Part I General Topics

Why Is It Logical to Admit Several Logics?

Evandro Agazzi	3
1 The Issue of the Plurality of Logics	3
2 The Domain of Logic	4
3 The Notion of Logical Consequence	6
4 The Basic Status of Alethic Logic	8
5 Mathematical Logic and Its Double Meaning	9
6 The Variety of Logical Calculi	10
7 The Broadening of the Domain of Logic	12
8 Logic and the Object of Discourse	17
9 Meaning, Sense, and Reference	19
10 The Relevance of the Referents for Logic, or from Pure to Applied Logic	21
11 The Logic of Particular Sciences	22
12 Why Is It Logical to Admit Several Logics?	25
References	26

Does Metaphysics Need a Non-Classical Logic?

Francisco Miró Quesada	27
1 Trying to Clarify Concepts	27
2 Plotinus	28
2.1 Hypostases	29
3 Logic	30
3.1 Provisos	30
4 Hegel	30
4.1 Metaphysics and Logic	30
4.2 Holism	31
5 Empiricism	32
5.1 Empiricist Metaphysics	32
6 Noneism	33
6.1 Noneism Metaphysics	33
6.2 Noneist Universe	35

VIII Contents

7	Noneist Logic	37
7.1	Quantification	37
	References	37
Logic and the Philosophical Interpretation of Science		
	Dudley Shapere	41
1	The Promise of the Vienna Circle	41
2	Two Clues to the Roots of the Logistic Failure	43
3	Nature of and Contrasts Between the Two Programs	47
4	Roots of the Difficulties, and Their Solution	48
5	What Does It Mean to Say That Science Is Content-Driven?	52
	References	53
How Set Theory Impinges on Logic		
	Jesús Mosterín	55
1	The Set-Theoretical Universe	55
2	Second-Order Logic and Set Theory	57
3	The Axiom of Choice	57
4	The Continuum Hypothesis	58
5	Inaccessible Cardinals	59
6	First-Order Logic and Set Theory	60
	References	62
Geometries and Arithmetics		
	Graham Priest	65
1	Introduction: Geometry and Arithmetic	65
2	Non-Euclidean Geometry	66
3	Nonstandard Arithmetics	67
4	Solving Equations	68
5	Models of the Inconsistent	70
6	Inconsistent Arithmetic	71
7	The General Structure of Models	72
8	Empirical Applications	73
9	Non-Standard Logics in Science	76
	References	77
Remarks on Criteria of Truth and Models in Science		
	Giuseppe Del Re	79
1	Premise	79
2	Logic for Science	79
2.1	What We Mean by Logic Here	79
3	Truth in Science	80
3.1	Metaphors, Models, and the Direct-Access Level	80
3.2	Science and Arguments by Analogy	82
3.3	Rational or Reasonable?	83

Significant? Not Significant?**The Dilemma of Statistical Induction in Scientific Research**

Italo Scardovi	87
References	92

Part II Alternative Proposals

Outline of a Paraconsistent Category Theory

Newton C.A. da Costa, Otávio Bueno, Analice Volkov	95
1 The Theory OB_0	95
1.1 Subcategories	96
1.2 Union of Subcategories	96
1.3 The Empty Category	96
1.4 Objects of a Category	96
1.5 Morphisms of a Category	97
1.6 The Category of Two Morphisms	98
1.7 The Postulates of Identity	98
1.8 The Postulate P_{17}	98
1.9 Functorial Categories	99
1.10 Functors	99
1.11 The Category of Subcategories of a Given Category	100
1.12 Image by a Functor	100
1.13 Functors and Their Images	101
1.14 Sets	101
1.15 Complete Categories of Sets	102
1.16 ZF and OB_0	103
2 The Paraconsistent Theory OB_1	104
2.1 The Calculus $C_1^=$	104
2.2 The Theory OB_1	106
3 Philosophical Remarks	107
References	113

Combinatory Logic, Language, and Cognitive Representations

Jean-Pierre Desclés	115
1 Concatenative and Applicative Structures	118
2 Combinatory Logic as an Applicative Language	121
3 Combinators Are Abstract Operators	125
4 β -Reductions (β -Expansions) of Combinators	128
5 Operators in Combinatory Logic Are “Objects of Thought”	130
6 Combinators Used to Express Complex Concepts	133
7 Meaningless and Types	136
8 Cognitive Representations	139

9	Conclusion	142
