1	Introduction	1
----------	---------------------------	----------

Part I Detection of Small Conductivity Inclusions

2	Transmission Problem	11
2.1	Some Notations and Preliminaries	11
2.2	Layer Potentials for the Laplacian	14
2.3	Neumann and Dirichlet Functions	30
2.4	Representation Formula	34
2.5	Energy Identities	39
3	Generalized Polarization Tensors	41
3.1	Definition	42
3.2	Uniqueness Result	45
3.3	Symmetry and Positivity of GPT's	47
3.4	Bounds for the Polarization Tensor of Pólya–Szegő	49
3.5	Estimates of the Weighted Volume and the Center of Mass ...	52
3.6	Polarization Tensors of Multiple Inclusions	56
3.6.1	Definition	57
3.6.2	Properties	58
3.6.3	Representation by Equivalent Ellipses	62
4	Derivation of the Full Asymptotic Formula	65
4.1	Energy Estimates	67
4.2	Asymptotic Expansion	71
4.3	Closely Spaced Small Inclusions	76
5	Detection of Inclusions	79
5.1	Constant Current Projection Algorithm	80
5.2	Quadratic Algorithm	85

5.3	Least-Squares Algorithm	88
5.4	Variational Algorithm	89
5.5	Linear Sampling Method	91
5.6	Lipschitz-Continuous Dependence and Moments Estimations ..	97
5.6.1	Lipschitz-Continuous Dependence	97
5.6.2	Moments Estimations	100

Part II Detection of Small Elastic Inclusions

6	Transmission Problem for Elastostatics	109
6.1	Layer Potentials for the Lamé System	109
6.2	Kelvin Matrix Under Unitary Transforms	113
6.3	Transmission Problem	115
6.4	Complex Representation of Displacement Vectors	123
7	Elastic Moment Tensor	129
7.1	Asymptotic Expansion in Free Space	129
7.2	Properties of EMT's	132
7.3	EMT's Under Linear Transforms	140
7.4	EMT's for Ellipses	143
7.5	EMT's for Elliptic Holes and Hard Ellipses	147
8	Derivation of Full Asymptotic Expansions	151
8.1	Full Asymptotic Expansions	151
9	Detection of Inclusions	159
9.1	Detection of EMT's	159
9.2	Representation of the EMT's by Ellipses	163
9.3	Detection of the Location	164
9.4	Numerical Results	167

Part III Detection of Small Electromagnetic Inclusions

10	Well-Posedness	179
10.1	Existence and Uniqueness of a Solution	179
11	Representation of Solutions	185
11.1	Preliminary Results	185
11.2	Representation Formulae	188
12	Derivation of Asymptotic Formulae	197
12.1	Asymptotic Expansion	197

13 Reconstruction Algorithms	207
13.1 Asymptotic Expansion	207
13.2 Reconstruction of Multiple Inclusions	209
13.2.1 The Fourier Transform Algorithm	209
13.2.2 The MUSIC Algorithm	213
A Appendices	215
A.1 Theorem of Coifman, McIntosh, and Meyer	215
A.2 Continuity Method	216
A.3 Collectively Compact Operators	217
A.4 Uniqueness for the Inverse Conductivity Problem	217
A.4.1 Uniqueness With Many Measurements	217
A.4.2 Uniqueness of Disks With One Measurement	220
References	223
Index	237

Reconstruction of Small Inhomogeneities from
Boundary Measurements

Ammari, H.; Kang, H.
