
Table of Contents

List of Contributors	XVII
1 Introduction	1
2 Integration of Neural and Fuzzy	3
<i>Peter Stavroulakis</i>	
2.1 Introduction	3
2.2 Hybrid Artificial Intelligent Systems	6
2.2.1 Neuro-Fuzzy Systems	7
2.2.2 Examples [12–18]	27
References	38
3 Neuro-Fuzzy Applications in Speech Coding and Recognition . .	41
<i>Francesco Beritelli, Marco Russo and Salvatore Serrano</i>	
3.1 Introduction	41
3.2 Soft Computing	42
3.3 FuGeNeSys: A Neuro-Fuzzy Learning Tool for Fuzzy Modeling . .	43
3.3.1 Genetic Algorithms	44
3.3.2 The Fuzzy Inferential Method Adopted and its Coding	45
3.3.3 Fuzzy Inference Complexity	47
3.4 Conventional Speech Coding and Recognition Techniques	47
3.4.1 Speech Recognition	47
3.4.2 Speech Coding	53
3.5 A Soft Computing-Based Approach in Speech Classification . . .	56
3.6 Neuro-Fuzzy Applications in Speech Coding and Recognition . .	57
3.6.1 Voiced/Unvoiced Classification	57
3.6.2 Voice Activity Detection	60
3.6.3 Endpoint Detection	66
3.7 Conclusions	76
References	76
4 Image/Video Compression Using Neuro-Fuzzy Techniques	79
<i>Wan-Jui Lee, Chen-Sen Ouyang and Shie-Jue Lee</i>	
4.1 Introduction	79
4.1.1 Image Compression	79

4.1.2	Video Compression	80
4.1.3	Fuzzy Theory and Neural Networks	81
4.2	Neuro-Fuzzy Techniques	82
4.2.1	Fuzzy Kohonen Clustering Networks (FKCN)	83
4.2.2	Fuzzy-ART Networks	85
4.2.3	Self-Constructing Fuzzy Neural Networks (SCFNN)	87
4.3	Neuro-Fuzzy Based Vector Quantization for Image Compression	91
4.3.1	VQ Encoding/Decoding	92
4.3.2	Clustering by SCFNN	93
4.3.3	Experimental Results	94
4.4	Image Transmission by NITF	99
4.4.1	Encoding a VQ Compressed NITF Image	99
4.4.2	Decoding a VQ Compressed NITF Image	101
4.5	Neuro-Fuzzy Based Video Compression	103
4.5.1	System Overview	104
4.5.2	Clustering by SCFNN	105
4.5.3	Labeling Segments	106
4.5.4	Human Object Estimation	107
4.5.5	Human Object Refinement	109
4.5.6	Experimental Results	114
	References	116
5	A Neuro-Fuzzy System for Source Location and Tracking in Wireless Communications	119
	<i>Ana Perez-Neira, Joan Bas, Miguel A. Lagunas</i>	
5.1	Introduction	119
5.2	Problem Statement	120
5.2.1	Signal Model	120
5.2.2	The Periodogram as a Motivational Tool for a Neuro-Fuzzy System	122
5.2.3	Fuzzy Logic for Model-Free Function Approximation	123
5.3	The Architecture of the Fuzzy-Neural Network	125
5.3.1	Fuzzification	125
5.3.2	Inference	128
5.3.3	Defuzzification	128
5.4	Design of the Rule Base	131
5.4.1	Initialization	131
5.4.2	Training of the Neuro-Fuzzy System	133
5.4.3	Back-Propagation Algorithm	133
5.4.4	Steps to Follow in the Design of the Rule Base	137
5.5	Simulations	139
5.5.1	Gaussian Fuzzy Sets	139
5.5.2	Triangular Fuzzy Sets	142
5.6	Neuro-Fuzzy System Evaluation	142
	References	147

6	Fuzzy-Neural Applications in Handoff	149
6.1	Introduction	149
6.2	Application of a Neuro-Fuzzy System to Handoffs in Cellular Communications	150
	<i>Nishith D. Tripathi, Jeffrey H. Reed and Hugh F. Vanlandingham</i>	
6.2.1	Introduction	150
6.2.2	Handoff Algorithms	153
6.2.3	Analysis of Handoff Algorithms	160
6.2.4	Neural Encoding Based Neuro-Fuzzy System	163
6.2.5	Pattern Recognition Based Neuro-Fuzzy System	180
6.2.6	Application of a Neuro-Fuzzy Handoff Approach to Various Cellular Systems	184
6.2.7	Conclusion	196
	References	197
6.3	Handoff Based Quality of Service Control in CDMA Systems Using Neuro-Fuzzy Techniques	198
	<i>Bongkarn Homnan and Watit Benjapolakul</i>	
6.3.1	Introduction	198
6.3.2	Classification of the Problems and Performance Indicators	201
6.3.3	An Overview of IS-95A and IS-95B/cdma2000 SHOs	202
6.3.4	Simple Step Control Algorithm (SSC)	204
6.3.5	FIS SHO and FIS&GD SHO	205
6.3.6	System Model, Computer Simulation and Results	215
6.3.7	Evaluation of Handoff as a Quality of Service Controller	231
	References	233
7	An Application of Neuro-Fuzzy Systems for Access Control in Asynchronous Transfer Mode Networks	235
	<i>Watit Benjapolakul and Aimaschana Niruntasukrat</i>	
7.1	Introduction	235
7.2	Traffic Control in ATM Networks	237
7.2.1	Call Admission Control: CAC	238
7.2.2	Usage Parameter Control: UPC	238
7.2.3	Performance Evaluation of Traffic Policing Mechanism	242
7.3	Traffic Source Model and Traffic Policing Mechanism	243
7.3.1	Traffic Source Model used in Simulation Test	243
7.3.2	Structure of Traffic Policing Mechanism for Comparison	244
7.3.3	Structure of Traffic Policing Mechanism Using NFS	247
7.3.4	General Problem Statement	253
7.4	Performance of FLLB Policing Mechanism	254
7.4.1	Effects of Token Pool Size on Policing Performance	254
7.5	Performance of NFS LB Policing Mechanism	263
7.5.1	NN Structure	264
7.5.2	Simulation Results when Tested with Source Model 1	265
7.5.3	Comparison of Processing Time of FL and NFS Controllers	279

7.6	Evaluation of Simulation Results	279
	References	281
Appendix A. Overview of Neural Networks		283
<i>Peter Stavroulakis</i>		
A.1	Introduction	283
A.2	Learning by Neural Networks	285
A.2.1	Multilayer, Feedforward Network Structure	285
A.2.2	Training the Feedforward Network: The Delta Rule (DR) and the Generalized Delta Rule (GDR) Back-Propagation	286
A.2.3	The Hopfield Approach to Neural Computing	287
A.2.4	Unsupervised Classification Learning	287
A.3	Examples of Neural Network Structures for PR Applications	289
A.3.1	Neural Network Structure	289
A.3.2	Learning in Neural Networks	291
A.3.3	Reasons to Adapt a Neural Computational Architecture	291
	References	292
Appendix B. Overview of Fuzzy Logic Systems		293
<i>Peter Stavroulakis</i>		
B.1	Introduction	293
B.2	Overview of Fuzzy Logic	293
B.2.1	Fuzzy Rule Generation	294
B.2.2	Defuzzification of Fuzzy Logic	295
B.3	Examples	295
B3.1	Fuzzy Pattern Recognition	295
	References	300
Appendix C. Examples of Fuzzy-Neural and Neuro-Fuzzy Integration		301
<i>Peter Stavroulakis</i>		
C.1	Fuzzy-Neural Classification	301
C.1.1	Introduction	301
C.1.2	Uncertainties with Two-Class Fuzzy-Neural Classification Boundaries	306
C.1.3	Multilayer Fuzzy-Neural Classification Networks	309
C.2	Fuzzy-Neural Clustering	310
C.2.1	Fuzzy Competitive Learning for Fuzzy Clustering	310
C.2.2	Adaptive Fuzzy Leader Clustering	312
C.3	Fuzzy-Neural Models for Image Processing	315
C.3.1	Fuzzy Self Supervised Multilayer Network for Object Extraction	315
C.4	Fuzzy-Neural Networks for Speech Recognition	321
C.4.1	Introduction	321
C.4.2	Problem Definition	321
C.4.3	Fuzzy-Neural Approach	321

C.5	Fuzzy-Neural Hybrid Systems for System Diagnosis	323
C.5.1	Introduction	323
C.5.2	Hybrid Systems	324
C.6	Neuro-Fuzzy Adaptation of Learning Parameters – An Application in Chromatography	327
C.6.1	Introduction	327
C.6.2	Fuzzy Training of Neural Networks	328
C.6.3	Conclusions	334
	References	335

Neuro-Fuzzy and Fuzzy-Neural Applications in
Telecommunications

Stavroulakis, P. (Ed.)

2004, XVIII, 339 p., Hardcover

ISBN: 978-3-540-40759-1
