17
1.4.1	Guaranteed-Cost Approach	18
1.4.2	The Proposed Framework	19
1.4.3	Controller Gain Perturbations	19
1.4.4	Multiplicative Type	20
1.5	A Glossary of Terminology and Notations	21
1.5.1	General Terms	21
1.5.2	Functional Differential Equations	22
1.6	Outline of the Book	22
1.6.1	Methodology	23
1.6.2	Chapter Organization	23
1.7	Notes and References	25
2	Resilient Control-Continuous Case	27
2.1	Introduction	27
2.2	Model with Norm-Bounded Uncertainties	28
2.3	Guaranteed Cost Control I	29
2.3.1	Quadratic Stability	30
2.3.2	Additive Gain Perturbations	31

2.3.3	Multiplicative Gain Perturbations	33
2.3.4	Special Cases	34
2.3.5	Example 2.1	36
2.4	\mathcal{H}_∞ Control I	37
2.4.1	Additive Gain Perturbations	37
2.4.2	Multiplicative Gain Perturbations	39
2.4.3	Special Cases	39
2.4.4	Example 2.2	41
2.5	Dynamic Feedback Control I	41
2.5.1	Parameterization	43
2.5.2	Design Procedure	44
2.5.3	Example 2.3	46
2.5.4	Example 2.4	47
2.6	Model with Convex-Polytopic Uncertainties	47
2.7	Guaranteed Cost Control II	49
2.7.1	Quadratic Stability	49
2.7.2	Additive Gain Perturbations	51
2.7.3	Multiplicative Gain Perturbations	52
2.7.4	Special Cases	53
2.7.5	Example 2.5	55
2.8	\mathcal{H}_∞ Control II	55
2.8.1	Additive Gain Perturbations	57
2.8.2	Multiplicative Gain Perturbation	58
2.8.3	Special Case	58
2.8.4	Results for Delayless Systems	59
2.8.5	Example 2.6	60
2.9	Dynamic Feedback Control II	61
2.9.1	Guaranteed Cost Design	63
2.9.2	\mathcal{H}_∞ Design	65
2.9.3	Special Cases	67
2.9.4	Example 2.7	69
2.10	Uncertain Model with State-Delays	71
2.10.1	Resilient Feedback Control	71
2.10.2	Error Dynamics	73
2.10.3	Robust Stability Results	74
2.10.4	Special Cases	77
2.10.5	Example 2.8	81
2.10.6	Example 2.9	81
2.11	Notes and References	82
3	Resilient Control-Discrete Case	83
3.1	Introduction	83
3.2	Model of Discrete-Time Systems	84
3.2.1	Gain Perturbations	84
3.2.2	Quadratic Stability	85

3.3	Guaranteed Cost Control Synthesis	87
3.3.1	Additive Gain Perturbations	87
3.3.2	Multiplicative Gain Perturbations	89
3.3.3	Example 3.1	90
3.3.4	Example 3.2	91
3.4	\mathcal{H}_∞ Control Synthesis	91
3.5	Design Example	95
3.6	Notes and References	96
4	Resilient Adaptive Control	99
4.1	Introduction	99
4.2	Continuous-Time Model	99
4.2.1	Nominal Model	100
4.2.2	Design Objective	101
4.3	Adaptive Schemes	101
4.3.1	Known Perturbation Bound	102
4.3.2	Example 4.1	104
4.3.3	Unknown Gain Perturbation Bound	104
4.3.4	Example 4.2	106
4.3.5	Special Cases	108
4.4	Polytopic Model	108
4.5	Design Results	109
4.5.1	Known Perturbation Bound	110
4.5.2	Example 4.3	111
4.5.3	Unknown Gain Perturbation Bound	112
4.5.4	Example 4.4	114
4.5.5	Model Reference State Regulation	114
4.5.6	Example 4.5	117
4.5.7	Special Cases	118
4.6	Discrete-Time Model	118
4.6.1	Stability and Stabilization Results	119
4.7	Adaptive Stabilization Methods	122
4.7.1	Known Perturbation Bound	122
4.7.2	Unknown Perturbation Bound	123
4.8	Examples	124
4.8.1	Example 4.6	124
4.8.2	Example 4.7	126
4.9	Notes and References	127
5	Resilient Linear Filtering	129
5.1	Introduction	129
5.2	A Class of Uncertain Systems	130
5.3	The Resilient Filter	131
5.3.1	A Class of Linear Filters	132
5.3.2	LMI-Based Design Conditions	132

5.3.3	Special Case	135
5.3.4	A Limiting Approach to Kalman Filtering	136
5.3.5	Multiplicative Gain Perturbations	137
5.3.6	Example 5.1	138
5.3.7	Example 5.2	138
5.4	Continuous Polytopic Systems	139
5.5	The Resilient Filtering Problem	140
5.5.1	Stability Results	142
5.5.2	Delay-Independent Filter Synthesis	143
5.5.3	Multiplicative Gain Perturbations	146
5.6	Resilient Delay-Dependent Filtering	149
5.6.1	A Descriptor Approach	149
5.6.2	Extended Newton-Leibniz Approach	154
5.7	Examples	161
5.7.1	Example 5.3	161
5.7.2	Example 5.4	164
5.7.3	Example 5.5	165
5.7.4	Example 5.6	166
5.7.5	Example 5.7	167
5.8	Notes and References	169
6	Resilient Delay-Dependent Control	171
6.1	Introduction	171
6.2	Continuous-Time Systems	172
6.2.1	Descriptor Transformation	172
6.3	Feedback Control Design	173
6.3.1	Nominal \mathcal{H}_2 Design	173
6.3.2	Resilient \mathcal{H}_2 Design	176
6.3.3	Nominal \mathcal{H}_∞ Design	178
6.3.4	Resilient \mathcal{H}_∞ Design	180
6.3.5	Simultaneous Nominal $\mathcal{H}_2/\mathcal{H}_\infty$ Design	180
6.3.6	Simultaneous Resilient $\mathcal{H}_2/\mathcal{H}_\infty$ Design	181
6.3.7	Example 6.1	182
6.3.8	Example 6.2	182
6.3.9	Example 6.3	183
6.4	Continuous Polytopic Systems	184
6.4.1	Polytopic \mathcal{H}_2 Design	185
6.4.2	Polytopic \mathcal{H}_∞ Design	186
6.4.3	Simultaneous Polytopic $\mathcal{H}_2/\mathcal{H}_\infty$ Design	187
6.4.4	Example 6.4	188
6.5	Discrete-Time Systems	188
6.5.1	System Description	188
6.5.2	Descriptor Model Transformation	189
6.5.3	Robust Stability	194
6.5.4	Nominal Feedback Stabilization	195

6.5.5	Resilient Feedback Stabilization	199
6.5.6	Example 6.5	201
6.5.7	Example 6.6	201
6.5.8	Example 6.7	201
6.5.9	Time-Varying Delay-Dependent Stability	202
6.5.10	Example 6.8	204
6.5.11	Example 6.9	205
6.6	Notes and References	205
7	Resilient Control-Nonlinear Systems	207
7.1	Introduction	207
7.2	Nonlinear Continuous-Time Systems	207
7.3	Robust Stability	208
7.3.1	Robust Delay-Independent Stability	208
7.3.2	Example 7.1	211
7.3.3	Robust Delay-Dependent Stability	211
7.3.4	Example 7.2	215
7.4	Robust Stabilization	216
7.4.1	Nominal Feedback Design	216
7.4.2	Example 7.3	217
7.4.3	Example 7.4	219
7.4.4	Resilient Feedback Design	219
7.4.5	Example 7.5	222
7.5	Nonlinear Discrete-Time Systems	223
7.6	Robust Stability	224
7.6.1	Example 7.6	227
7.6.2	Example 7.7	227
7.7	Robust Stabilization	228
7.7.1	Example 7.8	229
7.7.2	Example 7.9	229
7.7.3	Example 7.10	231
7.7.4	Resilient Feedback Design	231
7.7.5	Example 7.11	234
7.7.6	Example 7.12	235
7.8	Notes and References	236
8	Appendix	237
8.1	Inequalities	237
8.1.1	Inequality 1	237
8.1.2	Inequality 2	237
8.1.3	Inequality 3	238
8.1.4	Inequality 4 (Schur Complements)	239
8.1.5	Inequality 5	240
8.2	Lemmas	241
8.3	Linear Matrix Inequalities	244

8.3.1	Basics	244
8.3.2	Some Standard Problems	245
8.3.3	The S-Procedure	246
8.4	Some Lyapunov-Krasovskii Functionals	247
8.5	Some Formulas on Matrix Inverses	247
8.5.1	Inverse of Block Matrices	248
8.5.2	Matrix Inversion Lemma	248
