# Contents

---

## Part I Background

---

<b>1</b>	<b>Introduction</b> .....	3
1.1	CoFI .....	3
1.2	CASL .....	7
<b>2</b>	<b>Underlying Concepts</b> .....	11
2.1	Basic Specifications .....	11
2.2	Structured Specifications .....	15
2.3	Architectural Specifications .....	19
2.4	Libraries of Specifications .....	20

---

## Part II CASL Specifications

---

<b>3</b>	<b>Getting Started</b> .....	23
3.1	Loose Specifications .....	24
3.2	Generated Specifications .....	33
3.3	Free Specifications .....	36
<b>4</b>	<b>Partial Functions</b> .....	47
4.1	Declaring Partial Functions .....	47
4.2	Specifying Domains of Definition .....	50
4.3	Partial Selectors and Constructors .....	54
4.4	Existential Equality .....	55
<b>5</b>	<b>Subsorting</b> .....	57
5.1	Subsort Declarations and Definitions .....	57
5.2	Subsorts and Overloading .....	61
5.3	Subsorts and Partiality .....	62

<b>6</b>	<b>Structuring Specifications</b> .....	67
6.1	Union and Extension .....	67
6.2	Renaming .....	69
6.3	Hiding .....	71
6.4	Local Specifications .....	73
6.5	Named Specifications .....	75
<b>7</b>	<b>Generic Specifications</b> .....	77
7.1	Parameters and Instantiation .....	78
7.2	Compound Symbols .....	85
7.3	Generic Specifications with Imports .....	88
7.4	Views .....	90
<b>8</b>	<b>Specifying the Architecture of Implementations</b> .....	93
8.1	Architectural Specifications .....	95
8.2	Generic Components .....	100
8.3	Writing Meaningful Architectural Specifications .....	106
<b>9</b>	<b>Libraries</b> .....	111
9.1	Local Libraries .....	112
9.2	Distributed Libraries .....	116
9.3	Version Control .....	120

---

## Part III Carrying On

---

<b>10</b>	<b>Foundations</b> .....	125
<b>11</b>	<b>Tools</b> .....	131
11.1	The Heterogeneous Tool Set (HETS) .....	132
11.2	HOL-CASL .....	138
11.3	ASF+SDF Parser and Syntax-Directed Editor .....	139
11.4	Other Tools .....	140
<b>12</b>	<b>Basic Libraries</b> .....	143
12.1	Library BASIC/NUMBERS .....	144
12.2	Library BASIC/STRUCTURED DATATYPES .....	147
<b>13</b>	<b>Case Study: The Steam-Boiler Control System</b> .....	155
13.1	Introduction .....	156
13.2	Getting Started .....	157
13.3	Carrying On .....	161
13.4	Specifying the Mode of Operation .....	163
13.5	Specifying the Detection of Equipment Failures .....	167
13.6	Predicting the Behavior of the Steam-Boiler .....	176
13.7	Specifying the Messages to Send .....	182

13.8	The Steam-Boiler Control System Specification . . . . .	183
13.9	Validation of the CASL Requirements Specification . . . . .	184
13.10	Designing the Architecture . . . . .	186

---

## Appendices

---

<b>A</b>	<b>CASL Quick Reference . . . . .</b>	<b>193</b>
A.1	Basic Specifications . . . . .	194
A.2	Structured Specifications . . . . .	199
A.3	Architectural Specifications . . . . .	200
A.4	Libraries . . . . .	201
<b>B</b>	<b>Points to Bear in Mind . . . . .</b>	<b>203</b>
B.1	Introduction . . . . .	203
B.2	Underlying Concepts . . . . .	203
B.3	Getting Started . . . . .	204
B.4	Partial Functions . . . . .	205
B.5	Subsorting . . . . .	206
B.6	Structuring Specifications . . . . .	206
B.7	Generic Specifications . . . . .	207
B.8	Specifying the Architecture of Implementations . . . . .	207
B.9	Libraries . . . . .	208
B.10	Foundations . . . . .	209
B.11	Tools . . . . .	209
B.12	Basic Libraries . . . . .	210
<b>C</b>	<b>The Steam-Boiler Control Specification Problem . . . . .</b>	<b>211</b>
C.1	Introduction . . . . .	211
C.2	Physical Environment . . . . .	212
C.3	The Overall Operation of the Program . . . . .	214
C.4	Operation Modes of the Program . . . . .	214
C.5	Messages Sent by the Program . . . . .	216
C.6	Messages Received by the Program . . . . .	217
C.7	Detection of Equipment Failures . . . . .	219
	<b>References . . . . .</b>	<b>221</b>
	<b>List of Named Specifications . . . . .</b>	<b>225</b>
	<b>Index of Library and Specification Names . . . . .</b>	<b>231</b>
	<b>Concept Index . . . . .</b>	<b>235</b>

CASL User Manual

Introduction to Using the Common Algebraic  
Specification Language

Bidoit, M.; Mosses, P.D.

2004, XIV, 246 p., Softcover

ISBN: 978-3-540-20766-5
