Introduction

<i>Nora Bretón, Jorge L. Cervantes–Cota, Marcelo Salgado</i>	1
--	---

Part I The Very Early Universe and High Precision Cosmology

An Introduction to Standard Cosmology

<i>Jorge L. Cervantes–Cota</i>	7
1 On the Standard Big Bang Model	7
2 Beyond the Standard Big Bang Model: Inflation	35
3 Overview	46

Inflation – In the Early Universe and Today

<i>Edmund J. Copeland</i>	53
1 The Standard Big Bang Model	53
2 Problems with the Big Bang	61
3 Enter Inflation	64
4 Inflation out of Particle Physics	65
5 String Cosmology	76
6 Dilaton-Moduli Cosmology Including a Moving Five Brane	92
7 Inflation Today – Quintessence	95
8 Summary	103

Cosmic Acceleration, Scalar Fields, and Observations

<i>César A. Terrero-Escalante</i>	109
1 Introduction	109
2 Accelerated Friedmann–Robertson–Walker Universe	110
3 Scalar Fields	112
4 Observations and Modeling	114
5 Conclusions	122

Lectures on the Theory of Cosmological Perturbations

<i>Robert H. Brandenberger</i>	127
1 Motivation	127
2 Newtonian Theory of Cosmological Perturbations	130

3	Relativistic Theory of Cosmological Fluctuations	138
4	Quantum Theory of Cosmological Fluctuations	146
5	The Trans-Planckian Window	152
6	Back-Reaction of Cosmological Fluctuations	157

Measuring Spacetime: From Big Bang to Black Holes

<i>Max Tegmark</i>	169
1 Introduction	169
2 Overall Shape of Spacetime	172
3 Spacetime Expansion History	174
4 Growth of Cosmic Structure	177
5 Nonlinear Clustering and Black Holes	181
6 Outlook	185

The Accelerating Universe and Dark Energy:

Evidence from Type Ia Supernovae

<i>Alexei V. Filippenko</i>	191
1 Introduction	191
2 Homogeneity and Heterogeneity	192
3 Cosmological Uses: Low Redshifts	193
4 Cosmological Uses: High Redshifts	196
5 Discussion	204

Part II Quintessence, Dark Energy, Dark Matter, and Other Topics

Quintessence and Dark Energy

<i>Axel de la Macorra</i>	225
1 Introduction	225
2 Theoretical Approach	227
3 Late Time Phase Transition as Dark Energy	231
4 Dark Matter	239
5 Phenomenological Approach	243
6 Conclusions	254

Quintessential Inflation at the Maxima of the Potential

<i>Gabriel Germán, Axel de la Macorra</i>	259
1 Introduction	259
2 The Model	263
3 Initial Conditions	266
4 Conclusions	267

Quantum Corrections to Scalar Quintessence Potentials

<i>Michael Doran, Joerg Jaeckel</i>	273
1 Introduction	273
2 Effective Action	275

3	Uncoupled Quintessence	279
4	Coupled Quintessence.....	282
5	Weyl Transformed Fields.....	286
6	Conclusions	288

Electroweak Baryogenesis and Primordial Hypermagnetic Fields

	<i>Gabriella Piccinelli, Alejandro Ayala</i>	293
1	Introduction	293
2	Electroweak Baryogenesis	295
3	Hypermagnetic Fields and Phase Transitions	298
4	Magnetic Fields in the Universe	298
5	CP Violating Fermion Scattering with Hypermagnetic Fields	300
6	Summary and Outlook.....	305

Infering Annihilation Channels of Neutralinos in Galactic Halos

	<i>Luis G. Cabral-Rosetti, Xavier Hernández, Roberto A. Sussman</i>	309
1	Introduction	309
2	The Neutralino Gas	310
3	The Microcanonical Entropy.....	312
4	Theoretical and Empiric Entropies	314
5	Testing the Entropy Consistent Criterion.....	316
6	Conclusions	318

Part III Braneworlds, Loop Quantum Cosmology

Brane World Cosmology

	<i>Kei-ichi Maeda</i>	323
1	Introduction	323
2	Several Models for a Brane World	325
3	Approaches to a Brane World.....	330
4	The Effective Gravitational Equations on a Brane World	332
5	Randall-Sundrum Type II Brane World Model	335
6	Brane Model with a Bulk Field	338
7	Models with Induced Gravity on a Brane.....	345
8	Concluding Remarks	353

Inflation and Braneworlds

	<i>James E. Lidsey</i>	357
1	Introduction	357
2	Types of Braneworlds.....	360
3	The Randall-Sundrum Type II Braneworld.....	362
4	Braneworld Inflation.....	365

5	Asymmetric Braneworld Inflation	371
6	Gauss–Bonnet Braneworld Cosmology	374
7	Concluding Remark	376

Creation of Brane Universes

<i>Rubén Cordero, Efraín Rojas</i>	381
1 Introduction	381
2 The Model	383
3 Hamiltonian Approach	386
4 Brane Universe Floating in a de Sitter Space	391
5 Quantum Brane Cosmology	392
6 Nucleation Rate	394
7 Conclusions	396

The Scalar Field Dark Matter Model:

A Braneworld Connection

<i>Tonatiuh Matos, Luis Arturo Ureña-López, Miguel Alcubierre, Ricardo Becerril, Francisco S. Guzmán, Darío Núñez</i>	401
1 Introduction	401
2 Scalar Field Matter from Brane Cosmology	404
3 Scalar Field Dark Matter in the Cosmological Context	408
4 Scalar Field Dark Matter and Structure Formation	409
5 Conclusions	417

Cosmological Applications of Loop Quantum Gravity

<i>Martin Bojowald, Hugo A. Morales-Técotl</i>	421
1 Introduction	421
2 General Relativity	423
3 Wheeler–DeWitt Quantum Gravity	428
4 Quantum Geometry	432
5 Loop Quantum Cosmology	438
6 Quantum Gravity Phenomenology	452
7 Outlook	457

Index	463
