Part One: Ample Line Bundles and Linear Series

Introduction to Part One	5
--------------------------------	---

1 Ample and Nef Line Bundles	7
1.1 Preliminaries: Divisors, Line Bundles, and Linear Series	7
1.1.A Divisors and Line Bundles	8
1.1.B Linear Series	12
1.1.C Intersection Numbers and Numerical Equivalence	15
1.1.D Riemann–Roch	20
1.2 The Classical Theory	24
1.2.A Cohomological Properties	25
1.2.B Numerical Properties	33
1.2.C Metric Characterizations of Amplitude	39
1.3 \mathbf{Q} -Divisors and \mathbf{R} -Divisors	44
1.3.A Definitions for \mathbf{Q} -Divisors	44
1.3.B \mathbf{R} -Divisors and Their Amplitude	48
1.4 Nef Line Bundles and Divisors	50
1.4.A Definitions and Formal Properties	51
1.4.B Kleiman’s Theorem	53
1.4.C Cones	59
1.4.D Fujita’s Vanishing Theorem	65
1.5 Examples and Complements	70
1.5.A Ruled Surfaces	70
1.5.B Products of Curves	73
1.5.C Abelian Varieties	79
1.5.D Other Varieties	80
1.5.E Local Structure of the Nef Cone	82

1.5.F	The Cone Theorem	86
1.6	Inequalities	88
1.6.A	Global Results	88
1.6.B	Mixed Multiplicities	91
1.7	Amplitude for a Mapping	94
1.8	Castelnuovo–Mumford Regularity	98
1.8.A	Definitions, Formal Properties, and Variants	99
1.8.B	Regularity and Complexity	107
1.8.C	Regularity Bounds	110
1.8.D	Syzygies of Algebraic Varieties	115
	Notes	119
2	Linear Series	121
2.1	Asymptotic Theory	121
2.1.A	Basic Definitions	122
2.1.B	Semiample Line Bundles	128
2.1.C	Iitaka Fibration	133
2.2	Big Line Bundles and Divisors	139
2.2.A	Basic Properties of Big Divisors	139
2.2.B	Pseudoeffective and Big Cones	145
2.2.C	Volume of a Big Divisor	148
2.3	Examples and Complements	157
2.3.A	Zariski’s Construction	158
2.3.B	Cutkosky’s Construction	159
2.3.C	Base Loci of Nef and Big Linear Series	164
2.3.D	The Theorem of Campana and Peternell	166
2.3.E	Zariski Decompositions	167
2.4	Graded Linear Series and Families of Ideals	172
2.4.A	Graded Linear Series	172
2.4.B	Graded Families of Ideals	176
	Notes	183
3	Geometric Manifestations of Positivity	185
3.1	The Lefschetz Theorems	185
3.1.A	Topology of Affine Varieties	186
3.1.B	The Theorem on Hyperplane Sections	192
3.1.C	Hard Lefschetz Theorem	199
3.2	Projective Subvarieties of Small Codimension	201
3.2.A	Barth’s Theorem	201
3.2.B	Hartshorne’s Conjectures	204
3.3	Connectedness Theorems	207
3.3.A	Bertini Theorems	207
3.3.B	Theorem of Fulton and Hansen	210
3.3.C	Grothendieck’s Connectedness Theorem	212
3.4	Applications of the Fulton–Hansen Theorem	213
3.4.A	Singularities of Mappings	214

3.4.B	Zak's Theorems	219
3.4.C	Zariski's Problem	227
3.5	Variants and Extensions	231
3.5.A	Homogeneous Varieties	231
3.5.B	Higher Connectivity	233
	Notes	237
4	Vanishing Theorems	239
4.1	Preliminaries	240
4.1.A	Normal Crossings and Resolutions of Singularities	240
4.1.B	Covering Lemmas	242
4.2	Kodaira and Nakano Vanishing Theorems	248
4.3	Vanishing for Big and Nef Line Bundles	252
4.3.A	Statement and Proof of the Theorem	252
4.3.B	Some Applications	257
4.4	Generic Vanishing Theorem	261
	Notes	267
5	Local Positivity	269
5.1	Seshadri Constants	269
5.2	Lower Bounds	278
5.2.A	Background and Statements	278
5.2.B	Multiplicities of Divisors in Families	282
5.2.C	Proof of Theorem 5.2.5	286
5.3	Abelian Varieties	290
5.3.A	Period Lengths and Seshadri Constants	290
5.3.B	Proof of Theorem 5.3.6	297
5.3.C	Complements	301
5.4	Local Positivity Along an Ideal Sheaf	303
5.4.A	Definition and Formal Properties of the s-Invariant	303
5.4.B	Complexity Bounds	308
	Notes	312
<hr/> Appendices <hr/>		
A	Projective Bundles	315
B	Cohomology and Complexes	317
B.1	Cohomology	317
B.2	Complexes	320
	References	325
	Glossary of Notation	359
	Index	365

Contents of Volume II

Notation and Conventions	II: 1
<hr/>	
Part Two: Positivity for Vector Bundles	
<hr/>	
Introduction to Part Two	II: 5
6 Ample and Nef Vector Bundles	II: 7
6.1 Classical Theory	II: 7
6.1.A Definition and First Properties	II: 8
6.1.B Cohomological Properties	II: 11
6.1.C Criteria for Amplitude	II: 15
6.1.D Metric Approaches to Positivity of Vector Bundles	II: 18
6.2 \mathbf{Q} -Twisted and Nef Bundles	II: 20
6.2.A Twists by \mathbf{Q} -Divisors	II: 20
6.2.B Nef Bundles	II: 24
6.3 Examples and Constructions	II: 27
6.3.A Normal and Tangent Bundles	II: 27
6.3.B Ample Cotangent Bundles and Hyperbolicity	II: 36
6.3.C Picard Bundles	II: 44
6.3.D The Bundle Associated to a Branched Covering	II: 47
6.3.E Direct Images of Canonical Bundles	II: 51
6.3.F Some Constructions of Positive Vector Bundles	II: 53
6.4 Ample Vector Bundles on Curves	II: 56
6.4.A Review of Semistability	II: 57
6.4.B Semistability and Amplitude	II: 60
Notes	II: 64
7 Geometric Properties of Ample Bundles	II: 65
7.1 Topology	II: 65
7.1.A Sommese's Theorem	II: 65

7.1.B	Theorem of Bloch and Gieseker	II: 68
7.1.C	A Barth-Type Theorem for Branched Coverings	II: 71
7.2	Degeneracy Loci	II: 74
7.2.A	Statements and First Examples	II: 74
7.2.B	Proof of Connectedness of Degeneracy Loci	II: 78
7.2.C	Some Applications	II: 82
7.2.D	Variants and Extensions	II: 87
7.3	Vanishing Theorems	II: 89
7.3.A	Vanishing Theorems of Griffiths and Le Potier	II: 89
7.3.B	Generalizations	II: 95
	Notes	II: 98
8	Numerical Properties of Ample Bundles	II: 101
8.1	Preliminaries from Intersection Theory	II: 101
8.1.A	Chern Classes for \mathbf{Q} -Twisted Bundles	II: 102
8.1.B	Cone Classes	II: 104
8.1.C	Cone Classes for \mathbf{Q} -Twists	II: 110
8.2	Positivity Theorems	II: 111
8.2.A	Positivity of Chern Classes	II: 111
8.2.B	Positivity of Cone Classes	II: 114
8.3	Positive Polynomials for Ample Bundles	II: 117
8.4	Some Applications	II: 125
8.4.A	Positivity of Intersection Products	II: 125
8.4.B	Non-Emptiness of Degeneracy Loci	II: 127
8.4.C	Singularities of Hypersurfaces Along a Curve	II: 129
	Notes	II: 132

Part Three: Multiplier Ideals and Their Applications

Introduction to Part Three	II: 135
9 Multiplier Ideal Sheaves	II: 139
9.1 Preliminaries	II: 140
9.1.A \mathbf{Q} -Divisors	II: 140
9.1.B Normal Crossing Divisors and Log Resolutions	II: 142
9.1.C The Kawamata–Viehweg Vanishing Theorem	II: 147
9.2 Definition and First Properties	II: 151
9.2.A Definition of Multiplier Ideals	II: 152
9.2.B First Properties	II: 158
9.3 Examples and Complements	II: 162
9.3.A Multiplier Ideals and Multiplicity	II: 162
9.3.B Invariants Arising from Multiplier Ideals	II: 165
9.3.C Monomial Ideals	II: 170
9.3.D Analytic Construction of Multiplier Ideals	II: 176

9.3.E	Adjoint Ideals	II: 179
9.3.F	Multiplier and Jacobian Ideals	II: 181
9.3.G	Multiplier Ideals on Singular Varieties	II: 182
9.4	Vanishing Theorems for Multiplier Ideals	II: 185
9.4.A	Local Vanishing for Multiplier Ideals	II: 186
9.4.B	The Nadel Vanishing Theorem	II: 188
9.4.C	Vanishing on Singular Varieties	II: 191
9.4.D	Nadel's Theorem in the Analytic Setting	II: 192
9.4.E	Non-Vanishing and Global Generation	II: 193
9.5	Geometric Properties of Multiplier Ideals	II: 195
9.5.A	Restrictions of Multiplier Ideals	II: 195
9.5.B	Subadditivity	II: 201
9.5.C	The Summation Theorem	II: 204
9.5.D	Multiplier Ideals in Families	II: 210
9.5.E	Coverings	II: 213
9.6	Skoda's Theorem	II: 216
9.6.A	Integral Closure of Ideals	II: 216
9.6.B	Skoda's Theorem: Statements	II: 221
9.6.C	Skoda's Theorem: Proofs	II: 226
9.6.D	Variants	II: 228
	Notes	II: 230
10	Some Applications of Multiplier Ideals	II: 233
10.1	Singularities	II: 233
10.1.A	Singularities of Projective Hypersurfaces	II: 233
10.1.B	Singularities of Theta Divisors	II: 235
10.1.C	A Criterion for Separation of Jets of Adjoint Series	II: 238
10.2	Matsusaka's Theorem	II: 239
10.3	Nakamaye's Theorem on Base Loci	II: 246
10.4	Global Generation of Adjoint Linear Series	II: 251
10.4.A	Fujita Conjecture and Angehrn–Siu Theorem	II: 252
10.4.B	Loci of Log-Canonical Singularities	II: 254
10.4.C	Proof of the Theorem of Angehrn and Siu	II: 258
10.5	The Effective Nullstellensatz	II: 262
	Notes	II: 267
11	Asymptotic Constructions	II: 269
11.1	Construction of Asymptotic Multiplier Ideals	II: 270
11.1.A	Complete Linear Series	II: 270
11.1.B	Graded Systems of Ideals and Linear Series	II: 276
11.2	Properties of Asymptotic Multiplier Ideals	II: 282
11.2.A	Local Statements	II: 282
11.2.B	Global Results	II: 285
11.2.C	Multiplicativity of Plurigenera	II: 292
11.3	Growth of Graded Families and Symbolic Powers	II: 293

XVIII Contents of Volume II

11.4 Fujita's Approximation Theorem	II: 299
11.4.A Statement and First Consequences	II: 299
11.4.B Proof of Fujita's Theorem	II: 305
11.4.C The Dual of the Pseudoeffective Cone	II: 307
11.5 Siu's Theorem on Plurigenera	II: 312
Notes	II: 320
References	II: 323
Glossary of Notation	II: 357
Index	II: 363

Positivity in Algebraic Geometry I

Classical Setting: Line Bundles and Linear Series

Lazarsfeld, R.K.

2004, XVIII, 387 p., Hardcover

ISBN: 978-3-540-22533-1
