|--|---------------|
| 1 Soil Bioremediation and Phytoremediation – An Overview | 1 |
| Owen Ward and Ajay Singh | |
| 1 Introduction | 1 |
| 2 Major Environmental Contaminants | 4 |
| 2.1 Chemical Contaminants | 4 |
| 2.2 Biological Wastes and Contaminants | 5 |
| 3 Microbial Transformation of Chemical Contaminants | 5 |
| 4 Phytoremediation | 7 |
| 5 Criteria for Selecting Bioremediation as an Option and for Selecting a Particular Bioremediation Configuration .. | 7 |
| 6 Regulations and Public Attitudes | 9 |
| 7 Advantages of Bioremediation Approaches to Environmental Sustainability | 9 |
| 8 Conclusions | 10 |
| References | 11 |
| 2 Biodegradation and Bioremediation of Petroleum Pollutants in Soil | 13 |
| Michael H. Huesemann | |
| 1 Introduction | 13 |
| 2 Types of Petroleum Wastes and Their Composition | 14 |
| 3 Soil Biotreatment Technologies | 15 |
| 4 Loss Mechanisms Other Than Biodegradation | 17 |
| 5 Optimizing Environmental Conditions | 18 |
| 5.1 Moisture Content | 18 |
| 5.2 Oxygen | 18 |
| 5.3 Fertilizers | 20 |
| 5.4 pH | 21 |
| 5.5 Temperature | 21 |
| 6 Addressing Other Potential Limitations | 22 |
| 6.1 High Contaminant Concentrations | 22 |
| 6.2 Presence of Inhibitors | 22 |

| | |
|--|-----------|
| 6.3 Insufficient Number of Hydrocarbon-Degrading Microorganisms | 23 |
| 6.4 Lack of Cometabolism | 24 |
| 6.5 Inherent Recalcitrance | 25 |
| 6.6 Bioavailability Limitations | 26 |
| 7 Risk Assessment and Environmentally Acceptable End Points | 28 |
| 8 Conclusions | 29 |
| References | 29 |
| 3 Bioremediation of Pesticide-Contaminated Soils | 35 |
| Ramesh C. Kuhad, Atul K. Johri, Ajay Singh, and Owen P. Ward | |
| 1 Introduction | 35 |
| 2 Biodegradation of Pesticides | 36 |
| 3 Organochlorines | 38 |
| 3.1 Chlorophenoxy Acids | 38 |
| 3.2 DDT | 40 |
| 3.3 γ -Hexachlorocyclohexane | 42 |
| 3.4 Endosulfan | 43 |
| 4 Organophosphates | 44 |
| 5 Carbamates | 45 |
| 6 s-Triazines | 46 |
| 7 Other Pesticides | 47 |
| 8 Conclusions and Future Prospects | 48 |
| References | 49 |
| 4 Biodegradation and Bioremediation of Explosives | 55 |
| Jian-Shen Zhao, Diane Fournier, Sonia Thiboutot, GuyAmpleman, and Jalal Hawari | |
| 1 Introduction | 55 |
| 2 Structural Properties and Effect on Biodegradation | 57 |
| 3 Biodegradation of Cyclic Nitramine Explosives | 60 |
| 3.1 Biodegradation of RDX and HMX by Anaerobic Bacteria | 60 |
| 3.2 Biodegradation of RDX Under Aerobic Conditions ... | 63 |
| 3.3 Biodegradation of Polycyclic Nitramine Explosive CL-20 | 66 |
| 3.4 Biodegradation of RDX and HMX in Sediments | 67 |
| 4 Biodegradation of TNT and Other Polynitroaromatic Explosives | 67 |
| 4.1 Biodegradation of TNT by Aerobic Bacteria | 67 |

| | |
|---|------------|
| 4.2 Biodegradation of TNT by Anaerobic Bacteria | 70 |
| 4.3 Biodegradation of TNT by Fungi | 71 |
| 5 Safety Procedures | 73 |
| 6 Conclusions | 73 |
| References | 74 |
| 5 Biological Treatment of Metallic Pollutants | 81 |
| Brendlyn D. Faison | |
| 1 Introduction | 81 |
| 1.1 Definition of Scope | 81 |
| 1.2 Biologically Relevant Elements | 83 |
| 1.3 Iron Respiration as a Model for Dissimilatory Metabolism | 87 |
| 2 Microorganisms as Remediation Tools for Suboxic Environments | 89 |
| 2.1 Problem Definition | 89 |
| 2.2 Relevant Biological Factors | 90 |
| 2.3 Relationship to Abiotic Factors | 103 |
| 3. Practical Aspects of Bioremediation | 105 |
| 3.1 Management and Operations | 105 |
| 3.2 Hydrological Data Needs | 105 |
| 3.3 Physicochemical Data Needs | 110 |
| 3.4 Spatial and Temporal Data Needs | 110 |
| 3.5 Major Technology Needs | 111 |
| 4 Conclusions | 112 |
| References | 113 |
| 6 Phytoremediation of Persistent Organic Contaminants in the Environment | 115 |
| Saleema Saleh, Xiao-Dong Huang, Bruce M. Greenberg, and Bernard R. Glick | |
| 1 Fundamentals of Phytoremediation | 115 |
| 2 Physical Remediation Strategies | 117 |
| 3 Phytoremediation Strategies | 118 |
| 4 Advantages and Disadvantages of Phytoremediation | 122 |
| 5 Phytoremediation of Organics | 123 |
| 5.1 Sources of Organic Contaminants in the Environment | 123 |
| 5.2 Factors That Affect the Uptake of Organic Contaminants | 124 |
| 5.3 Contaminant Classes | 125 |
| 5.4 Role of Microorganisms in Soil Bioremediation | 127 |

| | |
|--|------------|
| 5.5 Improved Mechanisms to Optimize Phytoremediation | 129 |
| 6 Conclusions | 131 |
| References | 131 |
| 7 Phytoremediation of Metals and Inorganic Pollutants | 135 |
| Tomas Macek, Daniela Pavlikova, and Martina Mackova | |
| 1 Introduction | 135 |
| 2 Phytoremediation and Rhizoremediation | 140 |
| 2.1 The Role of the Rhizosphere | 140 |
| 2.2 Exudates and Enzymes Released | 141 |
| 2.3 Phytoremediation Methods | 141 |
| 2.4 Artificial Wetlands | 142 |
| 2.5 Perspectives Regarding Plants Used for Detoxification in Chemical Weapon Demilitarisation | 142 |
| 3 In Vitro Plant Cultures in the Phytoremediation of Metals | 143 |
| 3.1 Callus and Cell Suspension Cultures | 143 |
| 3.2 Hairy Root Cultures | 144 |
| 4 Breeding and Genetic Engineering | 145 |
| 4.1 Methods of Preparation of Transgenic Plants | 145 |
| 4.2 Phytoremediation of a Mercury-Contaminated Environment | 146 |
| 4.3 Volatilisation of Selenium | 147 |
| 4.4 Increased Accumulation of Heavy Metals | 147 |
| 5 Other Approaches to Improve Phytoremediation Processes | 148 |
| 5.1 Symbiotic Bacteria | 148 |
| 5.2 Mycorrhizal Symbiosis | 149 |
| 5.3 Role of Secondary Plant Metabolites in Phytoremediation | 150 |
| 6 Conclusions | 150 |
| References | 152 |
| 8 Remediation of Organic Pollutants Through Natural Attenuation | 159 |
| Serge Delisle and Charles W. Greer | |
| 1 Definition of Natural Attenuation | 159 |
| 1.1 Monitored Natural Attenuation (MNA) | 161 |
| 1.2 Evaluating Natural Attenuation | 161 |
| 1.3 Abiotic Processes of Natural Attenuation | 161 |

| | | |
|----------|---|------------|
| 2 | Overview of Intrinsic Bioremediation | 163 |
| 2.1 | Electron Acceptors | 164 |
| 2.2 | Intrinsic Bioremediation of Petroleum Hydrocarbons | 166 |
| 2.3 | Intrinsic Bioremediation of Chlorinated Solvents | 166 |
| 3 | Case Studies of Monitored Natural Attenuation | 167 |
| 3.1 | Intrinsic Bioremediation of Fuel Hydrocarbons at a Former Canadian Forces Base, Chatham, New Brunswick – Case 1 | 167 |
| 3.2 | Intrinsic Bioremediation of Chlorinated Solvents at Canadian Force Base, Trenton, Ontario – Case 2 ... | 176 |
| 4 | Conclusions | 182 |
| | References | 185 |
| 9 | Evaluation of Current Soil Bioremediation Technologies | 187 |
| | Owen P. Ward and Ajay Singh | |
| 1 | Introduction | 187 |
| 2 | Factors Affecting Bioremediation and Choice of Technology | 188 |
| 2.1 | Site Characteristics | 188 |
| 2.2 | Soil Type | 188 |
| 2.3 | Moisture Content | 188 |
| 2.4 | Nature of Contaminant | 189 |
| 2.5 | Time Constraints | 189 |
| 2.6 | Volatilization | 190 |
| 2.7 | Biostimulation | 190 |
| 2.8 | Bioaugmentation | 194 |
| 2.9 | Sampling and Monitoring | 195 |
| 3 | Bioremediation Technologies and Their Evaluation | 196 |
| 3.1 | Natural Attenuation | 197 |
| 3.2 | In Situ Subsurface Bioremediation | 197 |
| 3.3 | Soil Pile and Composting Techniques | 199 |
| 3.4 | Marine Shoreline and Wetlands Remediation | 200 |
| 3.5 | Land Farming | 202 |
| 3.6 | Slurry Bioreactors | 202 |
| 3.7 | Phytoremediation | 204 |
| 4 | Conclusions | 206 |
| | References | 207 |
