
Contents

A Topological Obstruction to Existence of Quaternionic Plücker Map
S. Alesker 1

Hard Lefschetz Theorem for Valuations and Related Questions of Integral Geometry
S. Alesker 9

$SU(2)$ -Invariant Valuations
S. Alesker 21

The Change in the Diameter of a Convex Body under a Random Sign-Projection
S. Artstein 31

An Elementary Introduction to Monotone Transportation
K. Ball 41

A Continuous Version of the Brascamp–Lieb Inequalities
F. Barthe 53

Inverse Brascamp–Lieb Inequalities along the Heat Equation
F. Barthe, D. Cordero-Erausquin 65

Pinched Exponential Volume Growth Implies an Infinite Dimensional Isoperimetric Inequality
I. Benjamini, O. Schramm 73

On Localization for Lattice Schrödinger Operators Involving Bernoulli Variables
J. Bourgain 77

Symmetrization and Isotropic Constants of Convex Bodies <i>J. Bourgain, B. Klartag, V. Milman</i>	101
On the Multivariable Version of Ball's Slicing Cube Theorem <i>E. Gluskin</i>	117
Geometric Probability and Random Cotype 2 <i>E. Gluskin, V. Milman</i>	123
Several Remarks Concerning the Local Theory of L_p Spaces <i>W.B. Johnson, G. Schechtman</i>	139
On John-Type Ellipsoids <i>B. Klartag</i>	149
Isomorphic Random Subspaces and Quotients of Convex and Quasi-Convex Bodies <i>A.E. Litvak, V.D. Milman, N. Tomczak-Jaegermann</i>	159
Almost Euclidean Subspaces of Real ℓ_p^n with p an Even Integer <i>Yu.I. Lyubich</i>	179
Geometric Parameters in Learning Theory <i>S. Mendelson</i>	193
Essential Uniqueness of an M-Ellipsoid of a Given Convex Body <i>V.D. Milman, A. Pajor</i>	237
On the Thermodynamic Limit for Disordered Spin Systems <i>L. Pastur</i>	243
On Read's Proof that $B(\ell_1)$ Is Not Amenable <i>G. Pisier</i>	269
An Isomorphic Version of the Busemann–Petty Problem for Gaussian Measure <i>A. Zvavitch</i>	277
Seminar Talks (with Related Workshop and Conference Talks)	285
