Table of Contents

1 Decision, Cost and Benefit.....1
1.1 Decision and Choice.....1
1.2 A Reflection on Cost-Benefit Analysis.....2
1.3 A General Analytical Structure of Cost-Benefit Analysis.....8
1.4 The Decision Structure and Cost-Benefit Analysis.....11
1.5 The Basic Social Welfare Foundation of Cost-Benefit Analysis....13
1.6 Costs-Benefit Analysis and other Decision Tools.....20
1.6.1 Taxonomy of Decision Tools.....21
1.6.2 The Classical Operations Research for Decision-Making.....22
1.6.3 Some Non-Classical Operations Research for Decision Making.....23
1.7 Introductory Framework of the Theory of Fuzzy Decisions for Cost-Benefit Analysis.....27

2 The Theory of Computable Cost-Benefit Identification Matrices....33
2.1 Multi-Objective, Multi-Alternative, Multi-Attribute and Multi-Group Problem in Cost-Benefit Analysis.....34
2.2 The Structure of Identification Matrices.....36
2.3 Reflections on Contingent Valuation Method (CVM), Revealed Preference Method (RPM), Computable Identification Matrices and the Role of the Theory of Fuzzy Decisions.....49
2.4 Computable Cost-Benefit Identification Matrices and other Areas of Decision Applications.....59
2.4.1 The Logic of Computable Cost-Benefit Identification Matrices.....60
2.4.2 The Goals and Objectives of the Theory of Computable Cost and Benefit Identification Matrices.....62
2.5 Areas of Potential Application.....67
2.6 Security and Risk Analysis.....70
2.7 Computable Cost-Benefit Identification Matrices and the Study of Quality of Life.....77

3 The Theory of Social Cost and Costing 79
3.1 Categories of Choice or Decision in Cost-Benefit Analysis..... 80
3.2 The Concept of Cost in Decision and Cost-Benefit Analysis..... 81
3.3 A Note on the Concept of Cost in Decision and Choice 83
3.4 The Cost Components and Decision..... 84
3.5 Cost, Choice and Decision..... 86
3.6 The Cost Space and Identification Matrix 88
3.6.1 The Cost Space Defined 88
3.6.2 Cost Identification Matrix for Costing 91
3.6.3 The Burden of Social Cost and Cost Distributional Weights .. 95
3.6.4 Constructing the Distributional Weights 99
3.6.5 Tangibles, Intangibles, Prices and Cost Aggregates..... 106
3.6.6 The Effect of Time on Cost Computing 107
3.7 Example of Social Costing: The Social Cost of Mental Illness.... 108
3.7.1 Identification of Real Cost Characteristics 109
3.7.2 Social Groups (Classes)..... 109
3.7.3 Forming the Computable Cost-Identification Matrix 110
3.7.4 Computing the Aggregate Cost Data..... 112
3.8 Conclusion 124
3.9 The Steps in Social Costing..... 125

4 The Theory of Social Benefits and Benefit Accounting..... 129
4.1 A Rationale for the Basic Framework 129
4.2 A Reflection on the Concept of Benefit in a Choice- Decision Process 131
4.2.1 Accounting Concept and Measurement of Benefits. 132
4.2.2 The Economic Concept and Measurement of Benefits 133
4.3 The Structure of Benefit Space and Decision Alternatives 136
4.4 Benefit Identification Matrix for Benefit Accounting 143
4.5 Tangibles, Intangibles, Corresponding Prices and Benefit Aggregates 144
4.6 The Concept of Benefit Intensity and Distributional Weights. 147
4.7 The Construction of Class Benefit Intensity Weights Through Fuzzy Aggregation 148
4.8 Conclusion and Effect of Time on Benefit Data and Accounting 154
4.9 An Example of Social Benefits and Benefit Accounting: Treatment of Mental Illness 156
4.9.1 Developing the Required Initial Information Base..... 156
4.9.2 On Fuzzy Computing and Distributional Weights of Benefit Intensities and Aggregation 165

5 Essential Mathematics for Fuzzy Decision Processes 177
5.1 The Basis of the Theory of Fuzzy Mathematics 177
5.2 Simple Operations on Fuzzy Sets 182
5.2.1 Visual Representation of Fuzzy-Set Operations 186
5.2.2 Distance Functions on Fuzzy Sets 188
5.2.3 Basic Indexes of Fuzziness in Sets 193
5.3 The α -Level Sets and the Decomposition Theorem 196
5.4 Fuzzy Graphs and Fuzzy Relations 202
5.4.1 Joint and Marginal Membership Functions 205
5.4.2 Decomposition and Fuzzy Relations 209
5.4.3 Some other Useful Fuzzy Set Operations 215
5.5 Categories and Graphs of some Common Membership Functions 218
5.5.1 Membership Functions for "x is small" 218
5.5.2 Membership Functions for "x is large" 221
5.6 Basic Arithmetic of Fuzzy Numbers 224
5.6.1 Fuzzy Numbers and Fuzzy Confidence Intervals 224
5.6.2 Basic Fuzzy Arithmetic on Fuzzy Numbers 226

6 The Basic Theory of Fuzzy Decisions 243
6.1 The Fuzzy Decision Problem 243
6.2 The Fuzzy Decision Problem Extended 251
6.3 The Fuzzy Mathematical Programming (FMP) 255
6.3.1 The Formulation of the Fuzzy Mathematical Programming Problem 255
6.3.2 The α -level Function of FMP 259
6.4 Fuzzy Multicriteria Decision Making 265
6.4.1 Problem Definition 266
6.5 Acomputational Example of Fuzzy Multicriteria Decision Problem 280
6.6 Reflections on the General Fuzzy Decision Processes 293
