### Part One – Printed Volume

<b>1</b>	<b>The Mediterranean Area and the Surrounding Regions: Active Processes, Remnants of Former Tethyan Oceans and Related Thrustbelts</b> .....	<b>1</b>
	<i>William Cavazza · François Roure · Peter A. Ziegler</i>	
	Abstract .....	1
1.1	Introduction .....	1
1.2	Mediterranean Fold-and-thrust Belts .....	2
1.3	Mediterranean Marine Basins .....	7
1.4	Geological-geophysical Baseline .....	11
1.4.1	Heat Flow .....	11
1.4.2	Crustal and Lithospheric Structure .....	11
1.4.3	Gravity .....	11
1.4.4	Magnetic Field .....	14
1.4.5	Seismicity .....	15
1.4.6	Geodetic Data .....	16
1.4.7	Stress Field .....	18
1.5	Global Dynamics and Active Processes Exemplified in the Mediterranean ...	18
1.5.1	Subduction of the Eastern Mediterranean Lithosphere beneath the Calabrian and Aegean Arcs .....	20
1.5.2	Rifting and Passive Margin Development in Back-arc Regions and Other Mediterranean Domains .....	20
1.5.3	Mud and Salt Diapirism Related to Tectonic Wedges, Tilted Blocks and Sedimentary Loading (Eastern Mediterranean Ridge, Alboran Sea, Nile Delta) .....	22
1.5.4	Sea-level Changes, Salinity Crisis, Flooding (Messinian Mediterranean versus Pleistocene Black Sea) .....	22
1.6	Record of Ancient Dynamics of the Tethyan Oceans, Ophiolitic Sutures, Mantle Tomography versus Paleogeography of the Mediterranean Realm ...	23
1.6.1	Collisional vs. Intracontinental Thrust Belts and Oceanic Sutures ...	23
1.6.2	Plate Dynamics and Palinspastic Restorations: Demise of the Concept of a Single Tethys .....	23
1.6.3	Cenozoic Magmatism in the Mediterranean Region .....	24
1.7	Conclusions .....	28
	Acknowledgements .....	29
<b>2</b>	<b>A Tomographic View on Western Mediterranean Geodynamics</b> .....	<b>31</b>
	<i>Wim Spakman · Rinus Wortel</i>	
	Abstract .....	31
2.1	Introduction .....	31
2.2	The Global Tomography Model BS2000 .....	32
2.3	Interpretation of Model BS2000 for the Western Mediterranean Mantle .....	33
2.3.1	Alps, Apennines, and the Western Mediterranean .....	33
2.3.2	The Betic-Rif and Alboran Region .....	43
2.4	Analysis: the Geodynamic Evolution of the Western Mediterranean .....	44
2.4.1	Tomographic Evidence for Slab Roll-back .....	44

2.4.2	Northern Apennines and Alpine-Tethys Subduction .....	45
2.4.3	Slab Detachment beneath the Central-southern Apennines .....	45
2.4.4	Calabria Subduction .....	46
2.4.5	The North African Margin .....	46
2.4.6	Betic-Rif and Alboran Region: I. Subduction and Roll-back of Predominantly Oceanic Lithosphere .....	47
2.4.7	Betic-Rif Alboran Region: II. Development of Arc Geometry and Subduction Roll-back .....	48
2.4.8	Synthesis of Tomographic Constraints on the Geodynamic Evolution of the Western Mediterranean Region .....	48
2.5	Summary .....	51
	Acknowledgements .....	51
	Appendix 1 (CD-ROM) .....	51
	Appendix 2 (CD-ROM) .....	52
<b>3</b>	<b>The TRANSMED Transects in Space and Time: Constraints on the Paleotectonic Evolution of the Mediterranean Domain .....</b>	<b>53</b>
	<i>Gérard M. Stampfli · Gilles Borel</i>	
	Abstract .....	53
3.1	Introduction .....	53
3.2	The Western Tethys Main Plate Tectonic Constraints .....	56
3.2.1	The East Mediterranean-Neotethys Connection .....	56
3.2.2	The Apulia-Adria Problem .....	57
3.3	The Geodynamic Evolution of Greater Apulia and Surrounding Regions .....	60
3.3.1	Paleotethys Evolution (Figs. 3.2–3.6) .....	60
3.3.2	Cimmerian Events and Triassic Marginal Oceans (Figs. 3.6–3.9) ....	62
3.3.3	The Jurassic Oceans: Alpine Tethys, Central Atlantic and Vardar (Figs. 3.8–3.11) .....	66
3.3.4	The Cretaceous Oceans: North Atlantic and the Pyrenean Domain (Figs. 3.10–3.14) .....	69
3.4	The TRANSMED Transects in Space and Time .....	71
3.4.1	Transects I-II-III West .....	71
3.4.2	Transects IV-V-VI .....	77
3.4.3	Transects III East, VII and VIII .....	78
3.5	Conclusions .....	80
	Acknowledgements .....	80
	Appendix 3 (CD-ROM) .....	80
	<b>References: Preface, Chapters 1, 2 and 3 .....</b>	<b>81</b>
	<b>References: CD-ROM .....</b>	<b>91</b>
	Transect I: Iberian Meseta – Guadalquivir Basin – Betic Cordillera – Alboran Sea – Rif – Moroccan Meseta – High Atlas – Sahara Platform .....	91
	Transect II: Aquitaine Basin – Pyrenees – Ebro Basin – Catalan Coastal Ranges – Valencia Trough – Balearic Promontory – Algerian Basin – Kabylies – Atlas – Saharan Domain .....	97
	Transect III: Massif Central – Provence – Gulf of Lion – Provençal Basin – Sardinia – Tyrrhenian Basin – Southern Apennines – Apulia – Adriatic Sea – Albanian Dinarides – Balkans – Moesian Platform .....	103
	Transects IV, V and VI: The Alps and Their Forelands .....	108
	Transect VII: East European Craton – Scythian Platform – Dobrogea – Balkanides – Rhodope Massif – Hellenides – East Mediterranean – Cyrenaica .....	114
	Transect VIII: Eastern European Craton – Crimea – Black Sea – Anatolia – Cyprus – Levant Sea – Sinai – Red Sea .....	120

### Part Two – CD-ROM

I	<b>Transect I<sup>1</sup>:</b> <b>Iberian Meseta – Guadalquivir Basin – Betic Cordillera – Alboran Sea – Rif – Moroccan Meseta – High Atlas – Sahara Platform</b> <i>Dominique Frizon de Lamotte · Ana Crespo-Blanc · Bertrand Saint-Bézar</i> <i>Menchu Comas · Manel Fernàndez · Hermann Zeyen · Puy Ayarza</i> <i>Charles Robert-Charrue · Ahmed Chalouan · Mahmoud Zizi · Antonio Teixell</i> <i>Maria-Luisa Arboya · Fernando Alvarez-Lobato · André Michard</i>
I.1	Introduction
I.2	Description of the Broad Main Features along TRANSMED Transect I
I.2.1	The Betic and Rif Chains around the Alboran Sea: The Gibraltar Arc
I.2.2	The Atlas System
I.2.3	The Sahara Domain
I.2.4	Some Features of the Crustal and Lithospheric Structure
I.3	Sources of Information
I.3.1	Betics and Alboran Sea
I.3.2	Rif
I.3.3	Atlas
I.3.4	Sahara Domain
I.4	Description of Tectonostratigraphic and Lithostratigraphic Units
I.4.1	The Iberian Meseta and the Guadalquivir Basin
I.4.2	The Prebetic and Subbetic Units (South Iberian Cover)
I.4.3	The Alboran Domain
I.4.4	The Flysch Units
I.4.5	The External Rif
I.4.6	The Atlas System
I.4.7	The Sahara Domain
I.5	Structural Evolution along the Transect
II	<b>Transect II:</b> <b>Aquitaine Basin – Pyrenees – Ebro Basin – Catalan Range – Valencia Trough – Balearic Block – Algerian Basin – Kabylies – Atlas – Saharan Platform</b> <i>Eduard Roca · Dominique Frizon de Lamotte · Alain Mauffret</i> <i>Rabah Bracène · Jaume Vergés · Narimane Benaouali · Manel Fernàndez</i> <i>Josep Anton Muñoz · Hermann Zeyen</i>
II.1	Introduction
II.2	Significance of Transect II within the Mediterranean Framework
II.3	Sources of Information
II.3.1	Aquitaine Basin – Pyrenees – Ebro Basin
II.3.2	Catalan Coastal Ranges
II.3.3	València Trough
II.3.4	Balearic Promontory

---

<sup>1</sup> For orientation see Fig. 0.1 (page XVII) showing the study area and the geological transects.

II.3.5	Algerian Basin
II.3.6	Kabylies – Tell – Atlas
II.3.7	Saharan Domain
II.4	Description of Tectonic and Lithostratigraphic Units
II.4.1	Aquitaine Basin
II.4.2	Pyrenees
II.4.3	Ebro Basin
II.4.4	Catalan Coastal Ranges
II.4.5	València Trough
II.4.6	Balearic Promontory
II.4.7	Algerian Basin
II.4.8	Kabylies Domain
II.4.9	Flysch Units
II.4.10	External Tell Domain
II.4.11	Atlas System
II.4.12	Sahara Domain
II.5	Geodynamic Evolution along the Transect from End-Cretaceous to Present Time
II.5.1	Late Cretaceous (Campanian – 80 Ma)
II.5.2	Late Paleocene (Thanetian – 60 Ma)
II.5.3	Early Eocene (Ypresian – 50 Ma)
II.5.4	Late Eocene (Priabonian – 38 Ma)
II.5.5	Early Late Oligocene (Chattian – 28 Ma)
II.5.6	Late Oligocene (Chattian – 25 Ma)
II.5.7	Early Miocene (Burdigalian – 18 Ma)
II.5.8	Late Miocene (Tortonian – 10 Ma)
II.5.9	Quaternary
III	<b>Transect III:</b> <b>Massif Central – Provence – Gulf of Lion – Provençal Basin – Sardinia –</b> <b>Tyrrhenian Basin – Southern Apennines – Apulia – Adriatic Sea –</b> <b>Albanides – Balkans – Moesian Platform</b> <i>Eugenio Carminati · Carlo Doglioni · Andrea Argnani · Gabriela Carrara</i> <i>Christo Dabovski · Nikola Dumurdzanov · Maurizio Gaetani · Georgi Georgiev</i> <i>Alain Mauffret · Shaquir Nazai · Renzo Sartori · Veronica Scionti</i> <i>Davide Scrocca · Michel Séranne · Luigi Torelli · Ivan Zagorchev</i>
III.1	Introduction
III.1.1	The Present-day Geodynamic Scenario
III.1.2	Relics of Previous Geodynamic Processes
III.1.3	Present-day Crustal and Lithospheric Geometry
III.1.4	Peculiar Characters of TRANSMED Transect III
III.2	Sources of Information
III.2.1	French Massif Central – Gulf of Lion
III.2.2	Provençal Basin
III.2.3	Sardinia
III.2.4	Tyrrhenian Sea
III.2.5	Southern Apennines and Adriatic Sea
III.2.6	Albanian Dinarides
III.2.7	West Macedonian Zone, Pelagonian Massif, Vardar Zone and Serbo-Macedonian Massif
III.2.8	Morava-Rhodope Zone, Strouma Unit, Srednogorie Zone, Balkan Zone, Svoje and Berkovitsa Units, Fore-Balkan and Moesian Platform
III.3	Description of Tectonostratigraphic and Lithostratigraphic Units
III.3.1	French Massif Central – Gulf of Lion
III.3.2	Provençal Basin

	III.3.3	Sardinia
	III.3.4	Tyrrhenian Basin
	III.3.5	Southern Apennines and Adriatic Sea
	III.3.6	Albanian Dinarides
	III.3.7	West Macedonian Zone
	III.3.8	Pelagonian Massif
	III.3.9	Vardar Zone
	III.3.10	Serbo-Macedonian Massif
	III.3.11	Morava-Rhodope Zone
	III.3.12	Srednogie Zone
	III.3.13	Balkan (Stara-planina) Zone
	III.3.14	Fore-Balkan and Moesian Platform
III.4		Tectonic Evolution along the Transect
	III.4.1	Proterozoic (Pre-Cadomian) Stage
	III.4.2	Neoproterozoic-Early Paleozoic (Cadomian) Cycle
	III.4.3	Variscan Cycle
	III.4.4	Alpine and Dinaric Cycles
IV–VI		<b>Transects IV, V and VI:</b>
		<b>The Alps and Their Forelands</b>
		<i>Stefan M. Schmid · Bernhard Fügenschuh · Eduard Kissling · Ralf Schuster</i>
1		General Introduction
2		Structure and Evolution of the Alps
	2.1	The Major Paleogeographic and Tectonic Units of the Alps
	2.2	Important Along-strike Changes in the Architecture of the Alpine Orogen, Illustrated by Transects across the Alps
	2.3	Evolution of the Alpine System and Its Forelands in Time Slices
3		Lithosphere Structure of the Alpine Arc:
		New Evidence from High-resolution Teleseismic Tomography
	3.1	Introduction
	3.2	Crustal Structure
	3.3	Lithospheric Structure
	3.4	Seismic Structure of the Alpine Lithosphere Derived by Integrating Crustal and Mantle Structures
	3.5	Conclusions and Application of Results of High-resolution Tomography to the Alpine TRANSMED Transects
4		Data and Interpretation of the Crustal Structure Depicted in the TRANSMED Transects
	4.1	TRANSMED Transect IV (ECORS-CROP)
	4.2	TRANSMED Transect V (NFP-20 EAST)
	4.3	TRANSMED Transect VI (EASTERN ALPS)
5		Conclusions
VII		<b>Transect VII:</b>
		<b>East European Craton – Scythian Platform – Dobrogea – Balkanides – Rhodope Massif – Hellenides – East Mediterranean – Cyrenaica</b>
		<i>Dimitrios Papanikolaou · Hassan Barghathi · Christo Dabovski · Radu Dimitriu · Ahmed El-Hawat · Dumitriu Ioane · Haralambos Kranis · Adel Obeidi · Cheorghe Oaie · Antoneta Seghedi · Ivan Zagorchev</i>
VII.1		Introduction
VII.2		Sources of Information
VII.3		Description of Tectonostratigraphic and Lithostratigraphic Units
	VII.3.1	Eastern European Craton, Scythian Platform, N. Dobrogea Orogen and Moesian Platform
	VII.3.2	From the Moesian Platform to the Balkanides and East Rhodope Massif

- VII.3.3 Rhodope – Hellenides – Hellenic Arc and Trench – East Mediterranean Ridge
- VII.3.4 Cyrenaica and Adjacent Continental Shelf
- VII.4 Geologic Evolution
  - VII.4.1 The Southern European Plate – Scythian and Moesian Platforms
  - VII.4.2 The Active European Margin – The Balkanides
  - VII.4.3 The Tethyan Area – The Hellenides
  - VII.4.4 The African Plate – Cyrenaica Passive Margin

**VIII Transect VIII:  
Eastern European Craton – Crimea – Black Sea – Anatolia – Cyprus –  
Levant Sea – Sinai – Red Sea**

*Randell Stephenson · Yossi Mart · Aral Okay · Alastair H. F. Robertson  
Aline Saintot · Sergiy Stovba · Oksana Khriachtchevskaia*

- VIII.1 Introduction
- VIII.2 Sources of Information
- VIII.3 Description of Tectonostratigraphic and Lithostratigraphic Units
  - VIII.3.1 East European Craton
  - VIII.3.2 Crimean Peninsula
  - VIII.3.3 Western Black Sea Basin
  - VIII.3.4 Anatolia
  - VIII.3.5 Mediterranean Sea
  - VIII.3.6 Arabian Craton

**Appendix 1:  
Results of Sensitivity Tests for Different Synthetic Tomographic Models**  
*Wim Spakman · Rinus Wortel*

**Appendix 2:  
Additional Upper-Mantle Tomographic Cross Sections  
across the Mediterranean Region**  
*Wim Spakman · Rinus Wortel*

**Appendix 3:  
Additional Global Paleotectonic-Paleogeographic Reconstructions**  
*Gérard M. Stampfli · Gilles Borel*

The TRANSMED Atlas. The Mediterranean Region from  
Crust to Mantle

Geological and Geophysical Framework of the  
Mediterranean and the Surrounding Areas

Cavazza, W.; Roure, F.M.; Spakman, W.; Stampfli, G.M.;  
Ziegler, P.A. (Eds.)

2004, XXIII, 141 p. 52 illus., 41 illus. in color. With  
CD-ROM., Hardcover

ISBN: 978-3-540-22181-4
