

# Contents

## **Chapter 1 Matrices: Definitions and Fundamental Operations 1**

Fundamental Matrix Operations 3

Linear Algebra 5

Eigenvalues 9

Linear Transformations 13

Rotation of Axes 14

The Metric Tensor 17

## **Chapter 2 Symmetry of Finite Objects 20**

Groups 20

Representations 21

Point Groups 22

Basis Functions 37

## **Chapter 3 Symmetry of Infinitely Repeated Patterns 40**

Bravais Lattices 40

Space Groups 41

## **Chapter 4 Vectors 49**

Scalar and Vector Products 50

The Reciprocal Lattice 52

The Orientation Matrix 54

Zones and Forms 56

Sublattices and Superlattices 56

## **Chapter 5 Tensors 58**

Covariance and Contravariance 59

The Multivariate Normal Distribution 60

Anisotropic Atomic Displacement Factors 62

The Equivalent Isotropic Temperature Factor 65

Effect of Symmetry 65

Tensors of Higher Ranks 67

Moments and Cumulants 69

Rigid Body Motion 72

## **Chapter 6 Data Fitting 77**

Fitting Functions 77

Finding the Minimum 82

False Minima 92

## **Chapter 7 Estimation of Uncertainty 95**

Estimates 96

The Precision of Estimates of Precision 100

Models with More than One Parameter 102

Estimates of Precision When the Model Is Not Least Squares 103

## **Chapter 8 Significance and Accuracy 107**

The  $F$  Distribution 107

Student's  $t$  Distribution 111

Correlation 112

Relationship Between Precision and Accuracy 115

Uncertainties of Derived Functions 120

The Projection Matrix 120

## **Chapter 9 Constrained Crystal Structure Refinement 124**

The Observed Data 124

The Model 126

The General Form for a Constrained Model 128

Shape Constraints 129

Rigid Body Thermal Motion Constraints 131

Chemical Constraints 133

Representing non-Gaussian Distributions 134

## **Chapter 10 The Fast Fourier Transform 140**

The Discrete Fourier Transform 140

The Good-Thomas Algorithm 142

The Cooley-Tukey Algorithm 144

Prime Numbers 145

FFTs for Real Sequences 149

Space Group Symmetry 152

<b>Appendix A</b>	Stereographic Projection	157
<b>Appendix B</b>	Eigenvalues and Eigenvectors of $3 \times 3$ Symmetric Matrices	161
<b>Appendix C</b>	Sublattices and Superlattices	163
<b>Appendix D</b>	The Probability Integral, the Gamma Function, and Related Topics	165
<b>Appendix E</b>	The Harmonic Oscillator in Quantum Mechanics: Bloch's Theorem	173
<b>Appendix F</b>	Symmetry Restrictions on Second, Third, and Fourth Rank Tensors	181
<b>Appendix G</b>	Some Useful Computer Programs	187
<b>Bibliography</b>		<b>217</b>
<b>Index</b>		<b>219</b>
