IV/10 Heats of Mixing and Solution

Subvolume A Binary Liquid Systems of Nonelectrolytes

	<u>Page</u>
1	Introduction 1-1
1.1	Fundamental principles and basic relations 1-2
1.2	Correlation of experimental data 1-5
1.3	Principles of heat of mixing measurements 1-6
1.3.1	Mixing in the presence of a vapor space. Corrections 1-6
1.3.2	Mixing in the absence of a vapor space 1-6
1.3.2.1	Batch calorimetry 1-6
1.3.2.2	Displacement or successive dilution calorimetry 1-7
1.3.2.3	Flow mixing calorimetry 1-7
1.4.	Main types of calorimeters for heat of mixing measurements 1-8
1.4.1	Calorimeters for near ambient conditions 1-8
1.4.1.1	Batch mixing calorimeters 1-8
1.4.1.2	Isothermal displacement calorimeters 1-9
1.4.1.3	Flow mixing calorimeters 1-9
1.4.1.3.1	The Wadsö flow calorimeter 1-9
1.4.1.3.2	The Picker dynamic flow microcalorimeter 1-10
1.4.1.3.3	The Christensen isothermal flow calorimeter 1-10
1.4.1.3.4	The Wormald reverse-flow labyrinth mixing calorimeter 1-10
1.4.1.3.5	Flow microcalorimeters using heat-flux Tian-Calvet detection 1-11
1.5	Calibration. Reference systems 1-11
1.5.1	Cyclohexane (1) + Hexane (2) 1-12
1.5.2	Ethanol (1) + Water (2) 1-12
2	Tables on heats of mixing 2-1
2.1	Introduction 2-1
2.1.1	Property types 2-2
2.2	Organic mixtures 2-3
2.3	Aqueous-organic mixtures. 2-368
2.4	Mixtures containing inorganic substances 2-399
3	Instructions on using the computer Program ELBT 3-1
3.1	Introduction 3-1
3.2	System requirements 3-1
3.3	Installing the Program 3-1
3.4	To start 3-2
3.5	Visualization of numerical data 3-4
3.5.1	PDF display 3-4
3.5.2	SELF (Standard EElectronic File) display 3-4
3.5.2.1	SELF structure. Identifiers 3-4
3.5.2.2	Physical quantities and physico-chemical properties 3-6
3.5.2.3	Independent variables and dependent variables 3-6
3.5.2.4	Parameters. 3-6
3.5.2.5	Symbols, units and scales of physical quantities 3-6
3.5.2.6	Numerical data and estimated uncertainties 3-7
3.5.2.7	Partially miscible systems 3-8

Contents

	<u>Page</u>
3.5.3	ELDATA display 3-9
3.5.4	Selection of units 3-9
3.5.5	Graphical display 3-9
3.5.6	Correlating experimental data. 3-10
3.5.7	Output of correlated experimental data. 3-11
4	Indexes 4-1
4.1	Formula index of substances 4-2
4.2	Name index of substances 4-10
4.3.	Class index of organic substances 4-36
4.4	Class index of organic mixtures 4-39
4.5	Class index of aqueous-organic mixtures 4-127
4.6	Index of mixtures containing inorganic substances 4-131
5	General references 5-1
	Formula index of mixtures on CD-ROM only

Binary Liquid Systems of Nonelectrolytes

2004, IX, 564 p. 816 illus. With CD-ROM., Hardcover

ISBN: 978-3-540-60347-4
