Invited Lectures

Y.S. KACHANOV: On a universal mechanism of turbulence production in wall shear flows	1
P.J. SCHMID: A general framework for stability, receptivity and optimal control	13
F.P. BERTOLOTTI: The equivalent forcing model for receptivity analysis with application to the construction of a high-performance skin perforation pattern for LFC	25

1 Transition Mechanisms

P. WASSERMANN, M. KLOKER: DNS investigations on the laminar breakdown in a three-dimensional boundary-layer flow	37
F.P. BERTOLOTTI, S. HEIN, W. KOCH, A. STOLTE: Absolute/convective instability investigation of primary and secondary crossflow vortices	51
D.G.W. MEYER, U. RIST, S. WAGNER: Direct numerical simulation of the development of asymmetric perturbations at very late stages of the transition process	63
S. HERR, W. WÜRZ, A. WÖRNER, U. RIST, S. WAGNER, A. IVANOV, Y. KACHANOV: Systematic investigations of 3D acoustic receptivity with respect to steady and unsteady disturbances. Experiment and DNS	75
M. KLOKER, C. STEMMER: Three-dimensional steady disturbance modes in the Blasius boundary layer – a DNS study	91

2 Transition Prediction

G. SCHRAUF: Industrial view on transition prediction	111
S. HEIN: Nonlinear nonlocal transition analysis – code development and results –	123
A. LE DUC, J. SESTERHENN, R. FRIEDRICH: Direct numerical simulation of instabilities in the compressible swept Hiemenz flow	135
M. LANG, O. MARXEN, U. RIST, S. WAGNER: A combined numerical and experimental investigation of transition in a laminar separation bubble	149

3 Transition Control

J. FREY, U. KNÖRNSCHILD, R. BUCKISCH, R. GRUNDMANN: Generation and control of oblique Tollmien-Schlichting waves in a Blasius boundary layer	165
R. MESSING, M. KLOKER: DNS study of discrete suction in a 3-D boundary layer	177
D. STURZEBECHER, W. NITSCHKE: Active control of boundary-layer instabilities on an unswept wing	189
C. GMELIN, U. RIST, S. WAGNER: Numerical investigations of active control of boundary-layer instabilities	203
H. OPFER, F. EVERT, D. RONNEBERGER, F.-R. GROSCHKE: On the potential and the limitations of boundary-layer stabilization via active wave cancellation	219

4 Natural Transition and Measurement Techniques

V. STRUNCK, M. BORYS, T. BUSCHMANN,
H. MÜLLER, D. DOPHEIDE: High resolution
boundary layer profile sensors231

A. SEITZ, K.-H. HORSTMANN: Propagation of
Tollmien-Schlichting waves in a wing boundary layer243

A. SCHRÖDER, J. KOMPENHANS: Investigation of
transitional structures in artificially excited boundary
layer flows by means of stereo and multi-plane PIV255

I. PELTZER, W. NITSCHKE: Experimental investigations
of natural and controlled transition on a laminar flow
airfoil269

F. HAUSMANN, W. SCHRÖDER, W. LIMBERG:
A hot-film measuring system for free flight conditions281

5 Transition-Turbulence-Separation

N. JOVIČIĆ, G. EVANS, M. BREUER, R. FRIEDRICH:
Comparison of two large-eddy simulations for a stalled
airfoil flow using different finite-volume formulations293

Vernetzte Projektgruppen

U. RIST: Visualization of unsteady flow structures
in a high-performance computing environment307

Index of authors321

Recent Results in Laminar-Turbulent Transition
Selected numerical and experimental contributions
from the DFG priority programme "Transition" in
Germany

Wagner, S.; Kloker, M.; Rist, U. (Eds.)

2004, XIII, 324 p., Hardcover

ISBN: 978-3-540-40490-3
