

Contents

Part I Commemorative Meeting

Address from the Japan Academy	
<i>Saburo Nagakura</i>	3
Heisenberg und die Verantwortung des Forschers	
<i>Reimar Lüst</i>	5
1 Einleitung	5
2 Staatsbürger und Patriot	6
3 Wegbereiter der Wissenschaft in Deutschland	8
4 Förderer internationaler Zusammenarbeit in der Wissenschaft	11
English translation:	
Heisenberg and the Scientist's Responsibility	15
Werner Heisenberg (1901–1976)	
<i>Chen Ning Yang</i>	25

Part II Scientific Symposium

Welcome Address	
<i>Julius Wess</i>	33
Heisenberg's Uncertainty and Matter Wave Interferometry with Large Molecules	
<i>Markus Arndt, Anton Zeilinger</i>	35
1 Quantum Physics at the Microscopic/Mesoscopic Interface	35
2 Heisenberg's Uncertainty Relation	36
3 Young's Double/Multi-slit Experiment with Buckyballs	40
4 Interchanging the Roles of Light and Matter	43
5 A Scalable Interferometer for Large Molecules	45

6 Perspectives	49
References	50

The Stability of Matter and Quantum Electrodynamics

<i>Elliott H. Lieb</i>	53
1 Foreword	53
2 Introduction	54
3 Nonrelativistic Matter Without the Magnetic Field	57
4 Relativistic Kinematics (No Magnetic Field)	60
5 Interaction of Matter with Classical Magnetic Fields	61
6 Relativity Plus Magnetic Fields	64
References	67

The Quantum Theory of Light and Matter – Mathematical Results

<i>Jürg Fröhlich</i>	69
1 Introduction	69
2 Ultraviolet Renormalization of the “Standard Model”	72
3 Stability of Matter [4]	73
4 Atomic Spectra [5]	73
5 Scattering Theory [6]	74
6 Return to Equilibrium, Thermal Ionization	75
References	76

Four Big Questions with Pretty Good Answers

<i>Frank Wilczek</i>	79
1 What Is the Origin of Mass?	79
2 Why Is Gravity Feeble?	86
3 Are the Laws of Physics Unique?	88
4 What Happens if You Keep Squeezing?	93
References	97

Supersymmetry: the Next Spectroscopy

<i>Michael E. Peskin</i>	99
1 Introduction	99
2 Triumphs and Problems of the Standard Model	100
3 Supersymmetry	104
4 Supersymmetry as the Successor to the Standard Model	106
5 Beyond the Supersymmetric Standard Model	114
6 Interpretation of the SUSY-Breaking Parameters	116
7 Measuring the Superspectrum	120
8 Conclusions	130
References	131

Neutrino Masses as a Probe of Grand Unification

<i>Guido Altarelli</i>	135
1 Introduction	135
2 Neutrino Masses and Lepton Number Violation	136
3 Four-Neutrino Models	137
4 Three-Neutrino Models	139
5 Simple Examples with Horizontal Abelian Charges	144
6 From Minimal to Realistic SUSY $SU(5)$	149
7 $SU(5)$ Unification in Extra Dimensions	151
8 $SO(10)$ Models	152
9 Conclusion	153
References	154

M Theory: Uncertainty and Unification

<i>Joseph Polchinski</i>	157
1 Introduction	157
2 A Fundamental Length	158
3 Uncertainty	159
4 Nonlinearity	162
5 Observables	164
6 On to Heligoland	165
References	166

The Highest Energy Particles in Nature: What We Know and What the Future Holds

<i>Alan A. Watson</i>	167
1 Introduction	167
2 Measurement of UHECR	168
3 The Energy Spectrum, Arrival Direction Distribution and Mass of UHECRs	169
4 Theoretical Interpretations	174
5 Detectors of the Future	176
6 Conclusions	179
References	180

Part III Appendix

Biographical Notes on Werner Heisenberg

<i>Helmut Rechenberg</i>	183
