

Contents

List of Frequently Used Symbols	XV
1. Introduction	1
1.1 Atoms, Crystals and Visualization	1
1.2 Crystal Growth Far from Equilibrium	5
1.3 Epitaxy	8
1.4 About this Book	10
2. Condensation, Diffusion and Nucleation	13
2.1 Arriving at the Surface: Sticking and Transient Mobility	13
2.2 Moving on: Surface Diffusion	16
2.2.1 The Surface Diffusion Coefficient	16
2.2.2 Transition State Theory	18
2.2.3 Direct Observation of Adatom Diffusion	20
2.2.4 The Onset Method	22
2.2.5 Theoretical Estimates of Diffusion Parameters on Pt(111)	24
2.3 Getting Together: Two-Dimensional Nucleation	25
2.3.1 Atomistic Nucleation Theory	25
2.3.2 The Island Size Distribution	29
2.3.3 Experimental Test of Nucleation Theory	31
2.3.4 Binding Energies from Island Densities	35
2.4 Supplementary Topics	41
2.4.1 Condensation on Clusters and at Steps	41
2.4.2 Exchange Diffusion	46
2.4.3 Nucleation and Random Walks	47
2.4.4 Nucleation with Mobile Clusters	49
2.4.5 Adatom–Adatom Interactions and Nucleation Theory .	51
2.4.6 Adsorbate Influenced Diffusion and Nucleation	54
3. Island Shapes	61
3.1 Island Shapes and the Hierarchy of Diffusion Processes	61

3.2	The Equilibrium Shape of Adatom and Vacancy Islands	66
3.2.1	Definition and the Wulff Construction.....	66
3.2.2	Experimental Realization of 2D Equilibrium Shapes ..	69
3.2.3	The Ising Model and the Awning Approximation	72
3.2.4	Absolute Energy Values for Steps and Kinks	78
3.3	Fractal-Dendritic Islands	81
3.4	Compact, Triangular Islands	88
3.5	Adsorbates and Island Shapes	94
3.6	Shape Instabilities and the Diffusion Field	99
3.7	Supplementary Topics.....	109
3.7.1	Migration Along Rough Island Edges	109
3.7.2	The Transition from Fractal-Dendritic to Compact Islands: Theory Versus Experiment	112
3.7.3	Stability Criteria for Compact Islands.....	116
4.	Pattern Formation in Multilayer Growth	121
4.1	The Temperature Dependence of Multilayer Growth	121
4.1.1	Growth Modes on Pt(111): TEAS	124
4.1.2	Growth Modes on Pt(111): STM	126
4.1.3	Roughness Measures	127
4.2	Statistical Growth and the Shape of Wedding Cakes	129
4.3	Interlayer Transport	138
4.3.1	The Step Edge Barrier and Some of Its Consequences .	138
4.3.2	Theory of Second Layer Nucleation	142
4.3.3	Experimental Determination of the Step Edge Barrier .	146
4.3.4	Theoretical Estimates of Step Crossing Rates on Pt(111)	155
4.4	Step Atomic Structure and Growth Modes on Pt(111)	158
4.4.1	A Model for the Effective Step Edge Barrier	158
4.4.2	Film Thickness Dependence of ΔE_S^{eff} at 440 K	159
4.4.3	Low Temperature Growth on Pt(111)	161
4.4.4	Growth Bifurcation Around 500 K	163
4.4.5	CO Adsorption and Mound Growth on Pt(111)	165
4.4.6	A Criterion for Mound Growth.....	167
4.5	Mound Formation with Weak Barriers	168
4.5.1	Diffusion Bias and the Growth-Induced Current	169
4.5.2	Weak Barriers: Onset of the Instability	171
4.5.3	Weak Barriers: Mound Shapes	175
4.6	Long Time Evolution of the Mound Morphology.....	176
4.6.1	Slope Selection	176
4.6.2	Coarsening	179
4.7	Growth Instabilities of Vicinal Surfaces.....	186
4.7.1	Stability of a Step Train.....	187
4.7.2	Step Meandering: The Bales–Zangwill Instability	188

4.7.3	Step Meandering: Experiments and Alternative Mechanisms	191
4.7.4	The Ultimate Fate of Step Flow	195
4.8	Self-Affine Growth	197
4.8.1	Universality Classes of Kinetic Roughening	200
4.8.2	Conserved and Nonconserved Growth	201
4.8.3	Kinetic Roughening and Mound Formation	204
4.9	Supplementary Topics	206
4.9.1	Growth Regimes and Surface Atomic Structure	206
4.9.2	Ripple Formation in Homoepitaxial Growth	209
4.9.3	Derivation of the Step Edge Boundary Condition	211
4.9.4	Second Layer Nucleation and Rate Equations	213
4.9.5	Second Layer Nucleation with Reversible Aggregation	214
4.9.6	Further Experimental Signatures of the Step Edge Barrier	215
4.9.7	Diffusion Bias Without a Step Edge Barrier	218
4.9.8	Continuum Theory of Mound Coarsening	219
4.9.9	Stability of Vicinal Surfaces: Continuum Approach ...	225
5.	Layer-By-Layer Growth and Growth Manipulation	227
5.1	Basic Concepts	227
5.2	Layer-By-Layer Growth by Surfactants	230
5.3	Layer-By-Layer Growth Through Growth Manipulation	236
5.4	Layer-By-Layer Growth Through Surface Reconstruction ...	238
5.5	Theory of Pulsed Deposition	245
5.6	Kinetic Roughening and Layer-By-Layer Growth	248
6.	Methods	253
6.1	Deposition and Vacuum	253
6.2	Microscopy	256
6.2.1	Scanning Tunneling Microscopy	257
6.2.2	Field Ion Microscopy	261
6.3	Diffraction	264
6.4	Total Energy Calculations	269
6.4.1	Density Functional Theory	270
6.4.2	Semi-Empirical Many Body Potentials	273
6.5	Growth Simulations	277
6.5.1	Molecular Dynamics	277
6.5.2	The Kinetic Monte Carlo Method	278
6.5.3	Constructing KMC Models	281
6.5.4	Hybrid Approaches	285
	References	287
	Index	307

Islands, Mounds and Atoms

Michely, Th.; Krug, J.

2004, XVIII, 315 p., Hardcover

ISBN: 978-3-540-40728-7
