1 The Development of Wavefront Technology and its Application to Ophthalmology

J.F. Bille, U. von Pape	1
1.1 Abstract	1
1.2 Introduction	1
1.3 History	3
1.4 Principle of Aberration Measurement	4
1.5 Definitions of Optical Imaging Quality	7
1.5.1 Root Mean Square	7
1.5.2 Optical Aberration Index	8
1.5.3 Modulation Transfer Function	8
1.5.4 Point Spread Function	9
1.5.5 Application of the Performance Indices in a Normal Human Eye	9
1.6 Principle of Closed Loop Adaptive Optical Control	9
1.6.1 Adaptive Optics in Astronomy	10
1.6.2 History of Adaptive Optics at the University of Heidelberg	11
1.6.3 Performance of Foil Mirrors	12
1.6.4 Comparison of Foil Mirrors and Microchip Mirror	15
1.7 CLAO/Bille Aberrometer	15
1.8 Demonstration of CLAO/Bille Aberrometer	19
1.9 Conclusion	22
References	22

2 Wavefront Technology for Vision and Ophthalmology

J. Liang	25
2.1 Introduction	25
2.2 Wavefront Optometers	26
2.3 Ray-Tracing Optometers	26
2.4 Wavefront-Sensing Optometer	28
2.5 Equivalency of Subjective Ray Tracing and Outgoing Wavefront Sensing	30

2.6	Vision Diagnosis Using Wavefront Optometers	31
2.7	Aberrations of the Human Eye	32
2.8	Determination of Best Sphero-Cylindrical Correction by Wavefront Optometers	33
2.9	Point-Spread Function (PSF) of the Eye	34
2.10	Modulation Transfer Function (MTF) of the Eye	34
2.11	Wavefront-Guided Vision Correction	35
2.12	Customized Vision Correction through Adaptive Optics	36
2.13	Wavefront Technology for Laser Vision Correction	38
2.14	Wavefront Technology for the Calibration of Excimer Refractive Lasers	39
2.15	High-Resolution Retinal Imaging with Adaptive Optics	40
2.16	Photoreceptor Images	41
2.17	Confocal Scanning Laser Ophthalmoscopes (cSLO)	43
2.18	Conclusion	43
	References	43

3 An Aberration Generator for the Calibration of Wavefront-Sensing Optometers

J. Liang, G. Dai	49
3.1 Introduction	49
3.2 Dynamic Source of Seidel Aberrations	50
3.3 Phase Plates as Sources of Aberrations	51
3.4 Experimental Setup with the Wavefront Sensor	52
3.5 Experiment Results	54
3.6 Conclusions	57
References	57
Appendix: Wavefront Maps of 8 Phase Plates	58

4 Optical Quality of the Human Eye: The Quest for Perfect Vision

J.F. Bille, J. Büchler-Costa, F. Müller	61
4.1 Introduction	61
4.2 The Quality of the Human Eye	62
4.3 Linear Systems	64
4.3.1 Optical Systems	65
4.4 Representation of Aberrations	68
4.5 Simulations	72
References	82

5 First Clinical Results with WaveScan

A. Gleibs	83

12 Photorefractive Keratectomy: Indications, Surgical Techniques, Complications, and Results

W.B. Jackson	213
12.1 Introduction	213
12.2 Indications for PRK	213
12.3 Preoperative Management	214
12.4 Surgical Technique	215
12.5 Preoperative Medications	215
12.6 Epithelial Removal	215
12.6.1 Mechanical	216
12.6.2 Chemical	216
12.6.3 LASEK	216
12.6.4 Laser	217
12.6.5 Transepithelial	217
12.6.6 Stromal Treatment	217
12.7 Nomogram and Laser Algorithm	218
12.7.1 Centration	218
12.7.2 Stromal Cooling	218
12.8 Postoperative Management	219
12.8.1 Medications	219
12.8.2 Epithelial Healing	219
12.9 Complications	220
12.9.1 Haloes and Glare	220
12.9.2 Loss of Visual Performance	220
12.10 Late Complications	220
12.10.1 Undercorrection	220
12.10.2 Overcorrection	221
12.10.3 Haze and Regression	221
12.10.4 Treatment of Haze and Regression	222
12.10.5 Decentration	223
12.10.6 Irregular Astigmatism	223
12.11 Results	224
12.11.1 Myopic PRK	224
12.11.2 Hyperopic PRK	224
12.12 Summary	227

13 Reviewing the Wavefront Clinical Trials: Myopia, Hyperopia, and Eyes with Reduced Acuity

C. Kraff, W.B. Jackson, R.K. Maloney, J. Stevens	229
13.1 Wavefront-Guided Myopia Treatment Results	229
13.2 Study Description	229
13.3 Patient Satisfaction with Night Vision	231
13.4 Summary	233

13.5	Hyperopia Study	233
13.6	Study Description	234
13.7	Case Study	235
13.8	Reduced Acuity Patients	236
13.9	Case Study	236
13.10	Conclusion	237

14 Refractive Surgical Applications of Femtosecond Lasers

F.H. Loesel, B. Cosar, S. Goker, R. Kessler, A.B. Sener, M. Weinacht, L. Zickler		239
14.1	Introduction	239
14.2	Laser–Tissue Interaction	241
14.3	All-Solid-State Femtosecond Laser Technology	242
14.4	Instrumentation	246
14.4.1	Femtosecond Laser Application System for Clinical Use ..	246
14.4.2	Ophthalmic Femtosecond Laser Procedures	247
14.5	Experimental Results	250
14.6	First Clinical Experience with the FEMTEC Laser	253
14.7	Conclusion and Outlook	255
