Preface	IX
1. Introduction in the Homogenization Method as Applied to Stressed Composite Materials	1
1.1. Linear Model of a Stressed Elastic Body	3
1.2. Homogenization Method in the Mechanics of Composites. The Basic Approaches	7
1.3. Homogenization Method in the Mechanics of Stressed Composites	15
2. Stressed Composite Plates and Membranes	21
2.1. Stressed Plates (2-D Model)	21
2.2. Stressed Plates (Transition from 3-D to 2-D Model, In-Plane Initial Stresses)	27
2.3. Stressed Plates (Transition from 3-D to 2-D Model, Moments of Initial Stresses)	46
2.4. 2-D Boundary Conditions Derived from the 3-D Boundary Problem	53
2.5. 3-D and 2-D “Energy Forms” for a Stressed Plate and a Stability Criterion for a Plate	62
2.6. Membrane (2-D model)	68
2.7. Membrane (Transition from 3-D to 2-D Model)	71
2.8. Plates with no Initial Stresses. Computing of Resultant Initial Stresses	78
3. Stressed Composite Beams, Rods and Strings	83
3.1. Stressed Beam (1-D model)	83
3.2. Stressed Beams (Transition from 3-D to 1-D Model, Initial Axial Stresses)	87
3.3. Stressed Beams (Transition from 3-D to 1-D Model, Moments of Initial Stresses)	108
3.4. 1-D boundary Conditions Derived from 3-D Elasticity Problem	115
3.5. 3-D and 1-D “Energy Forms” for a Stressed Beam and a Stability Criterion for a Beam	119
3.6. Strings (1-D Model)	127
3.7. Strings (Transition from a 3-D to a 1-D Model)	129
3.8. Beams with no initial stresses. Computing of resultant initial stresses and moments	145

4. Calculation and Estimation of Homogenized Stiffnesses of Plate-Like and Beam-Like Composite Structures	149
4.1. Variational Principles for Stiffnesses of Nonhomogeneous Plates	149
4.2. Variational Principles for Stiffnesses of Nonhomogeneous Beams	168
4.3. The Homogenization Method Modified for Lattice Plats	181
4.3. The Homogenization Method Modified for Lattice Beams	193
4.5. Review of Software Suitable for Homogenization Procedures	202
Appendix A. Plates and Beams in Different Coordinate Systems	207
A1. Homogenized Stiffnesses of a Plate in Different Coordinate Systems	207
A2. Homogenized Stiffnesses of a Beam in Different Coordinate Systems	211
Appendix B. Critical Loads for Some Composite Plates	217
References	221
Index	226
