
Contents

Part I. Dynamic Decision Problems under Uncertainty: Modeling Aspects

Reflections on Output Analysis for Multistage Stochastic Linear Programs

Jitka Dupačová 3

Modeling Support for Multistage Recourse Problems

Peter Kall, János Mayer 21

Optimal Solutions for Undiscounted Variance Penalized Markov Decision Chains

Karel Sladký, Milan Sitar 43

Approximation and Optimization for Stochastic Networks

Julien Granger, Ananth Krishnamurthy, Stephen M. Robinson 67

Part II. Dynamic Stochastic Optimization in Finance

Optimal Stopping Problem and Investment Models

Vadim I. Arkin, Alexander D. Slasnikov 83

Estimating LIBOR/Swaps Spot-Volatilities: the EpiVolatility Model

Stephen W. Bianchi, Roger J.B. Wets, Liming Yang 99

Structured Products for Pension Funds

Michael A.H. Dempster, Matteo Germano, Elena A. Medova, Michael Villaverde 115

Part III. Optimal Control Under Stochastic Uncertainty

Real-time Robust Optimal Trajectory Planning of Industrial Robots

Andreas Aurnhammer, Kurt Marti 133

Adaptive Optimal Stochastic Trajectory Planning and Control (AOSTPC) for Robots

Kurt Marti 155

Part IV. Tools for Dynamic Stochastic Optimization

Solving Stochastic Programming Problems by Successive Regression Approximations – Numerical Results

István Déák 209

Stochastic Optimization of Risk Functions via Parametric Smoothing

Yuri Ermoliev, Vladimir Norkin 225

Optimization under Uncertainty using Momentum

Sjur Didrik Flåm 249

Perturbation Analysis of Chance-constrained Programs under Variation of all Constraint Data

René Henrion 257

The Value of Perfect Information as a Risk Measure

Georg Ch. Pflug 275

New Bounds and Approximations for the Probability Distribution of the Length of the Critical Path

András Prékopa, Jianmin Long, Tamás Szántai 293

Simplification of Recourse Models by Modification of Recourse Data

Maarten H. van der Vlerk 321
