

# Contents

---

## Part I. Classification Methods with Applications

---

<b>The STP Procedure as Overfitting Avoidance Tool in Classification Trees .....</b>	<b>3</b>
--	----------

*Carmela Cappelli, Francesco Mola*

<b>A Modal Symbolic Pattern Classifier .....</b>	<b>15</b>
--	-----------

*Francisco de A.T. de Carvalho, Renata M.C.R. de  
Souza, Rosanna Verde*

<b>Proximity Measures Between Classification Trees ...</b>	<b>27</b>
--	-----------

*Rossella Miglio, Gabriele Soffritti*

<b>Ordinal Classification Trees Based on Impurity Measures .....</b>	<b>39</b>
--	-----------

*Raffaella Piccarreta*

---

## Part II. Time Series Analysis and Related Methods

---

<b>Space Time Noisy Observation Smoothing .....</b>	<b>55</b>
---	-----------

*Di Giacinto Valter, Ippoliti Luigi, Romagnoli Luca*

<b>Spectral Analysis in Frequency and Time Domain for Noisy Time Series .....</b>	<b>67</b>
---	-----------

*Lara Fontanella, Mariagrazia Granturco*

<b>A Resistant Measure of Heteroskedasticity in Explorative Time Series Analysis .....</b>	<b>81</b>
--	-----------

*Marcella Niglio, Stefano Maria Pagnotta*

---

## Part III. Computer Intensive Techniques and Algorithms

---

<b>Smoothing Score Algorithm for Generalized Additive Models .....</b>	<b>95</b>
--	-----------

*Claudio Conversano*

<b>Bootstrap Variable Selection in Neural Network Regression Models</b> .....	109
---	-----

*Francesco Giordano, Michele La Rocca, Cira Perna*

<b>Robust Centre Location in Radial Basis Function Networks</b> .....	121
---	-----

*Marilena Pillati, Daniela G. Calò*

<b>The Genetic Algorithm Estimates for the Parameters of Order <math>p</math> Normal Distributions</b> .....	133
--	-----

*Salvatore Vitrano, Roberto Baragona*

---

## Part IV. Classification and Data Analysis in Economics

---

<b>Non-linear Dynamics in the Industrial Production Index</b> .....	147
---	-----

*Alessandra Amendola, Giuseppe Storti*

<b>Tensorial Co-Structure Analysis for the Full Multi Modules Customer Satisfaction Evaluation</b> .....	159
--	-----

*Pietro Amenta, Pasquale Sarnacchiaro*

<b>A Proposal of Classification of Wholesale Trade Enterprises on the Base of Structural and Performance Indicators</b> .....	169
---	-----

*Paola Anitori, Carlo De Gregorio*

<b>The Analysis of Poverty in Italy: A Fuzzy Dynamic Approach</b> .....	181
---	-----

*Daria Mendola, Stefano De Cantis*

---

## Part V. Multivariate Analysis in Applied Sciences

---

<b>Combining Information from Several Experts: Selecting and Stopping Rules in Sequential Consulting</b>	195
--	-----

*Patrizia Agati*

<b>A Spatial Clustering Hierarchical Model for Disease Mapping</b> .....	209
<i>Massimo Bilancia, Alessio Pollice</i>	
<b>Second-order Interaction in a Trivariate Generalized Gamma Distribution</b> .....	219
<i>Salvatore Bologna, Gianfranco Lovison</i>	
<b>Mortality and Air Pollution in Philadelphia: A Dynamic Generalized Linear Modelling Approach</b> ...	233
<i>Monica Chiogna, Carlo Gaetan</i>	
<b>The Multivariate Adaptive Sampling for Estimating the Diversity in Biological Populations</b> .....	245
<i>Stefano A. Gattone, Tonio Di Battista</i>	
<b>Adjusted Least Square Estimation for Noisy Images</b> .....	255
<i>Ippoliti Luigi, Romagnoli Luca</i>	
<b>Flexible Dynamic Regression Models for Real-time Forecasting of Air Pollutant Concentration</b> .....	265
<i>Pietro Mantovan, Andrea Pastore</i>	
<b>Author Index</b> .....	277
<b>Subject Index</b> .....	279

Advances in Multivariate Data Analysis

Proceedings of the Meeting of the Classification and  
Data Analysis Group (CLADAG) of the Italian Statistical  
Society, University of Palermo, July 5-6, 2001

Bock, H.-H.; Chiodi, M.; Mineo, A. (Eds.)

2004, XI, 281 p., Softcover

ISBN: 978-3-540-20889-1
